

Section 12

SECTION QUIZ *The Collapse of Reconstruction*

A. Terms and Names Write the letter of the term or name that matches the description. A term may be used more than once or not at all.

- | | | |
|-----------------|---------------------|-------------------------------|
| a. loose rule | e. Ulysses S. Grant | i. Radical Republicans |
| b. Ku Klux Klan | f. Horace Greeley | j. panic of 1873 |
| c. Amnesty Act | g. Samuel J. Tilden | k. Supreme Court of the 1870s |
| d. corruption | h. Rufus B. Hayes | l. Compromise of 1877 |

- _____ 1. This group strongly supported Reconstruction.
- _____ 2. Democrats and Republicans in Congress agreed to this, which decided the outcome of a presidential election and effectively ended Reconstruction in the South.
- _____ 3. This led to economic depression and disputes over currency policies.
- _____ 4. Although this man was considered honest, many of the people he appointed to office were dishonest and corrupt.
- _____ 5. As the Democratic candidate for president in the 1876 election, this man won the popular vote but failed to gain the presidency.
- _____ 6. This allowed many former Confederates to vote and hold elective office.
- _____ 7. Democrats used this term to describe their return to power in the South.
- _____ 8. The power of this group was severely weakened by its ties to political corruption, severe economic problems, and decisions handed down by the Supreme Court in the 1870s.
- _____ 9. During Reconstruction, this white supremacist group committed acts of violence against African Americans to keep them from participating in politics and achieving economic progress.
- _____ 10. This is what Southern Democrats managed to achieve after the 1876 election. It allowed them to restrict African-American rights, cut taxes, and wipe out social programs.

B. Extended Response Briefly answer the following questions on the back of this paper.

Identify any three events or trends that led to the collapse of Reconstruction in the South and explain why.

Hazard Mitigation Grant Program Desk Reference (FEMA 345) Federal Emergency Management Agency, 2013-02-01 FEMA's Hazard Mitigation Grant Program is a powerful resource in the combined effort by Federal State and local government as well as private industry and homeowners to end the cycle of repetitive disaster damage. The Robert T. Stafford Disaster Relief and Emergency Assistance Act was passed on November 23, 1988, amending Public Law 93-288, the Disaster Relief Act of 1974. The Stafford Act included Section 404, which established the Hazard Mitigation Grant Program. In 1993, the Hazard Mitigation and Relocation Act amended Section 404 to increase the amount of HMGP funds available and the cost share to 75 percent Federal. This amendment also encouraged the use of property acquisition and other non-structural flood mitigation measures. In an effort to streamline HMGP delivery, FEMA encourages States to develop their mitigation programs before disaster strikes. States are adopting a more active HMGP management role. Increased capabilities may include: Conducting comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils; Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between pre-disaster and post-disaster time periods and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster. Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of this Desk Reference is to provide comprehensive information about FEMA's Hazard Mitigation Grant Program, increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts, and encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included along with appendices that amplify selected aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate specific information.

Engineering for Structural Stability in Bridge Construction Federal Highway Administration, U.S. Department of Transportation, 2020-07-19 This manual is intended to serve as a reference. It will provide technical information which will enable manual users to perform the following activities: Describe typical erection practices for girder bridge superstructures and recognize critical construction stages; Discuss typical practices for evaluating structural stability of girder bridge superstructures during early stages of erection and throughout bridge construction; Explain the basic concepts of stability and why it is important in bridge erection; Explain common techniques for performing advanced stability analysis along with their advantages and limitations; Describe how differing construction sequences affect superstructure stability; Be able to select appropriate loads, load combinations, and load factors for use in analyzing superstructure components during construction; Be able to analyze bridge members at various stages of erection; Develop erection plans that are safe and economical and know what information is required and should be a part of those plans; Describe the differences between local member and global system stability.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC),2022-04-30 The Intergovernmental Panel on Climate Change IPCC is the leading international body for assessing the science related to climate change It provides policymakers with regular assessments of the scientific basis of human induced climate change its impacts and future risks and options for adaptation and mitigation This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up to date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks with a focus on resilience risk management response options and adaptation measures considering both their potential and limitations It brings together knowledge on physical and biogeochemical changes the interplay with ecosystem changes and the implications for human communities It serves policymakers decision makers stakeholders and all interested parties with unbiased up to date policy relevant information This title is also available as Open Access on Cambridge Core

Pedagogy of the Oppressed Paulo Freire,1972

Archaeology, Anthropology, and Interstellar Communication National Aeronautics Administration,Douglas Vakoch,2014-09-06 Addressing a field that has been dominated by astronomers physicists engineers and computer scientists the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence These scholars are grappling with some of the enormous challenges that will face humanity if an information rich signal emanating from another world is detected By drawing on issues at the core of contemporary archaeology and anthropology we can be much better prepared for contact with an extraterrestrial civilization should that day ever come
