Three mock exams provide you with more essential practice and marking schemes show you how the examiner awards marks. Psychologists is a Mental Health Magazine that offers a wide range of awareness and knowledge about Mental health published by Utsaah Psychological Services. Reliable & authentic source of expert advice from renowned Mental Health professionals in India. The key question facing European policy-makers is how to enable collective redress proceedings without producing the undesirable consequences that are associated with the U.S. class action model. How is it possible to find the balance between providing compensation for legitimate claims and preventing unmeritorious claims? If the system encourages the vast majority of claims to be settled, how can it avoid the ‘blackmail effect’, which means it will be cheaper for defendants to settle unmeritorious claims than to fight them? How is it possible to avoid excessive transactional costs? etc. In this report, it is considered that one of the of the important safeguards against the abuses of the U.S. class action system could be the active role of the court in collective redress litigation. Research is needed to see what concrete judicial powers are the most important in that respect. This report tries to achieve this challenge. The first part of the report consists in a comparative analysis of national rules and case law in six Member States (United

Kingdom (England & Wales), Germany, Italy, Portugal, Spain and Sweden) to identify which powers of the court in a collective redress trial ensure fair proceedings for both parties and act as safeguards against potential abuses of the system. Cases have been selected to illustrate the issues that arise and some of the creative solutions that have been applied so far by the courts at each stage of a collective redress procedure. The second part of this report aims at looking ahead to ways in which recommendations for an optimal balanced framework for a European collective redress mechanism would be formulated. The result of the case analyses set out in this report attempts to demonstrate whether the European Union might be able to introduce an attractive approach towards collective redress which builds on previous knowledge by fusing different national approaches and provides benefits to consumers, competitors and the economy, without harmful risks. With Asia as its backdrop, this book investigates the role played by the World Bank Group (WBG) in conceptualising and promoting new mining regimes tailored for resource-rich country clients. It details a particular politics of mining in the Global South characterised by the transplanting, hijacking and contesting of the WBG's mining agenda. Biodiversity may refer to the diversity of genes, species or ecosystems in general. These varying concepts of biodiversity occasionally lead to conflicts among researchers and policy makers, as each of them require a customized type of protection strategy. This book addresses the questions surrounding the merits of conserving an existing situation, evolutionary development or the intentional substitution of one genome, species or ecosystem for another. Any practical steps towards the protection of biodiversity demand a definition of that which is to be protected and, in turn, the motivations for protecting biodiversity. Is biodiversity a necessary model which is also useful, or does it carry intrinsic value? Debates like this are particularly complex when interested parties address it from different conceptual and moral perspectives. Comprised of three parts, each complemented by a short introductory paragraph, this collection presents a variety of approaches to this challenge. The chapters cover the perspectives of environmental scientists with expertise in evolutionary, environmental biology, systematic zoology and botany, as well as those of researchers with expertise in philosophy, ethics, politics, law and economics. This combination facilitates a truly interdisciplinary debate by highlighting hitherto unacknowledged implications that inform current academic and political debates on biodiversity and its protection. The book should be of interest to students and researchers of environment studies, biodiversity, environmental philosophy, ethics and management. The updated 4th Edition of 56 NTA UGC NET Paper 1 Teaching & Research Aptitude Topic-wise Solved Papers (2022 to 2004) consists of: # Authentic Past 19 Years Solved Papers from 2022 Phase II to 2004 Phase II. # The USP of the book is its division of Questions into 10 Units which have been further divided into 49 Topics as per the latest UGC syllabus. # 2 sets each of September 2022, Dec 2021, Sep 2020, 10 Sets each of June 2019 Ph I & Dec 2019 Ph II, 1 set each from 2004 - 2018 Ph 1 & 2 Papers have been included in this edition. # The book also provides Trend Analysis of Past Year Papers. # The solutions have been prepared after a thorough research. # The book contains 3000+ Questions in all. The detailed solutions are provided immediately after each chapter. # The book is also useful for SET (JRF & Asst. Professor). # The Book is highly recommended as it can be used along with your preparation from Day 1 - As you go through the past questions of a Chapter as you study it. The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland. Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis. 2023-24 UGC NTA NET/SLET/JRF Commerce Solved Papers What are the impacts of population growth? Can our planet support the demands of the ten billion people anticipated to be the world's population by the middle of this century? While it is common to hear about the problems of overpopulation, might there be unexplored benefits of increasing numbers of people in the world? How can we both consider and harness the potential benefits brought by a healthier, wealthier and larger population? May more people mean more scientists to discover how our world works, more inventors and thinkers to help solve the world's problems, more skilled people to put these ideas into practice? In this book, leading academics with a wide range of expertise in demography, philosophy, biology, climate science, economics and environmental sustainability explore the contexts, costs and benefits of a burgeoning population on our economic, social and environmental systems. The European Union (EU) leniency programme is a key weapon in the Commission's fight against hard-core cartels. Much of the success of EU cartel enforcement depends on the continued effectiveness of the leniency policy and is especially critical in response to the growth of private enforcement. This book offers a comprehensive description of the development of the policy, along with a normative framework that promises to ensure the full legitimacy of the leniency programme: the Commission's policy should pursue not only effectiveness but also fairness. It is the first work to extensively analyse the effectiveness and fairness in the EU leniency policy. Proceeding systematically from clarifying the concepts of 'effectiveness' and 'fairness' to addressing the tension between leniency and private actions for damages, the author discusses the nature of, and interrelations among, such aspects as the following: – the theoretical model of the EU fining policy; – the compatibility of the EU enforcement system with fundamental rights protection; – the gathering and evaluation of evidence at the preliminary investigation stage; – the severity and foreseeability of the EU cartel fines; – judicial review by the EU Courts in competition matters; – to what extent the current policy is effective and fair; and – reforms brought about by the 2002 and 2006 Leniency Notices and the leniency-related amendments by the 2014 Antitrust Damages Directive. A key feature is the author's presentation of a normative framework to test the effectiveness (deterrence) and substantive fairness (retribution) of the EU leniency policy. As a clear demonstration of how to forestall the danger of focusing on effectiveness of leniency at the expense of fairness, both in a substantive and in a procedural sense, this book is a major contribution to the literature of competition law. It will prove to be of great value to competition authorities, antitrust practitioners and interested academics not only in Europe but also throughout the world. 2023-24 NTA/CSIR-NET/JRF Chemical Science Solved Papers Nutrition-sensitive, food-based approaches towards hunger and malnutrition are effective, sustainable and long-term solutions. This book discusses the policy, strategic, methodological, technical and programmatic issues associated with such approaches, proposes "best practices" for the design, targeting, implementation and evaluation of specific nutrition-sensitive, food-based interventions and for improved methodologies for evaluating their efficacy and cost-effectiveness, and provides practical lessons for advancing nutrition-sensitive food-based approaches

