Spaces Speak, Are You Listening? Barry Blesser, Linda-Ruth Salter, 2009-09-18 How we experience space by listening

the concepts of aural architecture with examples ranging from Gothic cathedrals to surround sound home theater We experience spaces not only by seeing but also by listening We can navigate a room in the dark and hear the emptiness of a house without furniture Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony The unique acoustics of religious spaces acquire symbolic meaning Social relationships are strongly influenced by the way that space changes sound In *Spaces Speak Are You Listening* Barry Blesser and Linda Ruth Salter examine auditory spatial awareness experiencing space by attentive listening Every environment has an aural architecture The audible attributes of physical space have always contributed to the fabric of human culture as demonstrated by prehistoric multimedia cave paintings classical Greek open air theaters Gothic cathedrals acoustic geography of French villages modern music reproduction and virtual spaces in home theaters Auditory spatial awareness is a prism that reveals a culture s attitudes toward hearing and space Some listeners can learn to see objects with their ears but even without training we can all hear spatial geometry such as an open door or low ceiling Integrating contributions from a wide range of disciplines including architecture music acoustics evolution anthropology cognitive psychology audio engineering and many others *Spaces Speak Are You Listening* establishes the concepts and language of aural architecture These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well being Aural architecture is not the exclusive domain of specialists Accidentally or intentionally we all function as aural architects

Ward 81 Mary Ellen Mark, Karen Folger Jacobs, 2008 Belief in the coming of a Messiah poses a genuine dilemma From a Jewish perspective the historical record is overwhelmingly against it If despite all the tragedies that have befallen the Jewish people no legitimate Messiah has come forward has the belief not been shown to be groundless Yet for all the problems associated with messianism the historical record also shows it is an idea with enormous staying power The prayer book mentions it on page after page The great Jewish philosophers all wrote about it Secular thinkers in the twentieth century returned to it and reformulated it And victims of the Holocaust invoked it in the last few minutes of their life This book examines the staying power of messianism and formulates it in a way that retains its redemptive force without succumbing to mythology

Space, Time and Architecture Sigfried Giedion, 2009-02-28 This new edition ensures that the book will continue to be internationally acknowledged as the standard work on the development of modern architecture Walter Gropius A remarkable accomplishment one of the most valuable reference books for students and professionals concerned with the reshaping of our environment Jos Luis Sert A milestone in modern thought *Space Time and Architecture* has been reissued many times since its first publication in 1941 and translated into half a dozen languages In this revised edition of Sigfried Giedion s classic work major sections have been added and there are 81 new illustrations The chapters on leading contemporary architects have been greatly expanded There is new material on the later development of Frank Lloyd Wright and the more recent buildings of Walter Gropius particularly his American Embassy in Athens In his discussion of Le

Corbusier Mr Giedion provides detailed analyses of the Carpenter Center at Harvard University Le Corbusier s only building in the United States and his Priory of La Tourette near Lyons There is a section on his relations with his clients and an assessment of his influence on contemporary architecture including a description of the Le Corbusier Center in Zurich designed just before his death which houses his works of art The chapters on Mies van der Rohe and Alvar Aalto have been brought up to date with examples of their buildings in the sixties There is an entirely new chapter on the Danish architect Jørn Utzon whose work as exemplified in his design for the Sydney Opera House Mr Giedion considers representative of post World War II architectural concepts A new essay Changing Notions of the City traces the evolution of the structure of the city throughout history and examines current attempts to deal with urban growth as shown in the work of such architects as Jos Luis Sert Kenzo Tange and Fumihiko Maki Mr Sert s Peabody Terrace is discussed as an example of the interlocking of the collective and individual spheres Finally the conclusion has been enlarged to include a survey of the limits of the organic in architecture

Space Is the Machine Bill Hillier,2015-04-12 Since *The Social Logic of Space* was published in 1984 Bill Hillier and his colleagues at University College London have been conducting research on how space features in the form and functioning of buildings and cities A key outcome is the concept of spatial configuration meaning relations which take account of other relations in a complex New techniques have been developed and applied to a wide range of architectural and urban problems The aim of this book is to assemble some of this work and show how it leads to a new type of theory of architecture an analytic theory in which understanding and design advance together The success of configurational ideas in bringing to light the spatial logic of buildings and cities suggests that it might be possible to extend these ideas to other areas of the human sciences where problems of configuration are critical

Ontology of the Work of Art Roman Ingarden, 1989 In these studies Roman Ingarden investigates the nature and mode of being of four kinds of art works the musical work the picture the architectural work and the film He establishes that the work of art is a purely intentional object but considers also its connections to the real world By analyzing a work of art in its constitutive heterogeneous strata Ingarden demonstrates that a work of art will reveal when examined in the appropriate way its own inherent structure Further he shows that in consequence of the art work s structure we must distinguish between the work itself and the concretizations of it by the listener or viewer Ingarden elaborates upon the conception of concretization which he present in *The Literary Work of Art* and applies it to music and visual art He also employs the concept of aspect to clarify the ontic structure of these art works and the distinction between the concretization of the work and the work itself The distinction between the work s concretization effectuated in the mental experiences of the listener or viewer and the work itself serves to help Ingarden confirm and account for the work s intersubjective identity The problem of aesthetic value Ingarden maintains can be fruitfully treated only after the ontic structure of art work has been clarified His primary concern in *Ontology of the Work of Art* is to ascertain and describe that structure and the mode of existence of works of art In addition he offers several discussions of aesthetic value showing in the m the connections between questions of aesthetic value and the structure of the work of art

The Mathematics of the Ideal Villa and Other Essays Colin Rowe, 1982-09-14 This collection of an important architectural theorist s essays considers and compares designs by Palladio and Le Corbusier discusses mannerism and modern architecture architectural vocabulary in the 19th century the architecture of Chicago neoclassicism and modern architecture and the architecture of utopia *Charles Pettigrew, First Bishop-elect of the North Carolina Episcopal Church* Bennett H Wall, 2021-09-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Schiphol Architecture* Maarten Kloos, Birgitte de Maar, 1996-01-01
