Take a trip through the defining moments of our global story see the thinkers, leaders, ideas, and inventions that have shaped

the world. Presented in a beautiful slipcase, *World History* is an essential guide for anyone who loves history or wants to broaden their knowledge. This accessible book covers over 350 of the world's most important turning points, from our earliest human ancestors of prehistory to political events of the modern world. Follow detailed maps showing the continuous movement of humans across the Earth, and examine fascinating paintings illustrating the events and individuals that took them there. Beautiful photography throughout the book will carry you back in time to see the people and places of the stories - along with stunning artifacts from every historical period. From magnificent buildings like the Colosseum to magnificent words like "I have a dream!", this guide brings history's most significant events to life for every reader to discover and enjoy. E. H. Gombrich's *Little History of the World*, though written in 1935, has become one of the treasures of historical writing since its first publication in English in 2005. The Yale edition alone has now sold over half a million copies, and the book is available worldwide in almost thirty languages. Gombrich was of course the best-known art historian of his time, and his text suggests illustrations on every page. This illustrated edition of the *Little History* brings together the pellucid humanity of his narrative with the images that he would well have been in his mind's eye as he wrote the book. The hundreds of illustrations—most of them in full color—are not simple embellishments, though they are beautiful. They emerge from the text, enrich the author's intention, and deepen the pleasure of reading this remarkable work. For this edition the text is reprinted in a spacious format, flowing around illustrations that range from paintings to line drawings, emblems, motifs, and symbols. T

book incorporates freshly drawn maps, a revised preface, a new index. Blending high-grade design, fine paper, and classic binding, this is both a sumptuous gift book and an enhanced edition of a timeless account of human history. History books often consist of boring facts and stories that can bore even the most enthusiastic reader. Not with this book; discover the world of the world anew and get a basic understanding of the time and developments of historical periods. From the beginning of civilization and Alexander the Great to the First World War, this section takes you on an adventure through time to discover the most important moments in history and how they shaped the world of civilization today. From the dawn of civilization to the height of European power, over the birth, prosperities, and declines of empires on four continents, this world history book takes a fascinating journey through the most significant events in history and shows you the cultural achievements of people, countries, and civilizations long forgotten. Each area of the world has its own unique history, and you will learn the glory and downfalls of great empires and their leaders. Here is a short preview of what you will learn: An overview of the history of mankind Ancient history and their most important civilizations including the history of Egypt, the history of Greece, and the history of the Roman Empire Asian history that includes Japanese history, Chinese history, and Indian history Extensive European history from antiquity to modern times, Discover the history of England, the history of France, the history of Germany, and Russian history American history including pre-Columbian, the history of the Aztecs and Incas Civilization history and old empires at war United States history: American history including the rise of

United States and Civil War history The Development of the modern world from the Renaissance Italy to the Industrial Revolution Discover anew our ancient origins The history of colonialism World War I Prelude and Military History And more! This world history book for learners will give you an unhindered perspective of world history, and you will learn true cultures and understand the historical timeline of countries and areas. By reading this book, you can deepen your knowledge and you will be able to get an unbiased overview of events from the past so that today's cultures and current events make sense. World Past to World Present: A Sketch of Global History provides an unusually brief and present-focused treatment of human history beginning with the advent of agriculture and ending with considerable attention to world history developments since World War II. This accessible and concise text covers the real but selected history of the human experience. The book emphasizes the importance of contacts and exchanges among different cultures and economies up to contemporary globalization, and consistent attention is devoted to comparisons among major regional societies. The characteristics of agricultural, and later industrial, societies help establish a large framework within the text. Peter N. Stearns works to connect developments to contemporary global patterns and problems explicitly balancing major changes with significant continuities. Key features include: A "no-frills" approach to an expansive stretch of human history Encourages students to understand the importance of studying history by focusing on aspects of the past that are particularly useful in assessing the current state of the world Invites instructors to combine the advantages of systems

