How Users Matter Jul 25 2023 Users have become an integral part of technology studies. The essays in this volume look at the creative capacity of users to shape technology in all phases, from design to implementation. Using a variety of theoretical approaches, including a feminist focus on users and use (in place of the traditional emphasis on men and machines), concepts from semiotics, and the cultural studies view of consumption as a cultural activity, these essays examine what users do with technology and, in turn, what technology does to users. The contributors consider how users consume, modify, domesticate, design, reconfigure, and resist technological development—and how users are defined and transformed by technology. The essays in part I show that resistance to and non-use of a technology can be a crucial factor in the eventual modification and improvement of that technology; examples considered include the introduction of the telephone into rural America and the influence of non-users of the Internet. The essays in part II look at advocacy groups and the many kinds of users they represent, particularly in the context of health care and

clinical testing. The essays in part III examine the role of users in different phases of the design, testing, and selling of technology. Included here is an enlightening account of one company's design process for men's and women's shavers, which resulted in a "Ladyshave" for users assumed to be technophobes. Taken together, the essays in *How Users Matter* show that any understanding of users must take into consideration the multiplicity of roles they play—and that the conventional distinction between users and producers is largely artificial.

The Oxford Handbook of Adolescent Substance Abuse Jul 13 2022 Adolescent substance abuse is the nation's #1 public health problem. It originates out of a developmental era where experimentation with the world is increasingly taking place, and where major changes in physical self and social relationships are taking place. These changes cannot be understood by any one discipline nor can they be described by focusing only on the behavioral and social problems of this age period, the characteristics of

normal development, or the pharmacology and addictive potential of specific drugs. They require knowledge of the brain's systems of reward and control, genetics, psychopharmacology, personality, child development, psychopathology, family dynamics, peer group relationships, culture, social policy, and more. Drawing on the expertise of the leading researchers in this field, this Handbook provides the most comprehensive summarization of current knowledge about adolescent substance abuse. The Handbook is organized into eight sections covering the literature on the developmental context of this life period, the epidemiology of adolescent use and abuse, similarities and differences in use, addictive potential, and consequences of use for different drugs; etiology and course as characterized at different levels of mechanistic analysis ranging from the genetic and neural to the behavioural and social. Two sections cover the clinical ramifications of abuse, and prevention and intervention strategies to most effectively deal with these problems. The Handbook's last section addresses the role of social policy in framing the problem, in addressing it, and explores its potential role in alleviating it.

The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century Nov 28 2023 Learn why marijuana use has increased in the new millennium According to the Substance Abuse and Mental Health Services Administration, marijuana is the most commonly used illicit drug. The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century takes a close look at present cannabis use trends in the new millennium by providing the latest research findings and most current case studies. Age and ethnographic data are presented in detail always with a constant focus on the unique subcultural contexts in today's society. This examination explores the most pressing issues in marijuana use, including the increased popularity of blunt smoking, the social ramifications of marijuana use in gangs and Southeast Asian youth, and alternative delivery systems for medical marijuana. The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century discusses

various aspects of marijuana being the drug of choice in today's culture, including the different subgroups of age, economic status, and ethnic background. The book provides a comprehensive view of the people, reasons for use, varied ways of ingesting the drug, and marijuana use "rituals." Extensive references, charts, tables, and figures are included to enhance clarification of research findings. The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century discusses the latest research findings on: the growth of marijuana use in different social groups during the 1990s medical marijuana blunt smoking and marijuana use rituals as settings for informal social controls marijuana use among minorities marijuana use in youths and young adults marijuana use among gang members adult use production, distribution, and administration of non-smokable marijuana The Cultural/Subcultural Contexts of Marijuana Use at the Turn of the Twenty-First Century is insightful, valuable, and is certain to become a reference source for researchers, educators, students, and policy advocates.