for improving nutrition at policy and programme level. This three-volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais, Portugal on 7th to 10th September 2015. The International Ship and Offshore Structures Congress (ISSC) is a forum for the exchange of information by experts undertaking and applying marine structural research. The aim of Sustainability in agriculture and associated primary industries, which are both energy-intensive, is crucial for the development of any country. Increasing scarcity and resulting high fossil fuel prices combined with the need to significantly reduce greenhouse gas emissions, make the improvement of energy efficient farming and increased use of renewable energy essential. This book provides a technological and scientific endeavor to assist society and farming communities in different regions and scales to improve their productivity and sustainability. To fulfill future needs of a modern sustainable agriculture, this book addresses highly actual topics providing innovative, effective and more sustainable solutions for agriculture by using sustainable, environmentally friendly, renewable energy sources and modern energy efficient, cost-improved technologies. The book highlights new areas of research, and further R&D needs. It helps to improve food security for the rapidly growing world population and to reduce carbon dioxide emissions from fossil fuel use in agriculture, which presently contributes 22% of the global carbon dioxide emissions. This book provides a source of information, stimuli and incentives for what and how new and energy efficient technologies can be applied as effective tools and solutions in agricultural production to satisfy the continually increasing demand for food and fibre in an economically sustainable way, while contributing to global climate change mitigation. It will be useful and inspiring to decision makers working in different authorities, professionals, agricultural engineers, researchers, and students concerned with agriculture and related primary industries, sustainable energy development and climate change mitigation projects. Numbers dominate global politics and, as a result, our everyday lives. Credit ratings steer financial markets and can make or break the future of entire nations. GDP drives our economies. Stock market indices flood our media and national debates. Statistical calculations define how we deal with climate change, poverty and sustainability. But what is behind these numbers? In *How Numbers Rule the World*, Lorenzo Fioramonti reveals the hidden agendas underpinning the use of statistics and those who control them. Most worryingly, he shows how numbers have been used as a means to reinforce the grip of markets on our social and political life, curtailing public participation and rational debate. An innovative and timely exposé of the politics, power and contestation of numbers. The Arab world is one of the fastest growing economies in the world. In order to keep up with the ever-progressing and expanding developments, advancements must be made with the current systems process and procedures. *Knowledge-Based Economic Policy Development in the Arab World* focuses on knowledge economy as the most important engine for economic growth and development under the globalizing world economies. This publication analyzes the major issues that constrain further access to knowledge economy in the Arab countries with comparisons in Eastern and Central European economies. Researchers, business practitioners, and academics interested in new economic and development inclusive growth policies will benefit greatly from the wide variety of discussion in this publication. 32 UGC NET Previous Papers (Teaching & Research Aptitude Paper-1) Keywords: KVS Madaan, 01 UGC NET Economics Previous Papers, 02 UGC NET Political Science Previous Papers, 03 UGC NET Philosophy Previous Papers, 04 UGC NET Psychology Previous Papers, 05 UGC NET Sociology Previous Papers, 06 UGC NET History Previous Papers, 07 UGC NET Anthropology Previous Papers, 08 UGC NET Commerce Previous Papers, 09 UGC NET Education Previous Papers, 10 UGC NET Social Work Previous Papers, 11 UGC NET Defence and Strategic Studies Previous Papers, 12 UGC NET Home Science Previous Papers, 14 UGC NET Public Administration Previous Papers, 15 UGC NET Population Studies\* Previous Papers, 16 UGC NET Music Previous Papers, 17 UGC NET Management Previous Papers, 18 UGC NET Maithili Previous Papers, 19 UGC NET Bengali Previous Papers, 20 UGC NET Hindi Previous Papers, 21 UGC NET Kannada Previous Papers, 22 UGC NET Malayalam Previous Papers, 23 UGC NET Odia Previous Papers, 24 UGC NET Punjabi Previous Papers, 25 UGC NET Sanskrit Previous Papers, 26 UGC NET Tamil Previous Papers, 27 UGC NET Telugu Previous Papers, 28 UGC NET Urdu Previous Papers, 29 UGC NET Arabic Previous Papers, 30 UGC NET English Previous Papers, 31 UGC NET Linguistics Previous Papers, 32 UGC NET Chinese Previous Papers, 33 UGC NET Dogri Previous Papers, 34 UGC NET Nepali Previous Papers, 35 UGC NET Manipuri Previous Papers, 36 UGC NET