summary coverage with varied supplementary reading. Nine illustrations illustrate important movements and civilizations throughout the world. Truly international in coverage, this book has been specifically designed as a core text for Global History survey courses. Chart the course of history through the ages with a collection of oversize foldout charts and timelines. Timeline World History is a unique work of visual reference from the founders of the Useful Charts website that puts the world's kingdoms, empires, and civilizations in context with one another. A giant wall chart shows the timelines and key events for each region of the world, and four additional foldout charts display the history of the Americas, Europe, Asia and the Pacific, and Africa and the Middle East. Packed with maps, diagrams, and images, this book captures the very essence of our shared history. The past is not just, as has been famously said, another country with foreign customs: it is a contested and colonized terrain. Indigenous histories have been expropriated, eclipsed, some even wholly eradicated, in the service of imperialist aims buttressed by a distinctly Western philosophy of history. Ranajit Guha, perhaps the most influential figure in postcolonial and subaltern studies at work today, offers a critique of such historiography by taking issue with the Hegelian concept of World-history. That concept, he contends, reduces the course of human history to the amoral record of states and empires, wars, men and clashing civilizations. It renders invisible the quotidian experience of ordinary people and casts off all that came before into the nether-existence known as "Prehistory." On the Indian subcontinent, Guha believes, this Western way of looking at the past was so successfully insinuated by British colonization

few today can see clearly its ongoing and pernicious influence. He argues that to break out of this habit of mind and go beyond the Eurocentric and statist limit of World-history historians should learn from literature to make their narratives doubly inclusive: to extend them in scope not only to make room for the pasts of the so-called peoples without history but to address the historicity of everyday life as well. Only then, as Guha demonstrates through an examination of Rabindranath Tagore's critique of historiography, can we recapture a more fully human past of "experience and wonder." An illustrated record covering all the major events and achievements in human history. Designed for history aficionados, trivia buffs, or anyone with a curious mind, *Timelines of World History* takes an innovative approach to the traditional, text-driven style of a date-by-date chronology. Tracing the progress of humanity from the dawn of history to the present day, the book follows major historical events, cultural milestones, the expansions of empires, and inventions and achievements of civilizations. Important events are cross-referenced with specific dates, important historical figures are profiled, and introductory essays profile what was happening and why. With more than 500 photographs and illustrations and over 25 maps, this is the most authoritative visual chronological record of the last 20,000 years. A truly global account of World War I, the war that encompassed six continents. Discover how the modern world came to be with this easy-to-follow and up-to-date history companion. Want to get a taste of the entirety of human history in a single book? With *World History For Dummies*, you get an overview of the history of, well, everything, from the Neanderthal experience to the latest historical developments.

the 21st century. Re-live history from your armchair as you go into battle alongside Roman generals, prepare Egyptian pharaohs for the afterlife, and learn from the great Greek poets and philosophers. Written in the easy-to-digest style the For Dummies series is famous for, you'll discover: How religion, philosophy, and science shaped, and were shaped by, the great figures of history The human consequences of warfare, from historical battles to more modern conflicts from the 20th century World War I influencing events in the 21st century, from climate change to political regimes and economies World History For Dummies is the perfect gift for the lifelong learner who wants to brush up on world history knowledge. It's also an indispensable resource for AP World History students looking for a supplemental reference to help them with their studies. Annotation World History: Cultures, States, and Societies to 1500 offers a comprehensive introduction to the history of humankind from prehistory to the present. Authored by six USG faculty members with advanced degrees in World History, this textbook offers up-to-date original scholarship and covers such cultures, states, and societies as Ancient Mesopotamia, Ancient Israel, Dynastic Egypt, India's Classical Age, the Dynasties of China, Archaic Greece, the Roman Empire, Islam, Medieval Africa, the Americas, and the Khanates of Central Asia. It includes 350 high-quality images and maps, chronologies, and learning questions to help guide student learning. Its digital nature allows students to follow links to applicable sources and videos, expanding their educational experience beyond the textbook. It provides a new and free alternative to traditional textbooks, making World History an invaluable resource in our modern age of technology and

