In Autodesk® Revit® Building software, every drawing sheet, every 2D and 3D view, and every schedule is a direct presentation of information from the same underlying building database.

As the user works in familiar drawing and schedule views, Revit Building collects information about the building project and coordinates this information across all other representations of the project.

Autodesk Revit Building 9 includes many new and enhanced features to help you work the way you think, provide higher coordination and quality, and improve your business for a competitive advantage.
