standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain Finding What Works in Health Care also proposes a framework for improving the quality of the science underpinning systematic reviews This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research

The Impact of School Infrastructure on Learning Peter Barrett,Alberto Treves,Tigran Shmis,Diego Ambasz,2019-02-04 The Impact of School Infrastructure on Learning A Synthesis of the Evidence provides an excellent literature review of the resources that explore the areas of focus for improved student learning particularly the aspiration for accessible well built child centered synergetic and fully realized learning environments Written in a style which is both clear and accessible it is a practical reference for senior government officials and professionals involved in the planning and design of educational facilities as well as for educators and school leaders Yuri Belfali Head of Division Early Childhood and Schools OECD Directorate for Education and Skills This is an important and welcome addition to the surprisingly small evidence base on the impacts of school infrastructure given the capital investment involved It will provide policy makers practitioners and those who are about to commission a new build with an important and comprehensive point of reference The emphasis on safe and healthy spaces for teaching and learning is particularly welcome Harry Daniels Professor of Education Department of Education Oxford University UK This report offers a useful library of recent research to support the connection between facility quality and student outcomes At the same time it also points to the unmet need for research to provide verifiable and reliable information on this connection With such evidence decisionmakers will be better positioned to accurately balance the allocation of limited resources among the multiple competing dimensions of school policy including the construction and maintenance of the school facility David Lever K 12 Facility Planner Former Executive Director of the Interagency Committee on School Construction Maryland Many planners and designers are seeking a succinct body of research defining both the issues surrounding the global planning of facilities as well as the educational outcomes based on the quality of the space provided The authors have finally brought that body of evidence together in this well structured report The case for better educational facilities is clearly defined and resources are succinctly identified to stimulate the dialogue to come We should all join this conversation to further the process of globally enhancing learning environment quality David Schrader AIA Educational Facility Planner and Designer Former Chairman of the Board of Directors Association for Learning Environments A4LE

ESG and Responsible Institutional Investing Around the World: A Critical Review Pedro Matos, 2020-05-29 This survey examines the vibrant academic literature on environmental social and governance ESG investing While there is no consensus on the exact list of ESG issues responsible investors increasingly assess stocks in their portfolios based on nonfinancial data on environmental impact e g carbon emissions social impact e g employee satisfaction and governance attributes e g board structure The objective is to reduce exposure to investments that pose greater ESG risks or to influence companies to become more sustainable One active area of research at present involves assessing portfolio risk exposure to climate change This literature review focuses on institutional investors which have grown in importance such that they have now become the largest holders of shares in public companies globally Historically institutional investors tended to concentrate their ESG efforts mostly on corporate governance the G in ESG These efforts included seeking to eliminate provisions that restrict shareholder rights and enhance managerial power such as staggered boards supermajority rules golden parachutes and poison pills Highlights from this section There is no consensus on the exact list of ESG issues and their materiality The ESG issue that gets the most attention from institutional investors is climate change in particular their portfolio companies exposure to carbon risk and stranded assets Investors should be positioning themselves for increased regulation with the regulatory agenda being more ambitious in the European Union than in the United States Readers might come away from this survey skeptical about the potential for ESG investing to affect positive change I prefer to characterize the current state of the literature as having a healthy dose of skepticism with much more remaining to be explored Here I hope the reader comes away with a call to action For the industry practitioner I believe that the investment industry should strive to achieve positive societal goals CFA Institute provides an exemplary case in its Future of Finance series www.cfainstitute.org/research/future-finance For the academic community I suggest we ramp up research aimed at tackling some of the open questions around the pressing societal goals of ESG investing I am optimistic that practitioners and academics will identify meaningful ways to better harness the power of global financial markets for addressing the pressing ESG issues facing our society
