A 75th anniversary e-book version of the most important and practical self-help book ever written, Alcoholics Anonymous. Here is a special deluxe edition of a book that has changed millions of lives and launched the modern recovery movement: Alcoholics Anonymous. This edition not only reproduces the original 1939 text of Alcoholics Anonymous, but as a special bonus features the complete 1941 Saturday Evening Post article "Alcoholics Anonymous" by journalist Jack Alexander, which, at the time, did as much as the book itself to introduce millions of seekers to AA's program. Alcoholics Anonymous has touched and transformed myriad lives, and finally appears in a volume that honors its posterity and impact. This book argues for a contemporary primatology that recognizes humans as integral components in the ecologies of primates. This contemporary primatology uses a broadened theoretical lens and methodological toolkit to study primate behavior and ecology in increasingly anthropogenic contexts and seeks points of intersection and spaces for collaborative exchange across the natural sciences, social sciences, and humanities. The book begins by exploring the American tradition of anthropology, providing historical and disciplinary context for the emergence of field primatology and how it became a part of this tradition. It then examines how primatology transformed into a field dominated by evolutionary approaches and highlights how the increasingly anthropogenic environments in which primates live present opportunities to understand primate adaptability at work. In doing so, it explores how an extended evolutionary approach can help explain behavioral variation in these contemporary environments. Focus is then given to the ethnoprimateological approach, a contemporary approach that provides a pluralistic framework, drawing from the natural and social sciences and humanities, needed to study human-primate coexistence in the Anthropocene. Finally, the book considers how such a crossing of disciplines can inform primate conservation in the future. An important interdisciplinary reassessment, this book will be of significant interest to primatologists, biological anthropologists, and scholars of anthropology more generally, as well as evolutionary and conservation biologists. This thought-provoking collection of essays is essential reading for anyone who cares about cultural institutions and their role in the community of learners. These institutions—often museums or libraries—have the power to profoundly alter our sense of ourselves and of the world around us, but that power carries with it obligations. David Carr challenges us to contemplate both the effects and the responsibilities, to examine carefully the nuances of these experiences. Yet a visit to a cultural institution is itself only one act in the broader activity of learning throughout our lives. Carr has much to say about the experience of learning in its best sense and thus speaks not only to lovers of cultural institutions, but also to lovers of learning everywhere.