Assamese Previous Papers, 37 UGC NET Gujarati Previous Papers, 38 UGC NET Marathi Previous Papers, 39 UGC NET French Previous Papers, 40 UGC NET Spanish Previous Papers, 41 UGC NET Russian Previous Papers, 42 UGC NET Persian Previous Papers, 43 UGC NET Rajasthani Previous Papers, 44 UGC NET German Previous Papers, 45 UGC NET Japanese Previous Papers, 46 UGC NET Adult Education/ Continuing Education/ Andragogy/ Non Formal Education Previous Papers, 47 UGC NET Physical Education Previous Papers, 49 UGC NET Arab Culture and Islamic Studies Previous Papers, 50 UGC NET Indian Culture Previous Papers, 55 UGC NET Labour Welfare/Personnel Management/Industrial Relations/ Labour and Social Welfare/Human Resource Management Previous Papers, 58 UGC NET Law Previous Papers, 59 UGC NET Library and Information Science Previous Papers, 60 UGC NET Buddhist, Jaina, Gandhian and Peace Studies Previous Papers, 62 UGC NET Comparative Study of Religions Previous Papers, 63 UGC NET Mass Communication and Journalism Previous Papers, 65 UGC NET Performing Arts • Dance/Drama/Theatre Previous Papers, 66 UGC NET Museology & Conservation Previous Papers, 67 UGC NET Archaeology Previous Papers, 68 UGC NET Criminology Previous Papers, 70 UGC NET Tribal and Regional Language/Literature Previous Papers, 71 UGC NET Folk Literature Previous Papers, 72 UGC NET Comparative Literature Previous Papers, 73 UGC NET Sanskrit Traditional Subjects (including Jyotisha/Sidhanta Jyotisha/ Navya Vyakarna/ Vyakarna/ Mimamsa/ Navya Nyaya/ Sankhya Yoga/ Tulanatmaka Darsana/ Shukla Yajurveda/ Madhva Vedanta/ Dharma Sastra/ Sahitya/ Purana-itihasa/Agama/Advaita Vedanta) Previous Papers, 74 UGC NET Women Studies \*\* Previous Papers, 79 UGC NET Visual Arts (including Drawing & Painting/Sculpture/ Graphics/Applied Art/History of Art) Previous Papers, 80 UGC NET Geography Previous Papers, 81 UGC NET Social Medicine & Community Health Previous Papers, 82 UGC NET Forensic Science Previous Papers, 83 UGC NET Pali Previous Papers, 84 UGC NET Kashmiri Previous Papers, 85 UGC NET Konkani Previous Papers, 87 UGC NET Computer Science and Applications Previous Papers, 88 UGC NET Electronic Science Previous Papers, 89 UGC NET Environmental Sciences Previous Papers, 90 UGC NET International and Area Studies Previous Papers, 91 UGC NET Prakrit Previous Papers, 92 UGC NET Human Rights and Duties Previous Papers, 93 UGC NET Tourism Administration and Management Previous Papers, 94 UGC NET Bodo Previous Papers, 95 UGC NET Santali Previous Papers, , 2024-25 NTA UGC-NET/JRF English Solved Papers

The term BRICS (Brazil, Russia, India, China and South Africa) is gaining global attention both in scholarly and popular discourse. BRICS countries are crucial in terms of their vast areas, huge population and have massive economic potential. These countries are also categorized as developing countries and are aspiring to be considered as developed countries. There is commonality among

these countries in that they have similar issues and problems, which may require common solutions. Science, Technology and Innovation in BRICS Countries examines whether more emphasis on Science Technology and Innovation (STI) capability building could be the solution to these countries' economic upgradation and poverty reduction. This book is a collection of various Science Technology and Innovation (STI) issues of BRICS economics, and will be of interest to general readers, scholars working in this field, as well as policy makers all over the globe. The contributions come from various scholars across the globe who have published their BRICS economics research in a special issue of the African Journal of Science, Technology, Innovation and Development. This book, written by experts from universities and major industrial research laboratories, is devoted to the very hot topic of cognitive radio and networking for cooperative coexistence of heterogeneous wireless networks. Selected highly relevant advanced research is presented on spectrum sensing and progress toward the realization of accurate radio environment mapping, biomimetic learning for self-organizing networks, security threats (with a special focus on primary user emulation attack), and cognition as a tool for green next-generation networks. The research activities covered include work undertaken within the framework of the European COST Action IC0902, which is geared towards the definition of a European platform for cognitive radio and networks. Communications engineers, R&D engineers, researchers, and students will all benefit from this complete reference on recent advances in wireless communications and the design and implementation of cognitive radio systems and networks.

