globalization from historical and institutional perspectives While it has had unintended consequences such as displacing developed countries dominance of production markets the overall benefits of globalization far outweigh the costs Moak argues that leading developed nations should not fear globalization but instead make concerted efforts to promote it in order to keep the cost benefit balance weighing in favor of economic enhancement and geopolitical stability Having incurred huge private and public debts as well as a weak monetary policy posture many developed nations have been unable to recovery from the 2008 financial crisis Moreover geopolitical tensions are rising due to the power rivalry between the United States China and Russia over a host issues including trade imbalances and geopolitics This book aims to provide stakeholders with the relevant and necessary information to hold an objective debate on globalization Ultimately this book is about globalization what it is how it impacts the global economy and polity and why it is needed now more than any other time in human history

*The Principles and Practice of International Aviation Law* Brian F. Havel, Gabriel S. Sanchez, 2014-03-31 The Principles and Practice of International Aviation Law provides an introduction to and demystification of the private and public dimensions of international aviation law Unlike other global sectors the air transport industry is not governed by a discrete area of the law but by disparate transnational regulatory instruments Everything from the routes that an international air carrier can serve to the acquisition of its fleet and its liability to passengers and shippers for incidents arising from its operations can be the object of bilateral and multilateral treaties that represent diverse and often contradictory interests Beneath this are hundreds of domestic regulatory regimes that also apply national and international rules in disparate ways The result is an agglomeration of legal cultures that can leave even experienced lawyers and academics perplexed By combining classical doctrinal analysis with insights from newer disciplines such as international relations and economics the book maps international aviation law s complex terrain for new and veteran observers alike

*Trade Liberalisation and Economic Development in Africa* Gift Mugano, 2021-09-30 This book provides a thorough and rigorous discussion on the impact of trade liberalisation on economic development with a special focus on the African continent The author presents the rationale for trade liberalisation trade liberalisation frameworks the trade liberalisation economic development nexus impediments to trade and contemporary issues of international trade In this book notwithstanding the benefits from trade liberalisation the author shows that African trade as a share of global trade has remained flat at 3% as in 1975 while the continent s exports have remained raw materials and its intra regional trade at less

than 15% of total trade which is the lowest in the world UNCTAD 2020 With respect to key economic development indicators such as economic growth poverty levels and employment levels this book shows that ironically and in direct contrast with the conventional views that trade liberalisation alleviates poverty trade liberalisation in Africa has resulted in high levels of unemployment and low economic growth which ultimately lead to increased poverty In addition this book provides a detailed analysis of why trade liberalisation has failed to yield meaningful benefits to Africa The binding constraints and blockages which prevent positive spin offs on trade liberalisation in Africa are discussed in detail in this book In the same vein the author provides practical strategies which must be adopted by African countries in order to gain from trade liberalisation making this work a must read for African governments academia trade experts regional trading blocs the World Trade Organization and development partners In view of this and as part of the disruptive and structural transformation policies the author discusses case studies and international experience contextualised to Africa as well as strategies for addressing the trade related infrastructure gap production capacities export promotion and aid for trade

**Alang Shipbreaking Industry—An Ecological Distribution Conflict** Stuti Haldar, Indira Dutta, 2017-07-21 The Alang Sosiya Shipbreaking industry is an important source of employment generation and has the potential of producing economic benefits in terms of mild steel and other reusable equipment furniture cutlery etc However there is a significant human and labour cost associated with this industry which has emerged as a more sinister

form of garbage imperialism for the third world Most of the heavy shipbreaking in the world takes place on the yards of developing nations such as India Bangladesh and Pakistan as the economic values dominate the market in these countries This volume offers valuable insights into the occupational and environmental health hazards faced by marginalized migrant labour working on the yards of Alang Sosiya It also paints a picture of the administrative and legislative loopholes regarding transboundary trade of wastes which has led to transition economies being treated as pollution heavens by the industrialised countries of the world The study endeavours to draw the attention of national and international organisations as well as civil societies towards the perilous nature of the shipbreaking industry in India and hence emphasises the need for policy reforms to pave way for a sustainable ship recycling process especially in the third world
