Nickel and Dimed Barbara Ehrenreich,2010-04-01 The New York Times bestselling work of undercover reportage from our sharpest and most original social critic with a new foreword by Matthew Desmond author of *Evicted* Millions of Americans work full time year round for poverty level wages In 1998 Barbara Ehrenreich decided to join them She was inspired in part by the rhetoric surrounding welfare reform which promised that a job any job can be the ticket to a better life But how does anyone survive let alone prosper on 6 an hour To find out Ehrenreich left her home took the cheapest lodgings she could find and accepted whatever jobs she was offered Moving from Florida to Maine to Minnesota she worked as a waitress a hotel maid a cleaning woman a nursing home aide and a Wal Mart sales clerk She lived in trailer parks and crumbling residential motels Very quickly she discovered that no job is truly unskilled that even the lowliest occupations require exhausting mental and muscular effort She also learned that one job is not enough you need at least two if you int to

live indoors Nickel and Dimed reveals low rent America in all its tenacity anxiety and surprising generosity a land of Big Boxes fast food and a thousand desperate stratagems for survival Read it for the smoldering clarity of Ehrenreich s perspective and for a rare view of how prosperity looks from the bottom And now in a new foreword Matthew Desmond author of Evicted Poverty and Profit in the American City explains why twenty years on in America Nickel and Dimed is more relevant than ever Guiding Students Into Information Literacy Chris Carlson, Ellen Brosnahan, 2009 Teachers often assume students know how to do research However most students lack important information literacy skills and often need guidance in order to be successful researchers Sometimes the research projects students are assigned are not well devised or planned and teachers often underestimate the amount of time or effort necessary to complete a project These difficulties soon become compounded because students often have poor organizational and time management skills which are essential in producing good research projects The desire to make the research experience pleasant and worthwhile for students and the teacher who must assess their efforts has led authors Chris Carlson and Ellen Brosnahan to devise a logical system to help students not only gain valuable information literacy and time management skills needed but also to help the instructor have a better handle on what students are doing during the process Information Literacy takes readers systematically through the management of a research activity from conception to final product Each chapter includes handouts that have been used by the authors with actual research assignments websites for further information and a bibliography of additional books that support the ideas in the chapter An appendix with examples of research papers that have been done by the authors actual students is also included
