A Prehistory of the Cloud Tung-Hui Hu, 2015-08-21 The militarized legacy of the digital cloud how the cloud grew out of older network technologies and politics We may imagine the digital cloud as placeless mute ethereal and unmediated Yet the reality of the cloud is embodied in thousands of massive data centers any one of which can use as much electricity as a midsized town Even all these data centers are only one small part of the cloud Behind that cloud shaped icon on our screens is a whole universe of technologies and cultural norms all working to keep us from noticing their existence In this book Tung Hui Hu examines the gap between the real and the virtual in our understanding of the cloud Hu shows that the cloud grew out of such older networks as railroad tracks sewer lines and television circuits He describes key moments in the prehistory of the cloud from the game Spacewar as exemplar of time sharing computers to Cold War bunkers that were later reused as data centers Countering the popular perception of a new cloudlike political power that is dispersed and immaterial Hu argues that the cloud grafts digital technologies onto older ways of exerting power over a population But because we invest the cloud with cultural fantasies about security and participation we fail to recognize its militarized origins and ideology Moving between the materiality of the technology itself and its cultural rhetoric Hu s account offers a set of new tools for rethinking the contemporary digital environment

The Rules of Art Pierre Bourdieu,1996 Written with verve and intensity and a good bit of wordplay this is the long awaited study of Flaubert and the modern literary field that constitutes the definitive work on the sociology of art by one of the world s leading social theorists Drawing upon the history of literature and art from the mid nineteenth century to the present Bourdieu develops an original theory of art conceived as an autonomous value He argues powerfully against those who refuse to acknowledge the interconnection between art and the structures of social relations within which it is produced and received As Bourdieu shows art s new autonomy is one such structure which complicates but does not eliminate the interconnection The literary universe as we know it today took shape in the nineteenth century as a space set apart from the approved academies of the state No one could any longer dictate what ought to be written or decree the canons of good taste Recognition and consecration were produced in and through the struggle in which writers critics and publishers confronted one another
