A Self Help Guide to Antiterrorism Dec 26 2022 The men and women who serve in the Department of Defense (DoD), together with their family members, are our most vital resource. As recent events have shown, terrorists have reached new levels of organization, sophistication, and violence, often targeting DoD personnel and their families. Their tactics and techniques are always changing and will continue to be a challenge to predict and neutralize.

Accordingly, we must remain diligent in applying the proper protective measures. Use of this guide and these proven security habits will not ensure immunity from terrorist attacks but should reduce the possibility of becoming a target. Defensive awareness and personal security are responsibilities of everyone assigned to DoD. Your overall awareness will not only help to protect your family but will also increase the security of all members of the military family. This guide is designed to assist in making you and your family less vulnerable to terrorists. It is important that you ensure all members of your family are made aware of this valuable information so they not only protect themselves, but also become an integral part of the overall community anti terrorism effort. Constant awareness will help protect all members of the military family from acts of terrorism.

**Department of Defense (Dod) Cloud Computing Security Requirements Guide (Srg)** Feb 25 2023 Cloud computing technology and services provide the Department of Defense (DoD) with the opportunity to deploy an Enterprise Cloud Environment aligned with Federal Department-wide Information Technology (IT) strategies and efficiency initiatives, including federal data center consolidation. Cloud computing enables the Department to consolidate infrastructure, leverage commodity IT functions, and eliminate functional redundancies while improving continuity of operations. The overall success of these initiatives depends upon well executed security requirements, defined and understood by both DoD Components and industry. Consistent implementation and operation of these requirements assures mission execution, provides sensitive data protection, increases mission effectiveness, and ultimately results in the outcomes and operational efficiencies the DoD seeks. The 15 December 2014 DoD CIO memo regarding Updated Guidance on the Acquisition and Use of Commercial Cloud Computing Services defines DoD Component responsibilities when acquiring commercial cloud services. The memo allows components to responsibly acquire cloud services minimally in accordance with the security requirements outlined in Federal Risk and Authorization Management Program (FedRAMP) FedRAMP and this Security Requirement Guide (SRG). DISA previously published the concepts for operating in the commercial cloud under the Cloud Security Model. Version 1 defined the overall framework and provided initial guidance for public data. Version 2.1 added information for Controlled Unclassified Information. This document, the Cloud Computing Security Requirements Guide (SRG), documents cloud security requirements in a construct similar to other SRGs published by DISA for the DoD. This SRG incorporates, supersedes, and rescinds the previously published Cloud Security Model.

Us Department of Defense Oct 04 2023 This is the first edition of a DoD Extension to the Project Management Institute's 2000 Guide. It identifies and describes defense applications of the core project management knowledge areas contained in the PMBOK Guide, as well as those defense-intensive knowledge areas not contained in the Guide. It is important to understand that this is an extension to the PMBOK Guide, and is not intended to be a stand-alone document. The PMBOK Guide is a valuable document in its own right and its principles need to be understood and practiced by DoD Program Managers. This Extension generally follows DoD acquisition system policies and procedures. However, many of the concepts are generic to defense acquisition worldwide. Charts and tables.

*Human Capital* Nov 12 2021 "Why GAO Did This StudyDOD is in large part dependent on theskills and competencies of civilianpersonnel comprising almost 800,000FTE positions. Between fiscal years2002 and 2012, DOD's budgetedcivilian personnel costs increased byabout 21 percent, to about \$72 billion.In fiscal year 2010, the then-Secretaryof Defense directed the Office of theSecretary of Defense and otherheadquarters commands to freeze (orcap) the number of civilian FTEs at thefiscal year 2010 level for fiscal years2011-13. During fiscal year 2011, heextended the cap to the militaryservices for fiscal years 2012-13 andgranted exceptions adjusting the capsabove fiscal year 2010 levels. Asrequested, GAO determined (1) themilitary services' progress in meetingadjusted civilian workforce cap targetsfor fiscal year 2012 and associatedsavings and (2) steps DOD has taken to help ensure that, in implementingthe cap, it has maintained critical skillsand competencies for its civilianworkforce. GAO limited its focus toU.S. civilian direct-hire employees(not, for example, foreign nationalemployees) and to service efforts tomeet cap levels in fiscal year 2012.GAO reviewed DOD's efficiencyguidance and analyzed service fiscalyear 2010-12 budget information.What GAO RecommendsGAO recommends that DOD involvefunctional community managers anduse information from its critical skill andcompetency gap assessments as theyare completed to make informed"

**Defense Infrastructure** Oct 24 2022 The Department of Defense (DOD) relies on a network of DOD and non-DOD infrastructure assets in the United States and abroad so critical that its unavailability could hinder DOD's ability to project, support, and sustain its forces and operations worldwide. DOD established the Defense Critical Infrastructure Program (DCIP) to identify and assure the availability of mission-critical infrastructure. GAO was asked to evaluate the extent to which DOD has (1) developed a comprehensive management plan to implement DCIP and (2) identified, prioritized, and assessed its critical infrastructure. GAO analyzed relevant DCIP documents and guidance and met with officials from more than 30 DOD organizations that have DCIP responsibilities, and with Department of Homeland Security (DHS) officials involved in protecting critical infrastructure.

