Despite efforts by educators and policymakers during the past several decades, certain groups of students--primarily African American students, English language learners, and students from low-income homes--continue to underperform on commonly used measures of academic achievement. Too often, teachers and administrators lack both proper preparation and good ideas to confront these issues. The comprehensiveness and breadth of the textbook is unmatched in the field...makes a unique contribution to our understanding. - James F. Nolan, Penn State University Teaching and Learning Strategies for the Thinking Classroom is a practical guide to lively teaching that results in reading and writing for critical thinking. It explains and demonstrates a well-organized set of strategies for teaching that invites and supports learning. Active Reading in the Arts and Sciences is designed to develop students' critical thinking abilities as they apply to the reading of college textbooks and other academic materials. The art of questioning with extensive

demonstrations of what questions to ask in reading discipline-specific materials and which answers to look for forms the underlying structure of the book. The book is divided into four general sections. Part I introduces students to basic reading skills required for college work such as the connections between thinking and reading, words and ideas, generalizations and supporting material, and previewing and efficient reading. Part II moves students through the analytical reading skills of recognizing and working with the organization of material to the critical reading skills of determining an author's purpose and methods of evaluating an author's evidence and reasoning and ends with a chapter on general reading and strategies studies. Part III follows with chapters on the application of the skills and techniques learned to reading in specific academic fields. Part IV applies the skills learned to specific disciplines the humanities, the natural sciences, and the social sciences and history. Students learn the roles of patterns of thought and the roles of evidence in these areas. This practical handbook for teachers presents 26 behaviors in a "Good Reader" alphabet as desired outcomes of language instruction. From "A -- Anticipating Meaning" to "Z -- Zero in on Learning Strategies When They Need Them", each behavior is presented in a three-part discussion. First, a rationale that supports spending classroom time on the particular objective. Second, a

classroom observation of behavior reinforcement activities. Finally, a variety of effective strategies and techniques that actively involve students in taking meaning to and from the text.
