An index makes the manual easy to navigate. A faithful reproduction of the 1967 Floyd Clymer publication of the official Honda Factory Workshop Manual for the 125-150 series C92, CS92, CB92, C95 and CA95. There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 228 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what

needs to be done! There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide. As a service to the classic car enthusiast VelocePress, in close cooperation with Brooklands Books Ltd., has brought this and other repair manuals previously published as part of the Autobook - Autopress Owners Workshop Manual Series back into print. This series of manuals is an invaluable resource for the classic car enthusiast and a - must have - for owners interested in performing

their own maintenance. These manuals include detailed repair & service data and comprehensive step-by-step instructions and illustrations on dismantling, overhauling, and re-assembly. Typically they contain individual chapters that deal with the following items: Engine, Carburetor & Fuel System, Ignition System, Cooling System, Clutch, Transmission, Drive Shaft, Rear Axle & Rear Suspension, Front Suspension & Hubs, Steering Gear, Braking System, Electrical Equipment and Bodywork. There are many time saving hints and tips included and there is an easy to follow fault diagnosis at the end of each chapter. All of the manuals in this series include a detailed index and feature an oil resistant laminated cover. 234 pages and more than 300 illustrations and charts, size 8.25 x 10.75 inches. This manual is a reproduction of the original Floyd Clymer 100cc and 125cc Sachs Engine workshop manual. However, it has been updated with a 1974 illustrated 'List of Spares' for the 100cc and

125cc Sachs engines. In addition, it includes a 1968 illustrated 'Spare Parts List' for the 1968 to 1971 Sachs 'Enduro', 'Cross Country' and 'Moto Cross' motorcycles that was omitted from the later editions. It has also been expanded to include maintenance and repair data for both the leading link and telescopic fork variants of the 1971 to 1975 Sachs/DKW 'Enduro', 'Boondocker', 'Moto-Cross' and 'Hornet' motorcycles plus a 1972 illustrated 'Spare Parts List' for those models. Obviously, this manual evolved in part due to the Sachs acquisition of both Hercules motorcycles in the late 1950's and DKW in 1966. However, it will also be of use to owners of any other motorcycles that utilized this series of 100cc and 125cc Sachs engines. After the end of World War II, several motorcycle manufacturers were merged or absorbed under the Sachs banner and, in 1968 Sachs introduced their 100cc and 125cc 'Enduro', 'Cross Country' and 'Moto Cross' motorcycles for sale in the USA. The significance

of the Sachs, Hercules and DKW mergers would soon become apparent as, while the Sachs motorcycles carried the 'Sachs' logo on the engine case, they featured a 'Hercules' identification plate on the steering head. In addition, Sachs ultimately decided to market their 'Enduros' and 'Scramblers' under the DKW badge and the original Sachs 'Enduro', 'Cross Country' and 'Moto Cross' models disappeared from the USA market in late 1971. However, they were replaced by 125cc DKW 'Enduro', 'Boondocker', 'Moto-Cross' and 'Hornet' models that were mechanically identical to the previous Sachs models, a true case of badge engineering. In 1968 when Sachs introduced their 100cc and 125cc series of 2-stroke engines it was not long before the 'off road' and 'competition' world recognized their durability and performance. Consequently, within a short period of time Sachs engines were in use by a large number of other motorcycle manufacturers. Perhaps the most prominent USA manufacturer being Penton

Motorcycles who produced their first competition Sachs powered models in 1968. Floyd Clymer quickly realized that there was a need for service and repair information for these engines and he set about preparation of an appropriate manual in early 1969. 82 pages, 30 illustrations, size 5.5 x 8.5 inches. Originally published in 1962 by Floyd Clymer, this manual includes complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all 125cc and 150cc widemount engined Vespa Scooters from 1951 through 1961, beginning with the Vespa 125 (VM1T) through the GS150 (VS51T) it also covers the Douglas 42L2 and Clubman. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete mechanical renovation, making it an invaluable resource for collectors and restorers of these classic Vespa scooters. With the help of the Clymer Yamaha

The service manual by Clymer is an authoritative piece of DIY literature and should provide you the confidence you need

