Project Peer Review American Society of Civil Engineers,1990 **A Study of Technical Engineering Peer Reviews at Nasa** Lawrence P. Chao,Nasa Technical Reports Server (Ntrs),Et Al,2013-07 This report describes the state of practices of design reviews at NASA and research into what can be done to improve peer review practices There are many types of reviews at NASA required and not formalized and informal programmatic and technical Standing project formal reviews such as the Preliminary Design Review and Critical Design Review are a required part of every project and mission development However the technical engineering peer reviews that support teams work on such projects are informal some times ad hoc and inconsistent across the organization The goal of this work is to identify best practices and lessons learned from NASA s experience supported by academic research and methodologies to ultimately improve the process This research has determined that the organization composition scope and approach of the reviews impact their success Failure Modes and Effects Analysis FMEA can identify key areas of concern before or in the reviews Product definition tools like the Project Priority Matrix engineering focused Customer Value Chain Analysis CVCA and project or system based Quality Function Deployment QFD help prioritize resources in reviews The use of information technology and structured design methodologies can strengthen the engineering peer review process to help NASA work towards error proofing the design process **Peer Reviews in Software** Karl Eugene Wieggers,2002 This practical introduction to peer reviews covers different methods of peer review from the formal method of inspection to other less formal methods and addresses the cultural and practical aspects of both **Peer Review in the Department of Energy-Office of Science and Technology** National Research Council,Commission on Geosciences, Environment and Resources,Committee on the Department of Energy-Office of Science and Technology's Peer Review Program,1997-11-01 The Office of Science and Technology OST of the U S Department of Energy s DOE s Office of Environmental Management EM recently has instituted a peer review program that uses the American Society of Mechanical Engineers ASME with administrative and technical support provided by the Institute for Regulatory Science RSI to conduct peer reviews of technologies or groups of technologies at various stages of development OST asked the NRC to convene an expert committee to evaluate the effectiveness of its new peer review program and to make specific recommendations to improve the program if appropriate This is the first of two reports to be prepared by this committee on OST s new peer review program OST requested this interim report to provide a preliminary assessment of OST s new peer review program In the final report the committee will provide a more detailed assessment of OST s peer review program after its first complete annual cycle *Peer Review in Environmental Technology Development Programs* National Research Council,Commission on Geosciences, Environment and Resources,Board on Radioactive Waste Management,Committee on the Department of Energy-Office of Science and Technology's Peer Review Program,1999-03-01

Peer Review and Design Competition in the NNSA National Security Laboratories National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Laboratory Assessments Board, Committee on Peer Review and Design Competition Related to Nuclear Weapons, 2016-01-07 The National Nuclear Security Administration

NNSA is responsible for providing and maintaining the capabilities necessary to sustain a safe secure and reliable nuclear weapons stockpile for the nation and its allies Major responsibility for meeting the NNSA missions falls to the three NNSA laboratories Los Alamos National Laboratory LANL Lawrence Livermore National Laboratory LLNL and Sandia National Laboratories SNL The NNSA National Security Laboratories contribute to that goal by maintaining the skills and capabilities necessary for stewardship of a reliable nuclear stockpile and also by maintaining a high level of technical credibility which is a component of the nuclear deterrent Since 1992 it has been U S policy not to conduct explosion tests of nuclear weapons The resulting technical challenges have been substantial Whereas a nuclear test was in some sense the ultimate peer review of the performance of a particular NEP design the cessation of nuclear testing necessitated a much greater reliance on both intralab and interlab expert peer review to identify potential problems with weapon designs and define the solution space This report assesses the quality and effectiveness of peer review of designs development plans engineering and scientific activities and priorities related to both nuclear and non nuclear aspects of nuclear weapons as well as incentives for effective peer review It also explores how the evolving mission of the NNSA laboratories might impact peer review processes at the laboratories that relate to nuclear weapons

resources development and protection and environmental restoration Many projects that have been pioneering in their concept and bold in their execution were made possible by the creativity and dedication of outstanding scientists engineers and builders The Corps has always had review processes for evaluation of its planning studies and projects with the focus often being largely on the technical aspects In recent years however increased consideration of such factors as environmental impacts economic evaluations political pressures and new paradigms about flood control and management has engendered increased criticism and concern that some of the Corps studies may have led to conclusions recommendations and project decisions that are not adequately supported by the assumptions and analyses that were used The focus of the report is on review of Corps of Engineers studies with careful attention given to the need for independent external reviews by panels of well qualified and impartial experts for large complex and sensitive projects Re-Engineering the Chemical Processing Plant Andrzej Stankiewicz, Jacob A.
