Subject Guide to Books in Print, 1997 **Making It Big** Andrea Ciani, Marie Caitriona Hyland, Nona Karalashvili, Jennifer L. Keller, Trang Thu Tran, 2020-10-08 Economic and social progress requires a diverse ecosystem of firms that play complementary roles Making It Big Why Developing Countries Need More Large Firms constitutes one of the most up to date assessments of how large firms are created in low and middle income countries and their role in development It argues that large firms advance a range of development objectives in ways that other firms do not large firms are more likely to innovate export and offer training and are more likely to adopt international standards of quality among other contributions Their particularities are closely associated with productivity advantages and translate into improved outcomes not only for their owners but also for their workers and for smaller enterprises in their value chains The challenge for economic development however is that production does not reach economic scale in low and middle income countries Why are large firms scarcer in developing countries Drawing on a rare

set of data from public and private sources as well as proprietary data from the International Finance Corporation and case studies this book shows that large firms are often born large or with the attributes of largeness In other words what is distinct about them is often in place from day one of their operations To fill the missing top of the firm size distribution with additional large firms governments should support the creation of such firms by opening markets to greater competition In low income countries this objective can be achieved through simple policy reorientation such as breaking oligopolies removing unnecessary restrictions to international trade and investment and establishing strong rules to prevent the abuse of market power Governments should also strive to ensure that private actors have the skills technology intelligence infrastructure and finance they need to create large ventures Additionally they should actively work to spread the benefits from production at scale across the largest possible number of market participants This book seeks to bring frontier thinking and evidence on the role and origins of large firms to a wide range of readers including academics development practitioners and policy makers
