World brings together specialists from various disciplines and scholars with policy-making and high-level government and administrative experience to discuss the historical, sociological, and philosophical issues associated with teacher education in a global context. Edited by Rosa Bruno-Jofré and James Scott Johnston, two leading scholars of the history and philosophy of education, this collection offers both analytical and practical insights into the present and future state of teacher education. Among the topics examined are paradigmatic

changes in teacher education, the impact of the Bologna process in Europe, Indigenous education, and state policies in a transnational context. With contributors from nine countries on four continents, Teacher Education in a Transnational World offers a genuinely international interdisciplinary examination of the challenges and opportunities associated with teacher education in the twenty-first century. Covering a wide range of issues, the 22 cases included in Case Studies in Canadian Health Policy and Management constitute an exceptional resource for

bringing real-life policy questions into the classroom. Based on actual events, the cases have been developed with input from mid-career professionals with strong field experience and extensively tested in Raisa B. Deber's graduate case study seminar at the University of Toronto. Each case features both a substantive health policy issue and a selection of key concepts and methods appropriate to examining public policy, public health, and health care management issues. In each case, the authors provide a summary of the case and the related policy

issues, a description of events, suggested questions for discussion, supporting information, and both works cited and further reading. Suitable for graduate and undergraduate classrooms in programs in a variety of fields, Case Studies in Canadian Health Policy and Management is an exceptional educational resource.