2022-23 NTA/UGC-NET/JRF Computer Science & Applications Solved Papers Equity, Opportunity and Education in Postcolonial Southeast Asia addresses the ways in which colonial histories, nationalist impulses and forces of globalization shape equity and access to education in Southeast Asia. Although increasingly identified as a regional grouping (ASEAN), Malaysia, Indonesia, Burma, Thailand, Singapore and the Philippines are known for their vastly different state structures, political regimes, political economies and ethnocultural and religious demography. The expert contributors to this volume investigate educational access and equity for citizens, ethnic and religious minorities, and indigenous people within these countries. The subject of education is framed within the broader national and local challenges of achieving equity and social justice. This book examines the dimensions of (post)colonialism, nationalism, and globalisation as played out within different international educational contexts. Chapters include: Understanding the Cultural Politics of Southeast Asian Education through Postcolonial Theory Downplaying Difference: Representations of Diversity in Contemporary Burmese Schools and Educational Equity Learner Centered Pedagogy in Post-Conflict Timor-Leste: For the Benefit of the Learner or the Learned Technology of Dominance, Technology of Liberation: Education in Colonial and Postcolonial Cambodia Change and Continuity in the History of Vietnamese Higher Education Colonization by Stealth: The Case of Thailand Education Politics in Postcolonial Malaysia: Ethnicity, Difference and Inequalities The Singapore Education Journey: From Colonialism to Globalism This book provides a timely and comprehensive overview of the introduction of LTE technology for PPDR communications. It describes the operational scenarios and emerging multimedia and data-centric applications in demand and discusses the main techno-economic drivers that are believed to be pivotal for an efficient and cost-effective delivery of mobile broadband PPDR communications. The capabilities and features of the LTE standard for improved support of mission-critical communications (e.g., proximity services, group communications) are covered in detail. Also, different network implementation options to deliver mobile broadband PPDR communications services over dedicated or commercial LTE-based networks are discussed, including the applicability of the Mobile Virtual Network Operator (MVNO) model and other hybrid models. Radio spectrum matters are also discussed in depth, outlining spectrum needs and providing an outlook into allocated and candidate spectrum bands for PPDR communications and suitable dynamic spectrum sharing solutions in PPDR communications. Explanations are accompanied by a vast collection of references that allow the more intrigued reader to gain further insight into the addressed topics.

2024-25 NTA UGC-NET/JRF Teaching & Research Aptitude Solved Papers This volume contains papers presented at the 16th Annual EU Competition Law and Policy Workshop, held at the European University Institute on 17-18 June 2011. This edition of the Workshop examined the emerging and increasingly important use of private rights of action before national courts, and the prospects for legislation and soft law initiatives at the level of the EU. The book has been updated and reflects the European Commission's private enforcement package of June 2013. Furthermore, the experiences of various national jurisdictions are discussed, both within Europe and in the US and Canada. As a whole, the volume explores how public and private enforcement might function harmoniously, as an 'integrated' system, to promote the public interest while ensuring that individual rights created in this field by the EU competition rules are vindicated. The contributors have, however, devoted significant analysis to the tensions between those two modes of enforcement. Authors contributing to this book include: Enno Ahlenstiel Donald Baker Jochen Burcher Horst Butz Scott Campbell Brian Facey Tristan Feunteun Ian Forrester Andrew Foster Andrew Gavil Barry Hawk James Keyte Assimakis Komninos Bruno Lasserre Frédéric Louis Mel Marquis Veljko Milutinovic Luis Silva Morais Tom Ottervanger Silvia Pietrini Mark Powell John Ratliff J Thomas Rosch David Rosner Mario Siragusa James Venit

2023-24 NTA UGC-NET/JRF English Solved Papers Explores how we judge engineering education in order to effectively redesign courses and programs that will prepare new engineers for various professional and academic careers Shows how present approaches to assessment were shaped and what the future holds Analyzes the validity of teaching and judging engineering education Shows the integral role that assessment plays in curriculum design and implementation Examines the sociotechnical system's impact on engineering curricula In 2012, Australia took the major step of introducing a carbon price, involving the creation of a system of emissions permits initially issued at a fixed price. Carbon Pricing brings together experts instrumental in the development, and operation, of A The global financial crisis that began in 2007 was the most destructive since the 1930s. The rapid spread of the crisis across borders and the complexity of these cross-border linkages highlighted the importance for authorities of working together in responding to the crisis. This book examines the transnational response that relied heavily on a set of relatively informal transnational