Investigating Iwo Breanne Robertson, 2019 Investigating Iwo encourages us to explore the connection between American visual culture and World War II particularly how the image inspired Marines servicemembers and civilians to carry on with the war and to remember those who made the ultimate sacrifice to ensure victory over the Axis Powers Chapters shed light on the processes through which history becomes memory and gains meaning over time The contributors ask only that we be willing to take a closer look to remain open to new perspectives that can deepen our understanding of familiar topics related to the flag raising including Rosenthal's famous picture that continue to mean so much to us today

A Certain Age Rudolf Mrázek, 2010-04-16 A Certain Age is an unconventional evocative work of history and a moving reflection on memory, modernity, space, time, and the limitations of traditional historical narratives. Rudolf Mrázek visited Indonesia throughout the 1990s, recording lengthy interviews with elderly intellectuals in and around Jakarta. With few exceptions, they were part of an urban elite born under colonial rule and educated at Dutch schools. From the early twentieth century through the late colonial era, the national revolution, and well into independence after 1945, these intellectuals injected their ideas of modernity, progress, and freedom into local and national discussion. When Mrázek began his interviews, he expected to discuss phenomena such as the transition from colonialism to postcolonialism. His interviewees, however, wanted to share more personal recollections. Mrázek illuminates their stories of the past with evocative depictions of their late twentieth-century surroundings. He brings to bear insights from thinkers including Walter Benjamin, Bertold Brecht, Le Corbusier, and Marcel Proust, and from his youth in Prague, another metropolis with its own experience of passages and revolution. Architectural and spatial tropes organize the book. Thresholds, windowsills, and sidewalks come to seem more apt as descriptors of historical transitions than colonial and postcolonial or modern and postmodern. Asphalt roads, homes, classrooms, fences, and windows organize movement, perceptions, and selves in relation to others. A Certain Age is a portal into questions about how the past informs the present and how historical accounts are inevitably partial and incomplete.

Khobar Towers: Tragedy and Response Perry D. Jamieson, 2008 This account of the Khobar Towers bombing tells the story of the horrific attack and the magnificent response of airmen doing their duty under nearly impossible circumstances. None of them view their actions as heroic, yet the reader will marvel at their calm professionalism. All of them say it was just their job, but the reader will wonder how they could be so well trained to act almost instinctively to do the right thing at the right time. None of them would see their actions as selfless, yet countless numbers refused medical attention until the more seriously injured got treatment. Throughout this book, the themes of duty, commitment, and devotion to comrades resoundingly underscore the notion that America's brightest, bravest, and best wear her uniforms in service to the nation. This book is more than heroic actions, though, for there is also controversy. Were commanders responsible for not adequately protecting their people? What should one make of the several conflicting investigations following the attack? Dr. Jamieson has not shied away from these difficult questions and others but has discussed them and other controversial judgments in a straightforward and dispassionate way that will bring them into focus for everyone. It is clear from this book that there is a larger issue than just the response to the bombing: it is the issue of the example set by America's airmen. Future airmen who read this book will be stronger and will stand on the shoulders of those who suffered and those who made the ultimate sacrifice.

Wingless Flight R. Dale Reed, Darlene Lister, Much has been written about the famous conflicts and battlegrounds of the East during the American Revolution Perhaps less familiar but equally important and exciting was the war on the western frontier where Ohio Valley settlers fought for the land they had claimed and for their very lives George Rogers Clark stepped forward to organize the local militias into a united front that would defend the western frontier from Indian attacks Clark was one of the few people who saw the importance of the West in the war effort as a whole and he persuaded Virginia's government to lend support to his efforts As a result Clark was able to cross the Ohio saving that part of the frontier from further raids Lowell Harrison captures the excitement of this vital part of American history while giving a complete view of George Rogers Clark's significant achievements Lowell H Harrison is a professor emeritus of history at Western Kentucky University and is the author or co author of numerous books including *Lincoln of Kentucky A New History of Kentucky and Kentucky's Governors*
