Economic Growth and the Middle Class in an Economy in Transition Zoya Nissanov,2017-01-24 This book studies the evolution of the middle class in Russia after the fall of the Soviet Union Using data from the RLMS Russian Longitudinal Monitoring Survey the volume covers the period of transition 1991 2008 during which many fundamental economic reforms were implemented The first part of the book is devoted to a discussion of the concept of middle class and a description of the economic situation in Russia during the transition period Particular attention is given to variations in the distribution of Russian incomes and the estimated importance of the middle class The second part of the book focuses on the link between the middle class and income bipolarization The third and last section of the book uses the semiparametric mixture model to discover how many different groups may be derived from the income distribution in Russia as well as what the main socio economic and demographic characteristics of those groups are The mobility of households into and out of the middle class during the transition period is also studied in hopes of determining the factors that contribute to such mobility Using rigorous empirical methods this volume sheds light on a relatively unstudied economic group and provides insight for countries which are about to enter a transition period As such this book will be of great interest to researchers in economics and inequality as well as professionals and practitioners working with international organizations

Economics in One Lesson Henry Hazlitt,2010-08-11 With over a million copies sold Economics in One Lesson is an essential guide to the basics of economic theory A fundamental influence on modern libertarianism Hazlitt defends capitalism and the free market from economic myths that persist to this day Considered among the leading economic thinkers of the Austrian School which includes Carl Menger Ludwig von Mises Friedrich F A Hayek and others Henry Hazlitt 1894 1993 was a libertarian philosopher an economist and a journalist He was the founding vice president of the Foundation for Economic Education and an early editor of The Freeman magazine an influential libertarian publication Hazlitt wrote Economics in One Lesson his seminal work in 1946 Concise and instructive it is also deceptively prescient and far reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of Economics in One Lesson Hazlitt s focus on non governmental solutions strong and strongly reasoned anti deficit position and general emphasis on free markets economic liberty of individuals and the dangers of government intervention make Economics in One Lesson every bit as relevant and valuable today as it has been since publication

Behavioral Science & Policy: Volume 2, Issue 1 Craig Fox,Sim B. Sitkin,2016-11-22 The success of nearly all public and private sector policies hinges on the behavior of individuals groups and organizations Today such behaviors are better understood than ever thanks to a growing body of practical behavioral science research However policymakers often

are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad, with topics spanning health care, financial decisionmaking, energy, and the environment, education, and culture, justice, and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective.

After Piketty
Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08
A Foreign Affairs Best Book of the Year
An intellectual excursion of a kind rarely offered by modern economics.
Foreign Affairs
Thomas Piketty's *Capital in the Twenty First Century* is the most widely discussed work of economics in recent years. But are its analyses of inequality and economic growth on target? Where should researchers go from there in exploring the ideas Piketty

pushed to the forefront of global conversation A cast of leading economists and other social scientists including Emmanuel Saez Branko Milanovic Laura Tyson and Michael Spence tackle these questions in dialogue with Piketty A fantastic introduction to Piketty s main argument in Capital and to some of the main criticisms including doubt that his key equation showing that returns on capital grow faster than the economy will hold true in the long run Nature Piketty s work laid bare just how ill equipped our existing frameworks are for understanding predicting and changing inequality This extraordinary collection shows that our most nimble social scientists are responding to the challenge Justin Wolfers University of Michigan

Health Economics from Theory to Practice Simon Eckermann,2017-03-20 This book provides a robust set of health economic principles and methods to inform societal decisions in relation to research reimbursement and regulation pricing and

monitoring of performance in practice We provide a theoretical and practical framework that navigates to avoid common biases and suboptimal outcomes observed in recent and current practice of health economic analysis as opposed to claiming to be comprehensive in covering all methods Our aim is to facilitate efficient health system decision making processes in research reimbursement and regulation which promote constrained optimisation of community outcomes from a societal perspective given resource constraints available technology and processes of technology assessment Importantly this includes identifying an efficient process to maximize the potential that arises from research and pricing in relation to existing technology under uncertainty given current evidence and associated opportunity costs of investment Principles and methods are identified and illustrated across health promotion prevention and palliative care settings as well as treatment settings Health policy implications are also highlighted

