The Great Warming Climate Change And Rise Fall Of Civilizations Brian M Fagan

The Great Warming Brian Fagan,2010-08-01 In this New York Times bestseller Brian Fagan shows how climate transformed and sometimes destroyed human societies during the earth's last global warming phase From the 10th to 15th centuries the earth experienced a rise in surface temperature that changed climate worldwide a preview of today's global warming In some areas including much of Western Europe longer summers brought bountiful crops and population growth that led to cultural flowering In others drought shook long established societies such as the Maya and the Indians of the American Southwest whose monumental buildings were left deserted as elaborate social structures collapsed Brian Fagan examines how subtle changes in the environment had far reaching effects on human life in a narrative that sweeps from the Arctic ice cap to the Sahara to the Indian Ocean The lessons of history suggest we may be yet be underestimating the power of climate change to disrupt our lives today

The Great Warming Brian M. Fagan,2008 From the 10th to the 15th centuries the earth experienced a rise in surface temperature that changed climate worldwide a preview of today's global warming In some areas including Western Europe longer summers brought bountiful harvests and population growth that led to cultural flowering In the Arctic Inuit and Norse sailors made cultural connections across thousands of miles as they traded precious iron goods Polynesian sailors riding new wind patterns were able to settle the remotest islands on earth But in many parts of the world the warm centuries brought drought and famine Elaborate societies in western and Central America collapsed and the vast building complexes of Chaco Canyon and the Mayan Yucatan were left empty Anthropologist and historian Brian Fagan reveals how subtle changes in the environment had far reaching effects on human life in a narrative that sweeps from the Arctic ice cap to the Sahara to the Indian Ocean From publisher description

Cro-Magnon Brian Fagan,2011-05-17 Cro Magnons were the first fully modern Europeans not only the creators of the stunning cave paintings at Lascaux and elsewhere but the most adaptable and technologically inventive people that had yet lived on earth The prolonged encounter between the Cro Magnons and the archaic Neanderthals between 45 000 and 30 000 years ago was one of the defining moments of history The Neanderthals survived for some 15 000 years in the face of the newcomers but were finally pushed aside by the Cro Magnons vastly superior intellectual abilities and cutting edge technologies What do we know about this remarkable takeover Who were these first modern Europeans and what were they like How did they manage to thrive in such an extreme environment And what legacy did they leave behind them after the cold millennia This is the story of a little known yet seminal chapter of human experience From publisher description

Climate Chaos Brian Fagan,Nadia Durrani,2021-09-21 A thirty thousand year history of the relationship between climate and civilization that teaches powerful

lessons about how humankind can survive Human made climate change may have begun in the last two hundred years but our species has witnessed many eras of climate instability The results have not always been pretty From Ancient Egypt to Rome to the Maya some of history s mightiest civilizations have been felled by pestilence and glacial melt and drought The challenges are no less great today We face hurricanes and megafires and food shortages and more But we have one powerful advantage as we face our current crisis the past Our knowledge of ancient climates has advanced tremendously in the last decade to the point where we can now reconstruct seasonal weather going back thousands of years and see just how people and nature interacted The lesson is clear the societies that survive are those that plan ahead Climate Chaos is a book about saving ourselves Brian Fagan and Nadia Durrani show in remarkable detail what it was like to battle our climate over centuries and offer us a path to a safer and healthier future

The Complete Ice Age Brian Fagan,2009-09-22 The Complete Ice Age covers a critical period in Earth s and humanity s history from two million years ago to the present day The authors explain how new scientific findings are revealing the adaptability and evolution of the human species Illustrated

Floods, Famines, and Emperors Brian Fagan,2009-02-10 In 1997 and early 1998 one of the most powerful El Ninos ever recorded disrupted weather patterns all over the world Europe suffered through a record freeze as the American West was hit with massive floods and snowstorms in the western Pacific meanwhile some island nations literally went bone dry and had to have water flown in on transport planes Such effects are not new climatologists now know the El Nino and other climate anomalies have been disrupting weather patterns throughout history But until recently no one had asked how this new understanding of the global weather system related to archaeology and history Droughts floods heat and cold put stress on cultures and force them to adapt What determines whether they adapt successfully How do these climate stresses affect a people s faith in the foundations of their society and the legitimacy of their rulers How vulnerable is our own society to climate change In this dazzlingly original new book archaeologist Brian Fagan shows that short term climate shifts have been a major and hitherto unrecognized force in history El Nino driven droughts have brought on the collapse of dynasties in Egypt El Nino monsoon failures have caused historic famines in India and El Nino floods have destroyed whole civilizations in Peru Other short term climate changes may have caused the mysterious abandonment of the Anasazi dwellings in the American Southwest and the collapse of the ancient Maya empire as well as changed the course of European history This beautifully written groundbreaking book opens a new door on our understanding of historical events

