taking into consideration various properties of the insured object and the policy holder Introduced by British actuaries generalized linear models GLMs have become today a the standard approach for tariff analysis The book focuses on methods based on GLMs that have been found useful in actuarial practice and provides a set of tools for a tariff analysis Basic theory of GLMs in a tariff analysis setting is presented with useful extensions of standard GLM theory that are not in common use The book meets the European Core Syllabus for actuarial education and is written for actuarial students as well as practicing actuaries To support reader real data of some complexity are provided at www.math.su.se/GLMbook **The Spanish**

Coastal Systems Juan A. Morales,2018-09-03 This monograph presents the state of art of the geologic knowledge about the Spanish coast obtained through scientific research in the last 30 years From a general point of view coasts are the most quickly changing systems of the Earth This is critical since many human resources such as the main part of economic and social activities are located in the coastal areas Especially in the case of Spain these coasts include cities wide industrial areas including harbor complexes important ecologic systems and our main economic resource tourism Understanding the dynamic functioning of each element of this coast is vital for correct future coastal management so as to solve problems derived from bad plans developed in the last decades of the twentieth century This is a valuable text for advanced graduate students and coastal researchers which connects the specific dynamic functioning of the main Spanish coastal environments and their relationships with human activities [Renault Scénic Service and Repair Manual](#) R. Lean Thinking James P. Womack, Daniel T. Jones,2013-09-26 Lean Thinking was launched in the fall of 1996 just in time for the recession of 1997 It told the story of how American European and Japanese firms applied a simple set of principles called lean thinking to survive the recession of 1991 and grow steadily in sales and profits through 1996 Even though the recession of 1997 never happened companies were starving for information on how to make themselves leaner and more efficient Now we are dealing with the recession of 2001 and the financial meltdown of 2002 So what happened to the exemplar firms profiled in Lean Thinking In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition **Enterprise** ,2004-07 **Learning from Megadisasters** Federica Ranghai, Mikio Ishiwatari,2014-06-26

While not all natural disasters can be avoided their impact on a population can be mitigated through effective planning and preparedness These are the lessons to be learned from Japan s own megadisaster the Great East Japan Earthquake of 2011 the first disaster ever recorded that included an earthquake a tsunami a nuclear power plant accident a power supply failure and a large scale disruption of supply chains It is a sad fact that poor communities are often hardest hit and take the longest to recover from disaster Disaster risk management DRM should therefore be taken into account as a major development challenge and countries must shift from a tradition of response to a culture of prevention and resilience

Learning from Megadisasters Lessons from the Great East Japan Earthquake consolidates a set of 36 Knowledge Notes research results of a joint study undertaken by the Government of Japan and the World Bank These notes highlight key lessons learned in seven DRM thematic clusters structural measures nonstructural measures emergency response reconstruction planning hazard and risk information and decision making the economics of disaster risk risk management and risk financing and recovery and relocation Aimed at sharing Japanese cutting edge knowledge with practitioners and decision makers this book provides valuable guidance to other disaster prone countries for mainstreaming DRM in their development policies and weathering their own natural disasters

Food Colour and Appearance Hutchings,2012-12-06 Much of man's behaviour is controlled by appearance but the appearance of his food is of paramount importance to his health and well being In day to day survival and marketing situations we can or not most foods are fit to eat from their optical tell whether properties Although vision and colour perception are the means by which we appreciate our surroundings visual acceptance depends on more than just colour It depends on total appearance In the recent past the food technologist has been under pressure to increase his/her understanding of first the behaviour of raw materials under processing and second the behaviour and motivation of his/her customers in a growing more discriminating and worldwide market The chapters which follow describe the philosophy of total appearance the factors comprising it and its application to the food industry Included are considerations of the evolutionary historical and cultural aspects of food appearance the physics and food chemistry of colour and appearance the principles of sensory appearance assessment and appearance profile analysis as well as instrumental measurement the interaction of product appearance control and acceptance in the varied environments of the laboratory production line supermarket home and restaurant A broad examination has been made in an attempt to get into perspective the importance of appearance to all sectors of the industry

Contested Waterscapes in the Mekong Region François Molle,Tira Foran,Mira Kakonen,2012 The water resources of the Mekong river catchment area from China through Thailand Cambodia and Laos to Vietnam are increasingly contested Governments companies and banks are driving new investment in roads dams diversions irrigation schemes navigation facilities power plants and other emblems of conventional development Their plans and interventions pose multiple burdens and risks to the livelihoods of millions of people dependent on wetlands floodplains fisheries and aquatic resources
