Standard Catalog of Light-Duty Ford Trucks 1905-2002 John Gunnell, 2003-03-07 Nearly 100 years of Ford's pickups, panel trucks, sedan deliveries, vans, SUVs, and other light-duty work trucks are covered in this identification and value reference guide. Models are categorized according to year of manufacture and listed with prices in up to six condition grades. *Standard Catalog of Light Duty Ford Trucks 1905 2002* includes specifications, factory options, serial number explanations, production totals, and other useful facts for collectors and fans.

Making Choices about Hydrogen Lynn Krieger Mytelka, Grant Boyle, 2008 Since the mid 1990s, the emergence of a hydrogen economy and the speed with which it will arrive have been vigorously debated. As a disruptive technology, dominant designs for the production, storage, and distribution of hydrogen have not yet been established. Neither have performance characteristics been achieved to compete with the existing combustion engine, though the efficiency and durability of hydrogen fuel cells are improving. This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development policies on national energy, environment, and transport sectors. Publisher's description.

Brand Relevance David A. Aaker, 2011-01-25 Branding guru Aaker shows how to eliminate the competition and become the lead brand in your market. This groundbreaking book defines the concept of brand relevance using dozens of case studies: Prius, Whole Foods, Westin, iPad, and more, and explains how brand relevance drives market dynamics, which generates opportunities for your brand and threats for the competition. Aaker reveals how these companies have made other brands in their categories irrelevant. Key points: When managing a new category of product, treat it as if it were a brand. By failing to produce what customers want or losing momentum and visibility, your brand becomes irrelevant and creates barriers to competitors by supporting innovation at every level of the organization. Using dozens of case studies, it shows how to create or dominate new categories or subcategories, making competitors irrelevant. Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors. Describes the threat of becoming irrelevant by failing to make what customers are buying or losing energy. David Aaker, the author of four brand books, has been called the father of branding. This book offers insight for creating and/or owning a new business arena. Instead of being the best, the goal is to be the only brand around, making competitors irrelevant.

Climate Rationality Jason S. Johnston, 2021-08-19 Most environmental statutes passed since 1970 have endorsed a pragmatic or precautionary principle under which the existence of a significant risk is enough to trigger regulation. At the same time, targets of such regulation have often argued on grounds of inefficiency that the associated costs outweigh any potential benefits. In this work, Jason Johnston unpacks and critiques the legal, economic, and scientific basis for precautionary climate policies pursued in the United States and, in doing so, sheds light on why the global warming policy debate has become increasingly bitter and disconnected from both climate science and economics. Johnston

analyzes the most influential international climate science assessment organizations the US electric power industry and land management and renewable energy policies Bridging sound economics and climate science this pathbreaking book shows how the United States can efficiently adapt to a changing climate while radically reducing greenhouse gas emissions