advancement. Building on *A People's History of the United States*, this radical world history captures the broad sweep of human history from the perspective of struggling classes. *A* "indispensable volume" on class and capitalism throughout the ages—for readers reckoning with the history they were taught as history as it truly was (Howard Zinn) From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men," of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In this fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. A vital corrective to traditional history, *A People's History of the World* is essential reading for anyone interested in how society has changed and developed, and the possibilities for further radical progress. *Methods in World History* is the first international volume that systematically addresses a number of methodological problems specific to the field of World History. Prompted by a lack of applicable works, the authors advocate a considerable sharpening of the tools within the discipline. Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions, and

propping up other, more ideological constructions. The dedicated critical approach outlined in this volume helps to mitigate such risks. Each essay addresses a particular issue, discussing its problems, giving practical examples, and offering solutions and ways of overcoming the difficulties involved. The perspectives varied, the criticism focussed, and a common theme of coalescence is maintained throughout. This unique anthology will be of great use to advanced scholars of World History, and students entering the field for the first time. Now updated.

personal tour guide to the history of the world Want to know about global history? This concise guide explains in clear detail all the major players and events that have made the world we live in today. Covering the entirety of human history, this comprehensive resource highlights important developments in everything from religion and science to art and war — giving you an understanding of how the 21st-century world came to be.

Begin to connect with the past — label the eras as you meet the Neanderthals, home in on Homer, raise Atlantis, and preserve the Pharaohs Find strength in numbers — trace the growth from ancient civilizations to today's global community and discover what makes societies succeed or fail Discover the impact of new thought — explore the rise of religion, the roots of philosophy, the advance of science — and how our feelings and beliefs have continually redefined us Know the global consequences of war ride with the Greeks and the Romans, arm yourself with the cavalry, dig the trenches, and follow the paths humans took to wage modern war Meet the movers and shakers — from great leaders and courageous revolutionaries to ruthless tyrants and unsung heroes Examine significant events of the 21st century

from 9/11 and the Afghanistan and Iraq wars to climate change, Hurricane Katrina, and the economic rise of China, India, and Brazil. Open the book and find: A detailed overview of historical development of the world's religions. Reviews of essential historical documents, from the Bible to the Bill of Rights. The invention of writing and art. Scientific developments that revolutionized the world. Capsule biographies of people who changed history — and a few who were changed by it. Ten unforgettable dates in world history.

World History: An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present. A concise and original guide to the concepts, methods, debates, and contents of world history, it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections between the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the last five centuries? And at the same time, has the world become more interconnected — "globalized"? How is this world characterized by growing global wealth, poverty and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single all-encompassing narrative: an instructive new way of seeing,

thinking and doing. It is an essential resource for students of world history in a global context. This wide-ranging dictionary contains a wealth of information on all aspects of history, from prehistory right up to the present day. Over 4,000 clear, concise entries include biographies of key figures in world history (living and dead), separate entries for every country in the world (summarising key historical events), and in-depth entries on religious and political movements, international organizations and major conflicts and events and their after-effects. For this new edition, existing entries have been revised and updated to reflect the very latest global events including changes in leadership, wars, political situations, and the statistical information given for each country (population counts, current languages, religions). New entries have been included for key figures who have recently come to prominence and world events. The book also contains twenty-five detailed maps linked to historical events and topics. These include the African slave trade, the Black Death, and the Normandy campaign. Also included are over 200 country maps. The dictionary is enhanced by entry-level web links which are accessed via a dedicated companion website. Encyclopedic in scope, this ambitious A-Z provides an excellent overview of world history both for students and anyone with an interest in the subject. How empires have used diversity to shape the world order for more than two millennia. Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. *Empires in World History* departs from conventional European and nation-centered perspectives to offer a remarkable look at how empires relied on diversity to shape

global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Ja Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, *Empires of World History* offers a fresh approach to understanding the impact of empires on the past and present. It's the revolutionary science study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace Science . . . takes readers from scientific investigation and the engineering design process to the Periodic Table; forces and motion; forces and energy; outer space and the solar system; to earth science, biology, body systems, ecology, and more. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only book you need for

