In 2016 the first edition of the SAGES Manual Operating through the Endoscope was published. At the time, this represented a review of cutting-edge new technologies that were being introduced within the field of flexible endoscopy. Largely based on applications and data up to 2013, this served as a unique resource for clinicians and researchers to learn about this expanding field. Since then, there

has been a significant expansion of new technologies and procedures within this discipline that have meaningfully changed this entire sub-specialty. In addition, large numbers of high-quality data have emerged that support more heartily the safety and efficacy of these techniques. Major international societies now routinely include hands-on training and scientific content of this field in meetings and educational efforts, and many trainees and practitioners are looking for resources to improve their knowledge and technical skills sets. For these reasons, an update on this rapidly advancing field seems appropriate at this time, given the enormous amount of new content available. Endoscopic surgical procedures allow for less invasive access for performing increasingly complex procedures. This results in maximal benefit for patients with fewer complications, faster recovery, and less pain. Endoscopy allows access to the gastrointestinal tract without transgressing the abdominal or chest walls, by means of a truly less invasive route. These technologies and skills are being sought out by practitioners and asked for by patients. The proposed textbook is designed to present a comprehensive and state-of-the-art approach to the diverse applications of surgical techniques and procedures through the endoscopic platform. Written by experts and emerging specialists in that field, each of these sections will address patient selection, pre-operative considerations, technical conduct of the most common operations, and avoiding complications. A review of the existing literature addressing the particular topic will follow in each section. Extensive endoscopic images and illustrations will make this an interactive text. In addition to updates on most topics in the previous manual, this edition will include exciting new fields of advanced imaging, artificial intelligence and augmented imaging, applications of robotics to endoscopy, and more robust exposure of endoscopic applications for treatment of obesity, a worldwide epidemic. The subject of surgical endoscopy has changed meaningfully since publication of the first edition; now a substantial focus of major journals, scientific meetings, and online platforms. A timely update can capture this broad subject in an accessible manual focused on technologies and data supporting these interventions. stunning new Lotus Evora is explored in this fully comprehensive book, LOTUS EVORA - SUBLIME SUPERCAR. From its conception, through development, prototype testing, certification, production and on to the marketing of the car, every part of this captivating story is covered in depth. Produced with the full co-operation of Lotus Cars, who once again gave Coterie Press exclusive access to their photo archives as well as their employees, this book contains the reminiscences of virtually everyone involved in the concept, design and development of the Evora. Author Johnny Tipler was the only journalist invited to see and drive the Evora before it was launched to the press and public. With unprecedented access and surprising candor, he is able to describe in detail all of the development stages, through to the construction of the first production examples, culminating in the car's press debut in Scotland. His close involvement with Lotus, and their obvious enthusiasm for the Evora project, is reflected by the openness of all involved who tell him the full story behind this stunning new car. In a period when the monarch was the key figure in the Portuguese government, the struggle for the throne among members of the royal family was of crucial significance. Against a backdrop of new liberal ideas, economic conservatism, and modernization, Dom Pedro challenged his brother, Dom Miguel (the Usurper), on behalf of his young daughter (Maria II) for the throne. But this struggle for the throne, and for a workable constitution, did little to change the fundamentally agrarian economy, so that in the end neither the

monarch, nor the liberal ideals of the urban elite, nor foreign pressures had any fundamental effect on society as a whole. The Concession of Évora Monte describes the economic and political problems unleashed by the Peninsular War and the evacuation of the court to Brazil; the 1820 revolution, the first Portuguese constitution, and the counter revolution; the attempt by Dom Pedro when he became king (while also emperor of Brazil) to introduce the new Constitutional Charter and pass the throne on to his young daughter; the usurpation of the throne by his brother Dom Miguel; the War of the Two Brothers in which Dom Pedro defeated Dom Miguel and forced him into exile. The signing of the Concession in 1834 marked the end of the civil war, but it did not bring peace and stability. The changes introduced by the victorious Dom Pedro did not solve the basic issues of Portuguese society, nor did the efforts of his daughter, Maria II, during the 1830s and the 1840s. Several attempts were made to impose a new liberal constitution on the country, but in the end it was the formation after 1850 of new political parties sharing the governing which brought stability. The country remained conservative despite the modernization which came to the cities but which penetrated the countryside only to a degree. This book argues that liberalism in Portugal was an urban phenomenon involving a very small minority of the people, and points to a variety of reasons for this. Portugal remained a rural, conservative society into the twentieth century and throughout the Salazar regimes until, perhaps, the Carnation Revolution in 1974.

This title is a DIY workshop manual for Renault 4 owners. The book features maintenance and repair procedures for Renault 4 vehicles. The editors draw on a 3-year project that analyzed a Portuguese area in detail, comparing this study with papers from other regions. Applications include the estimation of technical efficiency in agricultural grazing systems (dairy, beef and mixed) and specifically for dairy farms. The conclusions indicate that it is now necessary to help small dairy farms in order to make them more efficient. These results can be compared with the technical efficiency of a sample of Spanish dairy processing firms presented by Magdalena Kapelko and co-authors. Hardtop & Soft-top. Petrol: 3.0 litre (2997cc) V8.