The Attacking Ocean Brian Fagan,2014-08-19 A history of climate change describes the dramatic evolution and stabilization of the oceans before the rise of humans approximately 6 000 years ago tracing a significant rise in global temperatures since 1860 and how a rising sea level is affecting world populations

The Long Summer Brian Fagan,2004-12-29 Humanity evolved in an Ice Age in which glaciers covered much of the world But starting about 15 000 years ago temperatures began to climb Civilization and all of recorded history occurred in this warm period the era known as the Holocene the long summer of the

human species In *The Long Summer* Brian Fagan brings us the first detailed record of climate change during these 15 000 years of warming and shows how this climate change gave rise to civilization A thousand year chill led people in the Near East to take up the cultivation of plant foods a catastrophic flood drove settlers to inhabit Europe the drying of the Sahara forced its inhabitants to live along the banks of the Nile and increased rainfall in East Africa provoked the bubonic plague The Long Summer illuminates for the first time the centuries long pattern of human adaptation to the demands and challenges of an ever changing climate challenges that are still with us today *The Little Ice Age* Brian Fagan,2019-11-26 Only in the last decade have climatologists developed an accurate picture of yearly climate conditions in historical times This development confirmed a long standing suspicion that the world endured a 500 year cold snap The Little Ice Age that lasted roughly from A D 1300 until 1850 The Little Ice Age tells the story of the turbulent unpredictable and often very cold years of modern European history how climate altered historical events and what they mean in the context of today s global warming With its basis in cutting edge science The Little Ice Age offers a new perspective on familiar events Renowned archaeologist Brian Fagan shows how the increasing cold affected Norse exploration how changing sea temperatures caused English and Basque fishermen to follow vast shoals of cod all the way to the New World how a generations long subsistence crisis in France contributed to social disintegration and ultimately revolution and how English efforts to improve farm productivity in the face of a deteriorating climate helped pave the way for the Industrial Revolution and hence for global warming This is a fascinating original book for anyone interested in history climate or the new subject of how they interact **Floods, Famines, and Emperors** Brian Fagan,2009-02-10 In 1999 few people had thought to examine the effects of climate on civilization Now due in part to the groundbreaking work of archaeologist Brian Fagan climate change is a central issue Revised and updated ten years after its first publication *Floods Famines and Emperors* remains the definitive account of how the world s best known climate event had an indelible impact on history *Fish on Friday* Brian Fagan,2009-08-12 Encompassing ancient mythology medieval religion boatbuilding commerce and cutting edge climate science this text shows the intricate tapestry of history in all its fascinating astonishing complexity [The Long Summer](#) Brian M. Fagan,2005 A fascinating look at how climate has challenged and shaped human history from the Ice Age to the Medieval era to the uncertain future **Clash of Cultures** Brian M. Fagan,1998 Brian Fagan investigates the impact that European contact had on a number of societies around the world Each case describes the pre European culture the short term impact of contact and the enduring changes caused by the clash of cultures **Fishing** Brian M. Fagan,2017-01-01 Before prehistoric humans began to cultivate grain they had three main methods of acquiring food hunting gathering and fishing Hunting and gathering are no longer economically important having been replaced by their domesticated equivalents ranching and farming But fishing humanity s last major source of food from the wild has grown into a worldwide industry on which we have never been more dependent In this history of fishing not as sport but as sustenance archaeologist and writer Brian Fagan argues that

