**Neurobiology, Diagnosis and Treatment in Autism** May 20 2022 Autism is an extremely complex neurodevelopmental disorder that is expressed in a spectrum of phenotypes and is characterised by impaired reciprocal social communication and stereotyped patterns of interests and activities. Its aetiopathogenesis remains poorly understood. This exhaustive synthesis discusses various aspects: A focus on the neurobiology of autism: the candidate genes implicate an involvement of numerous brain regions and a concomitant malfunctioning of neurotransmitter, immunologic, and other mechanisms; The most incisive rehabilitation models in their original formulation and the results achieved with the same or similar protocols in Italian centres (understanding, language therapy, social skill training; The psychopharmacologic options for the condition of autism per se and for its associated, very frequent, comorbidities. It suggests a potential influence on professional practice and enables an up-to-date approach to effective diagnosis and treatment.

**Ethics for Behavior Analysts** Feb 26 2023 Behavior analysis, a rapidly growing profession, began with the use and application of conditioning and learning techniques to modify the behavior of children or adults presenting severe management problems, often because of developmental disabilities. Now behavior

analysts work in a variety of settings, from clinics and schools to workplaces. Especially since their practice often involves aversive stimuli or punishment, they confront many special ethical challenges. Recently, the Behavior Analysis Certification Board codified a set of ten fundamental ethical guidelines to be followed by all behavior analysts and understood by all students and trainees seeking certification. This book shows readers how to follow the BACB guidelines in action. The authors first describe core ethical principles and then explain each guideline in detail, in easily comprehensible, everyday language. The text is richly illuminated by more than a hundred vivid case scenarios about which the authors pose, and later answer questions for readers. Useful appendices include the BACB Guidelines, an index to them, practice scenarios, and suggested further reading. Practitioners, instructors, supervisors, students, and trainees alike will welcome this invaluable new aid to professional development.

**Graphene Production and Application** Sep 11 2021 Graphene is a super thin and strong material with potential to revolutionize the field of technology. As such, graphene is quickly attracting attention from researchers seeking to identify new concepts and applications of this “supermaterial.” Graphene Production and Application is a comprehensive and easy-to-understand source of information on the advances in the growing research on graphene. Written by experts in the field, this book covers the topics of synthetic approaches, characterization techniques, and applications of graphene. It is ideally suited for a broad range of readers including students, instructors, and professionals.

*The Anglican Eucharist in Australia* Apr 18 2022 This book examines the history, theology and liturgy of the Eucharist in the Anglican Church of Australia from its earliest foundation after the arrival of British settlers in 1788 to the present.

**Applied Behavior Analysis Treatment of Violence and Aggression in Persons with Neurodevelopmental Disabilities** Mar 18 2022 This book focuses on applied behavior analysis (ABA) treatment of violence and aggression in persons with neurodevelopmental disabilities. It details ABA theory and concepts leading to empirical treatment procedures that can be implemented successfully across diverse treatment settings. Further, the book examines contemporary approaches to functional behavioral assessment (FBA) and functional analysis (FA) in determining the environmental conditions responsible for violence and aggression. In addition, the volume describes several evidence-supported treatment procedures that encompass antecedent-control, contingency management, cognitive-behavior therapy, and physical intervention components. It addresses effective strategies for training and supervising care providers, including behavioral skills training (BST), posttraining performance management, and mindfulness. Finally, the book presents recommendations that guide effective and socially valid research-to-practice translation. Applied Behavior Analysis Treatment of Violence and Aggression in Persons with Neurodevelopmental Disabilities is an essential resource for researchers, clinicians/therapists, and upper-level undergraduate and graduate students in forensic psychology, public health, criminology/criminal justice, and behavioral therapy and rehabilitation.

**Many Believed Because of Her Testimony** Nov 13 2021 The Reverend Professor Dorothy A. Lee FAHA is well-known as a New Testament scholar not only in Australia but around the world. An Anglican priest, her ministry, particularly as a preacher and retreat director, is highly regarded and highly sought after, not only in her home city of Melbourne, but in many parts of the country. This Festschrift volume honors her contributions and ministry on the occasion of her seventieth birthday. An interdisciplinary collection of twenty-one essays, it offers two biographical contributions, several essays on New Testament themes, essays on women, feminism, and the church, and cross-disciplinary essays focused on the biblical text. Contributors to the volume come from Australian theological education centers and Australian churches.

