Applied Discrete Structures Ken Levasseur,Al Doerr,2012-02-25 In writing this book care was taken to use language and examples that gradually wean students from a simpleminded mechanical approach and move them toward mathematical maturity We also recognize that many students who hesitate to ask for help from an instructor need a readable text and we have tried to anticipate the questions that go unasked The wide range of examples in the text are meant to augment the favorite examples that most instructors have for teaching the topics in discrete mathematics To provide diagnostic help and encouragement we have included solutions and or hints to the odd numbered exercises These solutions include detailed answers whenever warranted and complete proofs not just terse outlines of proofs Our use of standard terminology and notation makes Applied Discrete Structures a valuable reference book for future courses Although many advanced books have a short review of elementary topics they cannot be complete The text is divided into lecture length sections facilitating the organization of an instructor s presentation Topics are presented in such a way that students understanding can be monitored through thought provoking exercises The exercises require an understanding of the topics and how they are interrelated not just a familiarity with the key words An Instructor s Guide is available to any instructor who uses the text It includes Chapter by chapter comments on subtopics that emphasize the pitfalls to avoid Suggested coverage times Detailed solutions to most even numbered exercises Sample quizzes exams and final exams This textbook has been used in classes at Casper College WY Grinnell College IA Luzerne Community College PA University of the Puget Sound WA

The Production of Space Henri Lefebvre,1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher His work spans some sixty years and includes original work on a diverse range of subjects from dialectical materialism to architecture urbanism and the experience of everyday life The Production of Space is his major philosophical work and its translation has been long awaited by scholars in many different fields The book is a search for a reconciliation between mental space the space of the philosophers and real space the physical and social spheres in which we all live In the course of his exploration Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city He seeks in other words to bridge the gap between the realms of theory and practice between the mental and the social and between philosophy and reality In doing so he ranges through art literature architecture and economics and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy This is a work of great vision and incisiveness It is also characterized by its author s wit and by anecdote as well as by a deftness of style which Donald Nicholson Smith s sensitive translation precisely captures