main subject taught in middle school: Math, Science, American History, English Language Arts, and World History. Inside the reader will find every subject's key concepts, easily digested and summarized: Critical ideas highlighted in neon colors. Definitions explained. Doodles that illuminate tricky concepts. A highlighter marker. Mnemonics for memorable shortcuts. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and social studies standards, and are vetted by National and State Teachers of the Year Award-winning teachers. They make learning fun and are the perfect next step for every kid who grew up on the Big Fat Notebook Quest. With its global approach, this notable book highlights major developments in the history of the world, and shows how different civilizations have encountered the forces of contemporary life. In presenting "the big picture" of global interactions of major civilizations, author Peter Stearns allows readers to glean a concise understanding of change and continuity across time. New to this edition are History Debates that offer information about topics currently under debate among historians, and more biographical highlights that detail the lives of everyday people at different times in history. Fresh, exciting, and vividly readable, this is popular history at its very best. As our understanding of world history is changing, as new discoveries are made on all the continents and old prejudices are being challenged. In this truly global journey, political journalist Andrew Marr revisits some of the traditional epic stories, from classical Greece and Rome to the rise of Napoleon, but surrounds them with less familiar material, from Peru to the Ukraine, and to the Caribbean. He looks at cultures that have failed and

vanished, as well as the origins of today's superpowers, and surprising echoes and parallels across vast distances and eras. A History of the World is a book about the great change-makers of history and their times, people such as Cleopatra, Genghis Khan, Galileo and Mao, but it is also a book about us. For 'to better we understand how rulers lose touch with reality, or how revolutions produce dictators more often than they produce happiness, or why some parts of the world are richer than others, the easier it is to understand our own times.' A history of the world from the stone age to the World War I From the dawn of civilization to the height of European power, over the birth, prosperities, and declines of empires on four continents, this compact world history book takes a fascinating journey through the most significant events in history and shows you the accomplishments of people, countries, and civilizations long forgotten. Discover the history of the world anew, and get a new understanding of the times and the developments of historical periods. Each area of the world has a unique history, and you will learn the glory and downfalls of great empires and their leaders. This world history book for learners will give you an unhindered perspective of world history. through this book you will learn about true cultures and understand the historical timeline of countries and areas. Here is a Sneak Peek of What you will Learn: Ancient History Antiquity including the history of Egypt, Greece, and Rome A Complete History of Europe until WW1 Asian History including the history of China, India, and Japan Pre-Columbian History American History The development of the most important civilizations of mankind From the collapse of empires to the rise of decolonized nation-states on the global stage. A chronology

narrative of the recent past and a valuable historical stand from which to view the twenty-first century world. University Press returns with another short and captivating story - a history of The World. Any summary of world history is bound to be laughably crude and incomplete. Even multi-volume or semester-long attempts to distill the innumerable events of our watery planet fail to capture the fullness and depth of the story. But this is no reason to abandon the pursuit of historical knowledge. History is a story. It grants us access to the laboratory of human experience. It helps us understand people, societies, and our connections to them. It contributes to ethical and moral understanding. History teaches us how the world works. This world history book is shorter than most and, therefore, it is even cruder and more incomplete than most. If you have the time to read a multi-volume history of the world, I recommend that you do. But in the meantime, this short book is an abbreviated version of the unlikely story of the forces, events, and people that have changed the world - a version that you can read in about an hour. Presents a history of the world from ancient civilizations of the Middle and Far East to the modern world of the late twentieth century. Includes maps and illustrations. The first comprehensive overview of the innovative new discipline of global history. Until very recently, historians have looked at the past with the tools of the nineteenth century. But globalization has fundamentally altered our ways of knowing, and it is no longer possible to study nations in isolation or to understand world history as emanating from the West. This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history—one that takes

connectedness of the world as its point of departure, and poses a fundamental challenge to the premises and methods of world history as we know it. *What Is Global History?* provides a comprehensive overview of this exciting new approach to history. The book addresses some of the biggest questions the discipline will face in the twenty-first century: How does global history differ from other interpretations of world history? How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism? How can historians connect different societies and establish compatibility across space and time? What are the politics of global history? This in-depth and accessible book also explores the limits of the new paradigm and even the dangers, the question of whom global history should be written for, and much more. Written by a leading expert in the field, *What Is Global History?* shows how, by understanding the world's history as an integrated whole, historians can remap the terrain of the discipline for our globalized present. This book makes a unique and timely contribution to world/global historical studies and related fields. It places essential world historical frameworks of top scholars in the field today in clear, direct relation to an ongoing conversation with one another, offering them opportunity to elucidate and, at times, challenge one another. It thereby aims to (1) offer world historians opportunity to critically reflect upon and refine their essential interpretational frameworks, (2) facilitate more effective and nuanced teaching and learning of world history and beyond the classroom, (3) provide accessible world history contexts for specialized areas of historical as well as other research in the humanities, social sciences and sciences, and (4) promote comparative historiographical critique which (a)