regulatory groupings that had been constructed over previous decades. During the crisis these arrangements were made stronger and more inclusive, but they remain very complex. Thousands of pages of new rules have been created by various transnational bodies, and the implementation of these rules relies heavily on domestic law and regulation and private rules and practices. This book analyses this complex response, showing that its overly technical and incremental character, the persistence of tensions between transnational processes and state-centred politics, and the ongoing power of private actors, have made the regulatory response fall short of what is needed. Transnational Financial Regulation after the Crisis provides new insights that are relevant for theory and practice, not only for transnational financial regulation, but for global governance more generally. Providing guidelines for implementing sustainable practices for traditional petroleum based plastics, biobased plastics, and recycled plastics, Sustainable Plastics

and the Environment explains what sustainable plastics are, why sustainable plastics are needed, which sustainable plastics to use, and how manufacturing companies can integrate them into their manufacturing operations. A vital resource for practitioners, scientists, researchers, and students, the text includes impacts of plastics including Life Cycle Assessments (LCA) and sustainability strategies related to biobased plastics and petroleum based plastics as well as end-of-life options for petroleum and biobased plastics. Left-right asymmetries of structure and function are a common organization principle in the brains of humans and non-human vertebrates alike. While there are inherently asymmetric systems such as the human language system or the song system of songbirds, the impact of structural or functional asymmetries on perception, cognition and behavior is not necessarily limited to these systems. For example, performance in experimental paradigms that assess executive functions such as inhibition, planning or action monitoring is influenced by information processing in the bottom-up channel. Depending on the type of stimuli used, one hemisphere can be more efficient in processing than the other and these functional cerebral asymmetries have been shown to modulate the efficacy of executive functions via the bottom-up channel. We only begin to understand the complex neuronal mechanisms underlying this interaction between hemispheric asymmetries and cognitive systems. Therefore, it is the aim of this Research Topics to further elucidate how structural or functional hemispheric asymmetries modulate perception, cognition and behavior in the broadest sense. Type of Book: Solved Papers Subject – NTA UGC NET/JRF/Set Paper 2 Commerce Index-NTA UGC NET/JRF/Set Paper 2 Commerce 24 Solved Papers (2012–2021) Qualities Easy and Understandable for Preparation Previous Years' Solved Papers [2012-2021] Complete syllabus accommodated with all the recent changes The book contains 24 Solved Papers This book presents a comprehensive analysis of D2D communication over LTE-A band. The book uses 3GPP LTE-A as a baseline and explains all fundamental requirements for deploying D2D network under cellular systems from an architectural, technical and business point of view. The contributors explain the standardization activities of Release 12 of LTE-A, which has been recently acknowledged as support of D2D communication in LTE-A. The text updates the research community on the D2D roadmap as well as new features emerging for consideration in 3GPP. Tibet's enduring myth, animated by the tales of Himalayan adventurers, British military expeditions, and the novel, *Lost Horizon*, remains an inspirational fantasy, a modern morality play about the failure of brutality to subdue the human spirit. Tibet also exercises immense "soft power" as one of the lenses through which the world views China. This book traces the origins and manifestations of the Tibetan myth, as propagated by Younghusband, Madam Blavatsky, Himmler, Acheson and Roosevelt. The authors discuss how, after WW2, Tibet-- isolated, misunderstood and with a tiny elite unschooled in political-military realities --- misread the diplomacy between its two giant neighbours, India and China, forlornly hoping London or Washington might intervene. China's People's Liberation Army sought nothing less than to deconstruct traditional Tibet, unseat the Dalai Lama and "absorb" this vast region into the People's Republic, and Lhasa succumbed to China's invasion in 1950. Drawing on declassified CIA and Chinese documents, the authors reveal Mao's collusion with Stalin to subdue Tibet, double-dealing by Nehru, the brilliant diplomacy of Chou en Lai and how Washington see-sawed between the China lobby, who insisted there be no backing for an independent Tibet, and Presidents Truman and later Eisenhower, who initiated a covert CIA programme to support the Dalai Lama and resist Chinese occupation. It is an ignoble saga with few, if any, heroes, other than ordinary Tibetans. 2023-24 NTA UGC-NET/JRF Teaching & Research Aptitude 82 Sets With a unique insider's perspective, John O'Brien explores two decades of political activism by the NTEU, from its successes in navigating enterprise bargaining and vital role during the Rights to Work campaign; to its work on behalf of Aboriginal and Torres Strait Islanders, women, LBGTI members and casual workers during a time of constant change within the education sector.