*Physical Restraint and Seclusion in Schools* Dec 27 2022 Explore the realities behind the headlines concerning children who have been isolated or physically restrained in schools, sometimes resulting in injury or even death. The editors address the legal and ethical issues underlying these practices, and, more importantly, what can be done to move schools away from potentially harmful treatment of children. This valuable resource explores the array of practices and approaches that provide effective and safe ways to prevent and reduce conflict, de-escalate conflict and aggressive behavior and train educators in crisis intervention.

*Applied Behavior Analysis Advanced Guidebook* Dec 07 2023 The Applied Behavior Analysis Practice Guidebook: A Manual for Professional Practice gives behavioral practitioners pragmatic advice, direction and recommendations for being an effective clinician, consultant, supervisor and performance manager. The book adopts a how to do it perspective featuring contributions from expert scientist-practitioners. Each chapter introduces the relevance of the topic for practicing professionals, describes and synthesizes the empirical basis of the topic, and then presents practitioner recommendations. With this format, readers can navigate the chapters with familiarity and confidence to facilitate the understanding of content and integration of the many practice areas addressed. Focuses on the professional practice areas of board certified behavior analysts Includes forms, tables, flowcharts and other visual aids to assist in BCBA work Concludes each chapter with a practice guidelines checklist Features contributions from notable experts in distinct specialty areas Helps readers build skills and competencies as an applied behavior analyst

**Educating Learners with Down Syndrome** Sep 04 2023 For individuals with Down syndrome, the extent of the effect of intellectual disability depends largely on the degree of provision of appropriate support and intervention. In *Educating Learners with Down Syndrome*, editors Rhonda Faragher and Barbara Clarke have brought together a number of expert contributors, whose chapters review recent findings in the field of DS education, highlight promising practices, and identify areas for future research. While the emphasis is primarily on the school years, links to early intervention and to life post-16 are made, with chapters organized into three parts: conceptual overview of issues in learning and teaching, learning mathematics, and literacy development. The book is also united by the cohesive themes of assessment, evidence-based practice, and inclusive practices. *Educating Learners with Down Syndrome* importantly incorporates the voices of individuals with Down syndrome, whose personal narratives add significance to the research mission of the text and demonstrate the authors' inclusive philosophy. Aimed at researchers, teacher educators, higher degree students, and policy makers, this book is the first of its kind to provide a compendium of research on educating learners with Down syndrome.

**A History of Competitive Gaming** Dec 15 2021 Competitive gaming, or esports – referring to competitive tournaments of video games among both casual gamers and professional players – began in the early 1970s with small competitions like the one held at Stanford University in October 1972, where some 20 researchers and students attended. By 2022 the estimated revenue of the global esports industry is in excess of \$947 million, with over 200 million viewers worldwide. Regardless of views held about competitive gaming, esports have become a modern economic and cultural phenomenon. This book studies the full history of competitive gaming from the 1970s to the 2010s against the background of the arrival of the electronic and computer age. It investigates how competitive gaming has grown into a new form of entertainment, a sport-like competition, a lucrative business and a unique cultural sensation. It also explores the role of competitive gaming in the development of the video game industry, making a distinctive contribution to our knowledge and understanding of the history of video games. A History of Competitive Gaming will appeal to all those interested in the business and culture of gaming, as well as those studying modern technological culture.

**Urban Forests, Trees, and Greenspace** Jul 22 2022 Urban forests, trees and greenspace are critical in contemporary planning and development of the city. Their study is not only a question of the growth and conservation of green spaces, but also has social, cultural and psychological dimensions. This book brings a perspective of political ecology to the complexities of urban trees and forests through three themes: human agency in urban forests and greenspace; arboreal and greenspace agency in the urban landscape; and actions and interventions in the urban forest. Contributors include leading authorities from North America and Europe from a range of disciplines, including forestry, ecology, geography, landscape design, municipal planning, environmental policy and environmental history.