helps identify continuing research questions for the field of history in particular, as well as (b) further global peace and dialogue in relation to varying views of our ever-increasingly interconnected, interdependent, multicultural, and globalized world and its shared though diverse and sometimes contested history. A comprehensive history of our world, from the dawn of human history to the present day. Learn why the world is the way it is. Finally, there is a guide to world history that is condensed enough to be readable and entertaining, but broad and substantial enough to cover all of the major events and periods. Howard Colvin's WORLD HISTORY masterfully lays out the entire story of humanity and the planet we all share in a single authoritative book. This book has been extensively researched and includes some of the newest research and discoveries, as well as the revolution in how we now understand many ancient civilizations. No one does history better than Colvin, and in this book he has skillfully distilled an eminently readable account of the entirety of human history. Be better informed about the world including: Ancient Greek Civilization Alexander the Great Ancient Egypt The Roman Empire Christianity and Constantine Prehistoric India Ancient India's Great Empires The Rise of Islam Korean Dynasty The Reign of Napoleon Bonaparte The Bolshevik Revolution American history including The American Revolution The War of 1812, and The Civil War Captain James Cook World War I and II Vietnam War Birth of the United Nations The Space Race The Cuban Missile Crisis North Korea - the last Communist State Economic Progress in Communist Countries Perestroika and Glasnost The End of the Cold War THE ERA OF MEDICAL DEVELOPMENT THE INTRODUCTION OF THE INTERNET

WHAT DOES THE FUTURE HOLD? And much more! Don't miss out! Impress the people you know with your broad knowledge of history and the world. Understand why things are the way they are. Connect with the wisdom, victories, and struggles of humanity throughout the rise and fall of empires and civilizations. Grab this book today and truly understand the history of the world. It's the revolutionary world history study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace World History . . . starts off with the Paleolithic Era and transports the reader to ancient civilizations—from Africa and beyond; the middle ages across the world; the Renaissance; the age of exploration and colonialism; revolutions, and the modern world and the wars and movements that shaped it. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is only one book you need for each main subject taught in middle school: Math, Science, American History, English, and World History. Inside the reader will find every subject's key concepts easily digested and summarized: Critical ideas highlighted in marker colors. Definitions explained. Doodles that illuminate tricky concepts. Mnemonics for a memorable shortcut. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award-winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest. 2000 Years of World History is a new presentation of the history of the world. The history of the

civilizations is told in one continuous run with minimum emphasis on the separation of nations. National histories serve the needs of individual nationals. American history deals with those events considered significant to America, and likewise French history focuses on those that have meanings to the French. However, studying the histories of the Americans, the French, and others does not equate with studying the history of the world. No country is an island. Past events of a country, its history, were intrinsically interwoven with those of other countries, be it through cultural exchange (the spreading of the knowledge of paper-making, use of gun powder, etc.), diplomatic intercourse (evangelizing of religions, the opening of Japanese ports by Matthew C. Perry, etc.), or conflict (no example needs to be given). National histories, because of their preoccupation with national interests, often place secondary emphasis on events beyond that scope, and that can lead to bias; bias in the sense that our understanding of such events can take on a skewed perspective. This prejudice can further be slanted due to nationalism. That is the root of the Walter Benjamin quote: "History is written by the victors." The writers of national histories tend to shine their nations in good light. That leads to the coloring of good and evil, and right or wrong. The fact is, historical events should not be understood in such moralistic terms. They should be presented as facts—not even interpretations of facts, but facts based on evidence. We should let the historians draw their own conclusions on these events of the past and make their own moral determination, rather than imposing on them our notion of moral values. An example would be the ongoing conflict in Syria. The United States is backing the rebels,

