Supremacy Andrei Martyanov,2018-06-04 Martyanov explains why and how the US armed forces have lost the military supremacy they thought they once had and how Russia which supposedly had been defeated in the Cold War succeeded not only in catching up with USA but actually surpassing it in many key domains such as long range cruise missiles diesel electric submarines air defenses electronic warfare air superiority and many others Andrei Martyanov's book is an absolute must read for any person wanting to understand the reality of modern warfare and super power competition THE SAKER While exceptionalism is not unique to America the intensity of their conviction and its global ramifications are This view of its exceptionalism has led the US to grossly misinterpret sometimes deliberately the causative factors of key events of the past two centuries Accordingly the wrong conclusions have been derived and very wrong lessons learned Nowhere has this been more manifest than in American military thought and its actual application of military power Time after time the American military has failed to match lofty declarations about its superiority producing instead a mediocre record of military accomplishments Starting from the Korean War the United States hasn't won a single war against a technologically inferior but mentally tough enemy The technological dimension of American strategy has completely overshadowed any concern with the social cultural operational and even tactical requirements of military and political conflict With a new Cold War with Russia emerging the United States enters a new period of geopolitical turbulence completely unprepared in any meaningful way intellectually economically militarily or culturally to face a reality which was hidden for the last 70 years behind the curtain of never ending Chalabi moments and a strategic delusion concerning Russia whose history the US viewed through a Solzhenitsified caricature kept alive by a powerful neocon lobby which even today dominates US policy makers minds Martyanov's former Soviet military background enables deep insight into the fundamental issues of warfare and military power as a function of national power assessed correctly not through the lens of Wall Street economic indices and a FIRE economy but through the numbers of enclosed technological cycles and culture much of which has been shaped in Russia by continental warfare and which is practically absent in the US *Say It Right the First Time* Loretta Malandro,2003-03-22 Get what you want at work the first time and every time Being a business professional is all about managing motivating and leading or in other words getting people to do what you want And far and away the most important tool for accomplishing this objective is language Written by an internationally recognized expert on business communications this book offers managers deep insights into the power of language and how to wield it effectively in any organization Loretta Malandro arms readers with more than 200 power words and phrases designed to help readers become better managers leaders and coaches She also reveals communication secrets such as emotional triggers victim versus ownership language escape phrases as well as language for softening the edges reframing accountability and recovering from communication gaffes Malandro also provides Invaluable insights into the emotional power of words Priceless techniques to connect with and move an audience Tips on recognizing killer words and overcoming the trouble they can cause An arsenal of strategies scripts work sheets and

Philip T. Hoffman, 2017-01-24 The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914 Europeans conquered 84 percent of the globe But why did Europe establish global dominance when for centuries the Chinese Japanese Ottomans and South Asians were far more advanced In *Why Did Europe Conquer the World* Philip Hoffman demonstrates that conventional explanations such as geography epidemic disease and the Industrial Revolution fail to provide answers Arguing instead for the pivotal role of economic and political history Hoffman shows that if certain variables had been different Europe would have been eclipsed and another power could have become master of the world Hoffman sheds light on the two millennia of economic political and historical changes that set European states on a distinctive path of development military rivalry and war This resulted in astonishingly rapid growth in Europe's military sector and produced an insurmountable lead in gunpowder technology The consequences determined which states established colonial empires or ran the slave trade and even which economies were the first to industrialize Debunking traditional arguments *Why Did Europe Conquer the World* reveals the startling reasons behind Europe's historic global supremacy *My Life as a Foreign Country: A Memoir* Brian Turner, 2014-09-15 Brilliant and beautiful It surely ranks with the best war memoirs I've ever encountered Tim O'Brien author of *The Things They Carried* An award winning poet and former infantry team leader in Iraq Brian Turner combines his devastating recollections as Sergeant Turner with his visions of the experiences of generations of warriors in his family and even those of the enemy in a work of profound understanding and shocking beauty *The Sublime Object of Ideology* Slavoj Žižek, 1989 **Prophetic Expositions** Josiah Litch, 1842