It includes a reproduction of the original 100cc-125cc factory workshop manual plus the 11 factory supplements that extend the coverage of that original manual through 1984. The original 'base' manual for this series of motorcycles was first published in 1970 in softbound format. In 1971 it was changed to a ring-bound publication, as this better suited the addition of supplements for model updates without the need for printing an entirely new manual. The 1970 softbound manual covered the CB100, CL100 and SL100 and in 1971 that softbound publication was updated and reprinted to include the CB125S, CD125S and the SL125. A little later, but still in 1971, the first ring-bound version was issued which now included a supplement for the TL125. However, by the end of 1976 all of those models, with the

exception of the CB125, had been discontinued, but the base ring-bound manual continued to be updated through 1984 for the CB125 models. For some inexplicable reason, even though 1985 was the final year for the CB125, instead of publishing yet another update, Honda issued a singular manual specific to the 1985 model only. This 257 page manual covers the 1970 to 1984 single cylinder street, scrambler, motosport and trials models. The primary focus is the maintenance and repair of the major mechanical and electrical components including: Engine, Transmission, Clutch, Fuel, Electrical, Frame, Suspension and Steering, models covered are: 100cc Street-CB100 100cc Scrambler-CL100 100cc Motosport-SL100 125cc Street-CB125-CB125S-CB125J-CD125S 125cc Motosport-SL125 125cc Trials-TL125 Many of the earlier Honda motorcycle models were often introduced at different times in different countries using different model names or designations. For example the CB125 was first introduced in 1971

but was not available in the USA (as the CB125S) until 1973. These varying release dates and differing model designations often lead to difficulty in selecting the correct workshop manual. Worse yet, owners of this series of 100cc and 125cc singles are subjected to considerable confusion surrounding the appropriate selection from the multitude of OEM publications that have recently flooded the on-line marketplace. Honda published 11 different supplements and addendums to the original ring-bound base manual and many of these are listed as workshop manuals by individuals that deliberately intend to deceive or really have no idea what they are selling. In addition, many of the so-called workshop manual reprints are incomplete. Consequently, should you decide to purchase your manual elsewhere, you are advised to confirm that it includes all 257 pages of the original factory manual. Owners of the 1959-1966 twin cylinder 125-150cc 'Benly' C92 & C95 series are directed to our Honda factory

workshop manual ISBN 9781588500823, owners of the 1964-1980 twin cylinder 125-150cc models will require our workshop manual ISBN 9781588502643. Finally, please note that the text in the original Honda Factory Workshop Manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them. This is a service and repair manual for the DIY motorcycle mechanic. The aim of this manual is to help readers get the best from their motorcycle. It provides information on routine maintenance and servicing and the tasks are described and photographed in a step-by-step

sequence so that even a novice can do the work. 116 pages, with more than 360 illustrations and diagrams, size 8.25 x 10.75 inches. At the time of Floyd Clymer's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication. This 'Honda 125cc - 200cc' is one of those completed but previously unpublished compilations of various Honda Factory Manuals for the 125cc, 160cc, 175cc and 200cc center cam drive twins. While this manual was likely completed in early 1970 it actually covers the 1964 through 1978 street, scrambler and motosport models. The primary focus is the maintenance and repair of the major mechanical and electrical components including: Engine, Transmission, Clutch, Fuel, Electrical, Frame, Suspension and Steering. Owners of the earlier 125-150cc C92 & C95 twin cylinder 'Benly' series (1959-1966) are directed to our Honda factory workshop manual ISBN 9781588500823 which is exclusive to those models. After his visit to Japan in 1961, Floyd

Clymer published 'The Complete Catalog of Japanese Motor Vehicles' (ISBN 9781588502209). Based on his experiences during that visit, Floyd also anticipated the need for repair manuals for those Japanese motorcycles that were just starting to be imported into the USA [Yamaha (1958), Honda (1959), Suzuki (1963)]. The predominance of the Floyd Clymer Japanese motorcycle manuals were reprints or compilations of the factory publications, which today makes them more desirable than the current aftermarket manuals. This Workshop Manual is a compilation of various Suzuki Factory Manuals for the 125cc, 150cc, 200cc, 250cc, 305cc, 315cc & 500cc 2-Stroke twins from 1962 onwards.