against the Syrian government, and the president of Syria, Hafez al-Assad, is branded a monster. He kills his own people should be brought to trial as a war crime offender. These are judgment-loaded assertions. If one were to read pro-Syria reporting, one would get a completely opposite sense. The government is battling rebels, who are Syrians. Therefore, the Syrian government is of course killing its own people. By siding with the rebels, who are thus anointed as being on the right, the Syrian government is naturally cast as the villain. However, the Syrian government was in place before the challenge of the rebels. Does it not have the right to defend itself, or do we expect the Syrian government to lay down its arms and proclaim, "we have learned from the Americans that we are the bad guys, we now surrender and make room for the good guys"? History with a world view allows us to take a bird's-eye view of international events. If we were to do that with the Syrian war, we would be instead focusing on the involvements of not just Syria and USA, but Iraq, Turkey, the Kurds, Russia, and Iran, and Israel, each having its interests at stake. We will quickly shed attachment to the notions of good vs. evil and who is right and who is wrong. Extant history, often that which is taught in classrooms, is fraught with such moralistic proselytizing, and distracts from our attempt to understand what happened in the past and learn from it. These involve issues of ethnicity, culture, and even definitions of nations. An example would be the long history of Egypt. The Egypt of today is not the Egypt of 2,000 years ago. The old Egypt is dead. Its language is no longer spoken. Its customs are no longer practiced. It therefore arouses a feeling of incongruity when the Egyptian cultural minister

the phrase "our heritage." 2000 Years of World History attempts to present history in a renewed light. Follow-up volume: 2000 Years of World History BCE (How we came to be.) A survey of the major events, developments, and personalities that have shaped human history. Making Sense of World History is a comprehensive and accessible textbook that helps students understand the key themes of world history within a chronological framework stretching from ancient times to the present day. To lend coherence to its narrative, the book employs a set of organizing devices that connect times, places, and themes. This narrative is supported by: Flowcharts that show how phenomena within diverse broad themes interact in general key processes and events in world history. A discussion of common challenges faced by different types of agent, including rulers, merchants, farmers, and parents, and a comparison of how these challenges were addressed in different times and places. An exhaustive and balanced treatment of themes such as culture, politics, and economy, with an emphasis on interaction. Explicit attention to skill acquisition in organizing information, cultural sensitivity, comparison, visual literacy, integration, interrogating primary sources, and critical thinking. A focus on historical "episodes" that are carefully related to each other. Through the use of such devices, the book shows the cumulative effect of thematic interactions through time, communicates many ways in which societies have influenced each other throughout history, and allows us to compare and contrast how they have reacted to similar challenges. They also allow the reader to transcend historical controversies and can be used to stimulate class discussions and guide student assignments. With a unifying

authorial voice and offering a narrative from the ancient to present, this is the go-to textbook for World History course students. The Open Access version of this book has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. "A new series from respected educator Dr. James Stobaugh that takes you on a journey through history without the filters of revisionist or Christian perspectives. This book is designed for a year's worth of study; 34 powerful weeks of historical viewpoints. A summertime stage for learning so the student can enjoy a daily lesson of thought-provoking questions, and an exam that takes place on the fifth day ... Historical content covered in this volume includes the following: Mesopotamia, the Jewish Exile, Egyptian Life, Greek Life in Athens, Roman Life, Early Church History, Japanese History, Indian (South Asian) History, Persian History, Chinese History, the Middle Ages, the Crusades, the Renaissance, the Reformation, German History, the World Wars, and South Africa"--Page 4 of cover. Starting with Christopher Columbus's momentous journey across the Atlantic to the Americas in 1492, this chronology covers the period in world history in which Europeans established their first permanent colonies around the world. It concludes with the Continental Congress extending the so-called Olive Branch Petition to King George III of Great Britain in a final attempt to avert the American Revolution. During this period Europe saw the Protestant Reformation and numerous wars, especially the destructive 30 Years' War of 1618-48, while the Islamic world extended its borders and made outstanding technological and economic advances.