fishing rivaled agriculture in its importance to civilization He tours archaeological sites worldwide to show how fishing fed the development of cities empires and ultimately the modern world Jacket flaps **Ancient Civilizations** Dr. Brian Fagan,Chris Scarre,2015-08-13 Drawing on many avenues of inquiry archaeological excavations surveys laboratory work highly specialized scientific investigations and on both historical and ethnohistorical records Ancient Civilizations 3 e provides a comprehensive and straightforward account of the world s first civilizations and a brief summary of the way in which they were discovered **Ancient Lives** Brian M. Fagan,2016-01-20 Theory and Methods in Archaeology and Prehistory Written for complete beginners in a narrative style Ancient Lives is aimed at introductory courses in archaeology and prehistory that cover archaeological methods and theory as well as world prehistory The first half of Ancient Lives covers the basic principles methods and theoretical approaches of archaeology The second half is devoted to a summary of the major developments of human prehistory the origins of humankind and the archaic world the origins and spread of modern humans the emergence of food production and the beginnings of civilization Learning Goals Upon completing this book readers should be able to Understand the basic principles of archaeology Summarize the major developments of human prehistory People of the Earth Brian M. Fagan,1998 This text offers a survey of human evolution from earliest times up to the advent of literate civilizations providing a view of human prehistory It also discusses advances in fossil discoveries the origins of modern humans and theories relating to food production Elixir Brian Fagan,2011-06-07 Elixir spans five millennia from ancient Mesopotamia to the parched present of the Sun Belt As Brian Fagan shows every human society has been shaped by its relationship to our most essential resource Fagan s sweeping narrative moves across the world from ancient Greece and Rome whose mighty aqueducts still supply modern cities to China where emperors marshaled armies of laborers in a centuries long struggle to tame powerful rivers He sets out three ages of water In the first age lasting thousands of years water was scarce or at best unpredictable so precious that it became sacred in almost every culture By the time of the Industrial Revolution human ingenuity had made water flow even in the most arid landscapes This was the second age water was no longer a mystical force to be worshipped and husbanded but a commodity to be exploited The American desert glittered with swimming pools with little regard for sustainability Today we are entering a third age of water As the earth s population approaches nine billion and ancient aquifers run dry we will have to learn once again to show humility even reverence for this vital liquid To solve the water crises of the future we may need to adapt the water ethos of our ancestors *The Collapse of Western Civilization* Naomi Oreskes,Erik M. Conway,2014-07-01 The year is 2393 and the world is almost unrecognizable Clear warnings of climate catastrophe went ignored for decades leading to soaring temperatures rising sea levels widespread drought and finally the disaster now known as the Great Collapse of 2093 when the disintegration of the West Antarctica Ice Sheet led to mass migration and a complete reshuffling of the global order Writing from the Second People s Republic of China on the 300th anniversary of the Great Collapse a senior scholar presents

a gripping and deeply disturbing account of how the children of the Enlightenment the political and economic elites of the so called advanced industrial societies failed to act and so brought about the collapse of Western civilization In this haunting provocative work of science based fiction Naomi Oreskes and Eric M Conway imagine a world devastated by climate change Dramatizing the science in ways traditional nonfiction cannot the book reasserts the importance of scientists and the work they do and reveals the self serving interests of the so called carbon combustion complex that have turned the practice of science into political fodder Based on sound scholarship and yet unafraid to speak boldly this book provides a welcome moment of clarity amid the cacophony of climate change literature Climate Change in Human History Benjamin Lieberman, Elizabeth Gordon, 2021-12-02 Climate Change and Human History provides a concise introduction to the relationship between human beings and climate change throughout history Starting hundreds of thousands of years ago and going up to the present day this book illustrates how natural climate variability affected early human societies and how human activity is now leading to drastic changes to our climate Taking a chronological approach the authors explain how climate change created opportunities and challenges for human societies in each major time period covering themes such as phases of climate and history climate shocks the rise and fall of civilizations industrialization accelerating climate change and our future outlook This 2nd edition includes a new chapter on the explosion of social movements protest groups and key individuals since 2017 and the implications this has had on the history of climate change an improved introduction to the Anthropocene and extra content on the basic dynamics of the climate system alongside updated historiography With more case studies images and individuals throughout the text the second edition also includes a glossary of terms and further reading to aid students in understanding this interdisciplinary subject An ideal companion for all students of environmental history Climate Change and Human History clearly demonstrates the critical role of climate in shaping human history and of the experience of humans in both adapting to and shaping climate change
