Recovering Black Storytelling in Qualitative Research Jan 31 2022 This research-based book foregrounds Black narrative traditions and honors alternative methods of data collection, analysis, and representation. Toliver presents a semi-fictionalized narrative in an alternative science fiction setting, refusing white-centric qualitative methods and honoring the ways of the griots who were the scholars of their African nations. By utilizing Black storytelling, Afrofuturism, and womanism as an onto-epistemological tool, this book asks readers to elevate Black imaginations, uplift Black dreams, and consider how Afrofuturity is qualitative futurity. By centering Black girls, the book considers the ethical responsibility of researchers to focus upon the words of our participants, not only as a means to better understand our historic and current world, but to better situate inquiry for what the future world and future research could look like. Ultimately, this book decenters traditional, white-centered qualitative methods and utilizes Afrofuturism as an onto-epistemological tool and ethical premise. It asks researchers to consider how we move forward in data collection, data analysis, and data representation by centering how Black girls reclaim and recover the past, counter negative and elevate positive realities that exist in the present, and create new possibilities for the future. The semi-fictionalized narrative of the book highlights the intricate methodological and theoretical work that undergirds the story. It will be an important text for both new and seasoned researchers interested in social justice. Informed and anti-racist researchers will find Endarkened storywork a useful tool for educational, cultural, and social critiques now and in the future.

SAGE Qualitative Research Methods Apr 21 2021 SAGE has been a major force shaping the field of qualitative methods, not just in its specialist methods journals like Qualitative Inquiry but in the 'empirical' journals such as Social Studies of Science. Delving into SAGE's deep backlist of qualitative research methods journals, Paul Atkinson and Sara Delmont, editors of Qualitative Research, have selected over 70 articles to represent SAGE's distinctive contribution to methods publishing in general and qualitative research in particular. This collection includes research from the past four decades and addresses key issues or controversies, such as: explanations and defences of qualitative methods; ethics; research questions and foreshadowed problems; access; first days in the field; field roles and rapport; practicalities of data collection and recording; data analysis; writing and (re) presentation; the rise of auto-ethnography; life history, narrative and autobiography; CA and DA; and alternatives to the logocentric (such as visual methods).