Congressional Involvement and Relations: A Guide for Department of Defense Program Managers Feb 01 2021 To function properly and be successful, the Department of Defense weapon system acquisition program manager must first understand Congress as an institution, its role in governing, its objectives and how it operates. Second, he must learn the system through which his program is approved, funded and monitored by Congress. Third, he must appreciate the relationship Congress has with DOD and work within the framework of that relationship to manage his program. This Guide is written to assist program managers in achieving the necessary understanding of congressional involvement and relations with DOD. Other DOD officials who work in acquisition also may find it useful. It describes how Congress is organized and structured to carry out its two major responsibilities in dealing with DOD: The legislative process and The oversight function.

**Information technology architecture needed to guide modernization of DOD's financial operations.** Mar 29 2023 To correct its long-standing and pervasive financial management weaknesses, the Department of Defense (DOD) plans to invest billions of dollars to modernize its financial management operations and supporting systems. Effectively managing such a large and complex endeavor requires, among other things, a well-defined and enforced blueprint for operational and technological change, commonly referred to as an enterprise architecture. Such an architecture provides a clear and comprehensive picture of an entity, whether it is an organization (e.g., federal department, agency, or bureau) or a functional or mission area that cuts across more than one organization (e.g., financial management or combat identification 1). This picture consists of three integrated components: a snapshot of the enterprise's current operational and technological environment, a snapshot of its target environment, and a capital investment road map for transitioning from the current to the target environment. The use of enterprise architectures is a best practice in information technology (IT) management followed by leading public and private organizations and is required by the Clinger-Cohen Act of 1996, the Office of Management and Budget (OMB), and DOD. 2 Our experience with federal agencies has shown that attempting a major modernization effort without a complete and enforceable enterprise architecture results in systems that are duplicative, are not well integrated, are unnecessarily.

**Dod Security Clearances and Contracts Guidebook-What Defense Contractors Need to Know about Their Need to Know** Jan 27 2023 It's tough to focus on both creating a company to last and performing under strict government guidelines. Getting classified contracts, requesting security clearances and remaining compliant are all vital to a cleared contractor's success. But... Just one mistake can cost a defense contractor current and future work. Until now, there has been no one place to find everything you need to know about security clearances. Many defense contractors and employees don't understand how to get their clearances and compete for classified work. The DoD Security Clearance and Contracts Guidebook brings together information from Presidential Executive Orders, National Industrial Security Program Operating Manual (NISPOM), International Traffic in Arms Regulation (ITAR) and other regulations to demonstrate how to establish and maintain a successful security program. Whether you are part of a business or an employee, this book will demonstrate both the security clearance process and how to perform on classified contracts. Follow our blog: <http://www.dodsecurity.blogspot.com/> Jeff wrote this book with you in mind. He specifically addresses the requirements of defense contractors operating under the Department of Defense oversight. Other than government regulations, there are few published books addressing security clearances. DoD Security Clearances and Contracts Guidebook provides answers to what it takes to get a clearance or prepare for work on classified contracts. It will assist the college student studying industrial security or homeland security, upstart companies looking for work, and new industrial security employees with understanding the fundamental demands of a career in Industrial Security. What can be more important than protecting our Nation's secrets? Situations and questions throughout the book are designed to help improve understanding of the NISPOM. In fact, many Facility Security Officers and industrial security professionals face similar situations as they help to safeguard our nation's secrets. This book can also help prepare the reader for the Industrial Security Professional (ISP) certification exam or the DoD's SPeD security certification exam. The DoD Security Clearance and Contracts Guidebook helps cleared contractors understand the security clearance process and develop award winning security programs to win and keep classified contracts. It is a good companion for all seasoned and novice defense contractors, Facility Security Officers (FSO) and the college student. With the DoD Security Clearance and Contracts Guidebook, Defense contractors now have a resource to confidently pursue classified contracts. This book is complete with: Step by step guide demonstrating how to meet requirements for security clearances Description of senior leader responsibilities in

security cleared facilities Comprehensive list Of Cleared contractor administrative responsibilities Method for reducing costs associated with protecting classified information and NISPOM requirements Description of award winning FSO qualities

**Defense Space Activities** Dec 06 2023 The U.S. depends on space assets to support nat. security activities as well as civil and commercial activities. The DoD depends on space assets to support a wide range of military missions to include intelligence collection; battlefield surveillance and mgmt.; global command, control, and communications; and navigation assistance. This report reviews the acquisition and requirements process of the DoD's Operationally Responsive Space concept. The objective was to determine the extent to which DoD and the intelligence community have developed, agreed upon, and issued a National Security Space Strategy. This performance audit was conducted from June 2007 through March 2008. Illustrations.

**How To Prepare Defense-Related Scientific and Technical Reports** Jul 01 2023 This book provides thorough and specific guidance on how to prepare defense-related scientific and technical reports, including classified scientific and technical reports. It includes an appendix describing the workings of the Defense Technical Information Center, the central repository for defense-related scientific and technical reports, and an appendix addressing tone and style, including pertinent information from the United States Government Printing Office Style Manual 2000, the official style guide of the U.S. Government and, therefore, the Department of Defense. Every facet of preparing defense-related scientific and technical reports is addressed, thereby making it unnecessary for the user to have to refer to the standards and numerous regulations pertaining to this subject. In effect, the book provides "one-stop shopping" for the user. Also, some of the official guidance on preparing defense-related scientific and technical reports requires interpretation, and in those cases the book provides a prudent analysis of that information and prescribes a "best practices" course for the user.