**Teaching Statistics Using Baseball** Jul 02 2023 *Teaching Statistics Using Baseball* is a collection of case studies and exercises applying statistical and probabilistic thinking to the game of baseball. Baseball is the most statistical of all sports since players are identified and evaluated by their corresponding hitting and pitching statistics. There is an active effort by people in the baseball community to learn more about baseball performance and strategy by the use

of statistics. This book illustrates basic methods of data analysis and probability models by means of baseball statistics collected on players and teams. Students often have difficulty learning statistics ideas since they are explained using examples that are foreign to the students. The idea of the book is to describe statistical thinking in a context (that is, baseball) that will be familiar and interesting to students. The book is organized using a same structure as most introductory statistics texts. There are chapters on the analysis on a single batch of data, followed with chapters on comparing batches of data and relationships. There are chapters on probability models and on statistical inference. The book can be used as the framework for a one-semester introductory statistics class focused on baseball or sports. This type of class has been taught at Bowling Green State University. It may be very suitable for a statistics class for students with sports-related majors, such as sports management or sports medicine. Alternately, the book can be used as a resource for instructors who wish to infuse their present course in probability or statistics with applications from baseball. The second edition of Teaching Statistics follows the same structure as the first edition, where the case studies and exercises have been replaced by modern players and teams, and the new types of baseball data from the PitchFX system and fangraphs.com are incorporated into the text.

*Behavior Change in the Human Services* Nov 25 2022 Behavior Change in the Human Services, Sixth Edition continues to provide a systematic introduction and overview of behavioral and cognitive principles and their applications to a wide range of problems and situations encountered in the human service professions. Designed for students and practitioners, the book uses a unique problem-solving framework to demonstrate how behavior change principles can be applied to practice situations. Martin and Sandra Sundel feature a detailed and sequential organization that encourages readers to move progressively through material of increasing complexity and to conduct self-assessments of their knowledge. The Fifth Edition includes eight clinical case studies and many new and engaging examples that address issues such as substance abuse, child behavior problems, assertiveness, marital discord, and developing appropriate social behaviors. The expanded chapter on intervention techniques incorporates empirically tested behavioral and cognitive strategies for addressing clinical problems such as phobias, anxiety disorders, depression, and other behavioral disorders. Current developments and trends in the field are discussed, including the movement toward evidence-based practice. This comprehensive yet accessible text also features figures, charts, and forms to demonstrate data collection and analysis. Any student pursuing a career in the helping professions, including social work, psychology, counseling, special education, nursing, and psychiatry, will find this book valuable

**Baking Powder Wars** Jun 08 2021 First patented in 1856, baking powder sparked a classic American struggle for business supremacy. For nearly a century, brands battled to win loyal consumers for the new leavening miracle, transforming American commerce and advertising even as they touched off a chemical revolution in the world's kitchens. Linda Civitello chronicles the titanic struggle that reshaped America's diet and rewrote its recipes. Presidents and robber

barons, bare-knuckle litigation and bold-faced bribery, competing formulas and ruthless pricing--Civitello shows how hundreds of companies sought market control, focusing on the big four of Rumford, Calumet, Clabber Girl, and the once-popular brand Royal. She also tells the war's untold stories, from Royal's claims that its competitors sold poison, to the Ku Klux Klan's campaign against Clabber Girl and its German Catholic owners. Exhaustively researched and rich with detail, Baking Powder Wars is the forgotten story of how a dawning industry raised Cain--and cakes, cookies, muffins, pancakes, donuts, and biscuits.

**The Cambridge Handbook of Psychology and Economic Behaviour** Apr 11 2024 There has recently been an escalated interest in the interface between psychology and economics. The Cambridge Handbook of Psychology and Economic Behaviour is a valuable reference dedicated to improving our understanding of the economic mind and economic behaviour. Employing empirical methods - including laboratory and field experiments, observations, questionnaires and interviews - the Handbook provides comprehensive coverage of theory and method, financial and consumer behaviour, the environment and biological perspectives. This second edition also includes new chapters on topics such as neuroeconomics, unemployment, debt, behavioural public finance, and cutting-edge work on fuzzy trace theory and robots, cyborgs and consumption. With distinguished contributors from a variety of countries and theoretical backgrounds, the Handbook is an important step forward in the improvement of communications between the disciplines of psychology and economics that will appeal to academic researchers and graduates in economic psychology and behavioral economics.