Adapt and Be Adept Terry L. Anderson, 2021-04-01 How can markets help us adapt to the challenges of climate change Editor Terry L Anderson brings together this collection of essays featuring the work of nine leading policy analysts who argue that market forces are just as important as government regulation in shaping climate policy and should be at the heart of our response to helping societies adapt to climate change Anderson notes in his introduction that most current climate policies such as the Paris Agreement require hard to enforce collective action and focus on reducing or mitigating greenhouse gases rather than adapting to their negative effects Adaptive actions can typically deliver much more faster and more cheaply than any realistic climate policy The authors tackle a range of issues the hidden costs of renewable energy sources the political obstacles surrounding climate change policy insurance and financial instruments for pricing risk of exposure to the effects of climate change and more Reliance on emerging renewable energies and a carbon tax are not enough to prevent the effects of global warming they argue We must encourage more private action and market incentives to adapt to a rapidly changing climate

Too Many Children Left Behind Bruce Bradbury, Miles Corak, Jane Waldfogel, Elizabeth Washbrook, 2015-06-30 The belief that with hard work and determination all children have the opportunity to succeed in life is a cherished part of the American Dream Yet increased inequality in America has made that dream more difficult for many to obtain In Too Many Children Left Behind an international team of social scientists assesses how social mobility varies in the United States compared with Australia Canada and the United Kingdom Bruce Bradbury Miles Corak Jane Waldfogel and Elizabeth Washbrook show that the academic achievement gap between disadvantaged American children and their more advantaged peers is far greater than in other wealthy countries with serious consequences for their future life outcomes With education the key to expanding opportunities for those born into low socioeconomic status families Too Many Children Left Behind helps us better understand educational disparities and how to reduce them Analyzing data on 8 000 school children in the United States the authors demonstrate that disadvantages

that begin early in life have long lasting effects on academic performance The social inequalities that children experience before they start school contribute to a large gap in test scores between low and high SES students later in life Many children from low SES backgrounds lack critical resources including books high quality child care and other goods and services that foster the stimulating environment necessary for cognitive development The authors find that not only is a child's academic success deeply tied to his or her family background but that this class based achievement gap does not narrow as the child proceeds through school The authors compare test score gaps from the United States with those from three other countries and find smaller achievement gaps and greater social mobility in all three particularly in Canada The wider availability of public resources for disadvantaged children in those countries facilitates the early child development that is fundamental for academic success All three countries provide stronger social services than the United States including universal health insurance universal preschool paid parental leave and other supports The authors conclude that the United States could narrow its achievement gap by adopting public policies that expand support for children in the form of tax credits parenting programs and pre K With economic inequalities limiting the futures of millions of children Too Many Children Left Behind is a timely study that uses global evidence to show how the United States can do more to level the playing field

Noncognitive Skills and Their Influencing Factors for Children Jinyan Zhou, 2021-12-19 Non cognitive skills are often used to refer to those skills that do not fall within the cognitive category but to describe a stable pattern of thought feeling and behavior in different situations and backgrounds with profitable and investable characteristics such as conscientiousness perseverance and teamwork which are critically important in education However for many years non cognitive skills have always been ignored in human capital theory The book using a multidisciplinary approach tries to uncover the noncognitive components of human capital so as to answer the question what is the skill that should be invested in The author expands the connotations of human capital by exploring the value of noncognitive skills and their production patterns constructing a measurement framework and a set of tools to measure noncognitive skills She especially carries out an empirical survey which covers primary and secondary school students from seven provinces of China's east middle and west areas With the data collected she analyzes Chinese students noncognitive development and further identifies the critical factors that may impact their noncognitive skills by applying the Bayesian Model Average approach The book will be a theoretical contribution to education economics Researchers interested in education in China children's development and policymakers in the field of education will find this book helpful and resourceful

Excellence Gaps in Education Jonathan A. Plucker, Scott J. Peters, 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of recent education reform has been on closing gaps in achievement

between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies including universal screening flexible grouping targeted programs and psychosocial interventions Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high potential students from underrepresented backgrounds

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on

basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
