Lakeland: Lakeland Community Heritage Project Inc., 2012-09-18 Lakeland the historical African American community of College Park was formed around 1890 on the doorstep of the Maryland Agricultural College now the University of Maryland in northern Prince George's County Located less than 10 miles from Washington D C the community began when the area was largely rural and overwhelmingly populated by European Americans Lakeland is one of several small African American communities along the U S Route 1 corridor between Washington D C and Laurel Maryland With Lakeland's central geographic location and easy access to train and trolley transportation it became a natural gathering place for African American social and recreational activities and it thrived until its self contained uniqueness was undermined by the federal government's urban renewal program and by societal change The story of Lakeland is the tale of a community that was established and flourished in a segregated society and developed its own institutions and traditions including the area's only high school for African Americans built in 1928

one another This book is full of good things New York Times Book Review Everywhere we hear talk of decline of a world that was better once maybe fifty years ago maybe centuries ago but certainly before modernity drew us along its dubious path While some lament the slide of Western culture into relativism and nihilism and others celebrate the trend as a liberating sort of progress Charles Taylor calls on us to face the moral and political crises of our time and to make the most of modernity's challenges The great merit of Taylor's brief non-technical powerful book is the vigor with which he restates the point which Hegel and later Dewey urged against Rousseau and Kant that we are only individuals in so far as we are social Being authentic being faithful to ourselves is being faithful to something which was produced in collaboration with a lot of other people The core of Taylor's argument is a vigorous and entirely successful criticism of two intertwined bad ideas that you are wonderful just because you are you and that respect for difference requires you to respect every human being and every human culture no matter how vicious or stupid Richard Rorty London Review of Books *The Effective Investor* Franco Busetti, 2009-04 Stock markets are not efficient returns are incommensurate with risk investors are irrational bubbles and crashes recur regularly analysts are usually wrong economists even more so luck is mostly mistaken for skill myths and misconceptions abound and most of the industry participants are simply noise generators This is even more true for emerging markets South Africa can be termed a developed emerging market and is the newest member of the BRICS group The Effective Investor is the first book to deal specifically with investing in the South African stock market filling a surprising gap given the widespread interest that has been shown in South Africa as an emerging market and the gateway to the resource rich African continent Understanding the South African market provides insight into the paths that emerging and frontier markets will follow in future While the investment lessons from the South African market outlined in this book are universal understanding some of its peculiarities is also important For example some insight into the behaviour of the currency the rand is clearly critical in terms of any investment in this market as well as in providing some understanding of other volatile emerging market currencies as well as because it is often treated as the most liquid proxy for these currencies particularly during upheavals Similarly the techniques highlighted in the book for dealing with volatility are applicable to similar markets elsewhere South Africa is also an attractive market in its own right It has been the third best performing stock market in the world since 1900 and has weathered the great financial crisis with flying colors The book provides readers with the findings of leading edge research conducted into the South African stock market the results of which are normally reserved for professional institutions and is written by a practicing top rated investment professional The book also has guest contributions from some of South Africa's most astute professional analysts and fund managers on their specific areas of expertise providing exceptional insight into current investment thinking The Effective Investor is essential reading for every potential novice or professional investor and investment adviser in emerging markets who wants to understand the most important principles of the South African stock market to ensure successful investing *Creating Capabilities* Martha

C. Nussbaum, 2013-05-13 If a country's Gross Domestic Product increases each year but so does the percentage of its people deprived of basic education, health care, and other opportunities, is that country really making progress? If we rely on conventional economic indicators, can we ever grasp how the world's billions of individuals are really managing? In this powerful critique, Martha Nussbaum argues that our dominant theories of development have given us policies that ignore our most basic human needs for dignity and self-respect. For the past twenty-five years, Nussbaum has been working on an alternate model to assess human development: the Capabilities Approach. She and her colleagues begin with the simplest of questions: What is each person actually able to do and to be? What real opportunities are available to them? The Capabilities Approach to human progress has until now been expounded only in specialized works. *Creating Capabilities*, however, affords anyone interested in issues of human development a wonderfully lucid account of the structure and practical implications of an alternate model. It demonstrates a path to justice for both humans and nonhumans, weighs its relevance against other philosophical stances, and reveals the value of its universal guidelines, even as it acknowledges cultural difference. In our era of unjustifiable inequity, Nussbaum shows how, by attending to the narratives of individuals and grasping the daily impact of policy, we can enable people everywhere to live full and creative lives.