Advances in Library and information Science
(Vol. 5) Jan 31 2024 Digital or virtual libraries have brought the revolutionary changes in the

entire concept of library organization, management and operations. To peep into it, library and information science professionals, need to be get ready to face the challenges emerging due to the adoption of newer technologies. In this volume an attempt has been made to synthesize all aspects of Digital Libraries and to put them in the systematic order at one place to understand the conceptual phenomena and to render the better services. The books not only deals with the theoretical aspects of Digital Libraries but there are also some case studies which show the path to go ahead. Antivirus is also an important factor in forming the Digital Library. This aspect has also been given the due importance and a complete chapter has been devoted to this aspect. Few important topics concerning to Digital Libraries covered in this volume are : Policy and Planning of Digital Libraries. Digital Libraries : An Overview of Standards, Protocols and Formats. Perspectives in Digital Libraries. Digital Libraries : Storage & Management. Digitization of Dr. Raheja Library : A case study. Digital Information and Documentation Management in Leather and Allied Subjects. Electronic Copyright. Digital Property Rights and Licensing Issues. Antivirus

and Protection of Digital Libraries. The book is suppose to be useful for the practicing Librarians, Information Scientists, Teachers and Students of Library and Information Science and to those who feel concerned in modernization and digitation of library resources.

Bronze Age Settlement and Land-Use in Thy, Northwest Denmark (Volume 1 & 2) Sep 26 2023
This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape, settlements and households during the period 1500-1100 BC. Bordering the North Sea to the west, and the calmer waters of the Limfjord to the east, the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion. By combining results from environmental and economic research (pollen and palaeo-botanical analyses) with intensive field surveys and excavations of farmsteads with exceptional preservation, it has been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption. The results from this interdisciplinary venture made it possible to link

together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North-western Europe during this period. Here is much to feed on for students and researchers of the Bronze Age alike.

Paleolimnology Sep 14 2022 This text, written by a leading researcher in the field, describes the origin and formation of lakes in order to give context to the question of how lacustrine deposits form. It explains the process of sedimentation in lakes and the chemistry of those deposits and describes how the age of lake deposits are determined. Additionally, this book shows how different groups of fossils are used in interpreting the paleontological record of lakes. In order to illustrate the more synthetic approaches to interpreting the history of lakes, the author also discusses such special topics as lake-level history, lake evolution, and the impact of environmental change on lakes.

2023 "In this volume are collected all of the interstate compacts presently in force among States of the American Union which apportion or govern the consumptive use of the waters of interstate streams, which have to do with the prevention or amelioration of pollution of such waters, or which deal with the control of floods and problems associated therewith. This volume also includes, either by reference or in full text, all those like compacts which, though ratified by at least one State, did not come into force because of the failure of ratification by another party or because the consent of the Congress was not given. In addition, there are collected in it the treaties between the United States and Canada or Mexico and the decisions of the United States Supreme Court in interstate litigation which cover the three subjects outlined above."--Page iii.

Ending Discrimination Against People with Mental and Substance Use Disorders Jun 11 2022

Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that

assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

Land Use Cover Datasets and Validation Tools

Nov 04 2021 This open access book represents a

comprehensive review of available land-use cover data and techniques to validate and analyze this type of spatial information. The book provides the basic theory needed to understand the progress of LUCC mapping/modeling validation practice. It makes accessible to any interested user most of the research community's methods and techniques to validate LUC maps and models. Besides, this book is enriched with practical exercises to be applied with QGIS. The book includes a description of relevant global and supra-national LUC datasets currently available. Finally, the book provides the user with all the information required to manage and download these datasets.

[Human Factors and Ergonomics in Consumer Product Design](#) Jul 01 2021 Every day we interact with thousands of consumer products. We not only expect them to perform their functions safely, reliably, and efficiently, but also to do it so seamlessly that we don't even think about it. However, with the many factors involved in

consumer product design, from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost, well, the process just seems to get more complex. Edited by well-known and well-respected experts, the two-volumes of Handbook of Human Factors and Ergonomics in Consumer Product Design simplify this process. The first volume, Human Factors and Ergonomics in Consumer Product Design: Methods and Techniques, outlines the how to incorporate Human Factors and Ergonomics (HF/E) principles and knowledge into the design of consumer products in a variety of applications. It discusses the user-centered design process, starting with how mental workload affects every day interactions with consumer products and what lessons may be applied to product design. The book then highlights the ever-increasing role of information technology, including digital imaging, video and other media, and virtual reality applications in consumer product design. It also explores user-centered aspect of consumer product development with discussions of user-centered vs. task-based approach, articulation and assessment of user requirements and needs, interaction with design models, and eco design.

With contributions from a team of researchers from 21 countries, the book covers the current state of the art methods and techniques of product ergonomics. It provides an increased knowledge of how to apply the HF/E principles that ultimately leads to better product design.