**International Intervention and Local Politics** Jan 28 2023 International peace- and state-building interventions have become ubiquitous in international politics since the 1990s, aiming to tackle the security problems stemming from the instability afflicting many developing states. Their frequent failures have prompted a shift towards analysing how the interaction between interveners and recipients shapes outcomes. This book critically assesses the rapidly growing literature in international relations and development studies on international intervention and local politics. It advances an innovative approach, placing the politics of scale at the core of the conflicts and compromises shaping the outcomes of international intervention. Different scales - local, national, international - privilege different interests, unevenly allocating power, resources and political opportunity structures. Interveners and recipients thus pursue scalar strategies and socio-political alliances that reinforce their power and marginalise rivals. This approach is harnessed towards examining three prominent case studies of international intervention - Aceh, Cambodia and Solomon Islands - with a focus on public administration reform.

**Nigeria at Fifty** Oct 25 2022 Nigeria, Africa's most populous and biggest democracy, celebrates her fiftieth year as an independent nation in October 2010. As the cliché states, 'As Nigeria goes, so goes Africa'. This book frames the socio-historical and political trajectory of Nigeria while examining the many dimensions of the critical choices that she has made as an independent nation. How does the social composition of interest and power illuminate the actualities and narratives of the Nigerian crisis? How have the choices made by Nigerian leaders structured, and/or have been structured by, the character of the Nigerian

state and state-society relations? In what ways is Nigeria's mono-product, debt-ridden, dependent economy fed by 'the politics of plunder'? And what are the implications of these questions for the structural relationships of production, reproduction and consumption? This book confronts these questions by making state-centric approaches to understanding African countries speak to relevant social theories that pluralize and complicate our understanding of the specific challenges of a prototypical postcolonial state. This book was published as a special issue of the *Journal of Contemporary African Studies*.

**Porous Polymers** Feb 14 2022 This book gathers the various aspects of the porous polymer field into one volume. It not only presents a fundamental description of the field, but also describes the state of the art for such materials and provides a glimpse into the future. Emphasizing a different aspect of the ongoing research and development in porous polymers, the book is divided into three sections: Synthesis, Characterization, and Applications. The first part of each chapter presents the basic scientific and engineering principles underlying the topic, while the second part presents the state of the art results based on those principles. In this fashion, the book connects and integrates topics from seemingly disparate fields, each of which embodies different aspects inherent in the diverse field of porous polymeric materials.

*Playing, Laughing and Learning with Children on the Autism Spectrum* Jun 01 2023 Praise for the first edition: 'An approachable and practical edition that will be welcomed by parents and carers alike. I know how hard it can be to find 'How to' resources for parents. Well here is a gem.' - Children, Young People and Families Parents of young children newly diagnosed as on the autism spectrum are often at a loss for ideas about how best to help their child. *Playing, Laughing and Learning with Children on the Autism Spectrum* is not just a collection of play ideas; it shows how to break down activities into manageable stages, and looks at ways to gain a child's attention and motivation and to build on small achievements. Each chapter covers a collection of ideas around a theme, including music, art, physical activities, playing outdoors, puzzles, turn-taking and using existing toys to create play sequences. There are also chapters on introducing reading and making the most of television. This updated second edition contains an extensive chapter on how to use the computer, the internet and the digital camera to find and make resources and activities, and suggests many suitable websites to help parents through the internet maze. The ideas are useful both for toddlers and primary age children who are still struggling with play.

**A Cognitive Psychology of Mass Communication** Apr 06 2021 In this fifth edition of *A Cognitive Psychology of Mass Communication*, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics – sex, violence, advertising – to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for *Media Effects*, *Media & Society*, and *Psychology of Mass Media* coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.
