Re-Envisioning and Restructuring Blended Learning for Underprivileged Communities Jun 30 2021

Challenges in the educational arena are not new phenomena. However, with the recent outbreak of COVID-19 pandemic, researchers and educators have been made even more aware of the need for a paradigm shift in education. Blended learning, as opposed to fully online learning or traditional face-to-face teaching, has been well-researched and has been found to have the potential to provide educational solutions in challenging contexts. These contexts range from pandemic situations where social distancing is the order of the day to financial and time constraints regarding full-time staff as well as limited physical capacity at institutions. Blended learning solutions are often designed for resourceful institutions and cannot be easily implemented in developing countries and in communities where resources are limited. Typical issues like connectivity, accessibility, lack of suitable devices, and affordability need to be taken into consideration and in cognizance of blended learning interventions. These challenges are often neglected in blended learning research but are critical discussions. Re-Envisioning and Restructuring Blended Learning for Underprivileged Communities shares how institutions in the developing world and less privileged communities have re-imagined and restructured blended education to enhance teaching and learning for underprivileged communities. This book addresses blended learning solutions across institutional, program, course, and activity levels. The chapters will cover a variety of learning environments, from rural settings to less developed countries and more, and explore the programs and courses designed to improve student success and achievement in diverse student populations. This book is ideally intended for teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students who are interested in blended learning opportunities in less-privileged settings and to underserved and marginalized populations.

Building a Trauma-Informed Restorative School May 10 2022 Covering both theory and practice, this book will teach educators everything they need to know about developing restorative practices in education settings, in a way that is also trauma-informed. The first part of the book addresses the theory and philosophy of restorative approaches, and of trauma-informed and trauma-sensitive schools. The second part outlines the five restorative skills (mindfulness, honest expression, empathy, the art of asking questions and the art of requests), what they look like in practice (including using circles, agreements and restorative dialogue), and how to implement them. Every strategy is clearly explained and adapted to be appropriate for children and adults who have experienced trauma. Everything in this book discusses has been especially designed to be adapted for different school settings and to address particular challenges.

The Social Studies Teacher's Toolbox Apr 30 2024 Social studies teachers will find classroom-tested lessons and strategies that can be easily implemented in the classroom. The Teacher's Toolbox is an innovative, research-based resource providing teachers with instructional strategies for students at all levels and abilities. Each book in the collection focuses on a specific content area. Clear, concise guidance enables teachers to quickly integrate low-prep, high-value lessons and strategies into middle school and high school classrooms. Every strategy follows a practical, how-to format created by the series editors. The Social Studies Teacher's Toolbox contains hundreds of student-friendly classroom lessons and teaching strategies. Clear and concise chapters, fully aligned to Common Core Social Studies standards and National Council for the Social Studies standards, cover the underlying research, technology based options, practical classroom use, and modification of each high-value strategy. This book employs a hands-on approach to help educators quickly learn and apply methods and techniques in their social studies courses. Topics range from reading and writing

studies and tools for analysis, to conducting formative and summative assessments, differentiated instruction, motivating students, incorporating social and emotional learning and culturally responsive teaching. Easy-to-read content shows how and why social studies should be taught and how to make connections across history, geography, political science, and beyond. Designed to reduce instructional preparation time and increase relevance, student engagement, and comprehension, this book: the usefulness, application, and potential drawbacks of each instructional strategy Provides fun activities applicable to all classrooms Helps social studies teachers work with ELLs, advanced learners, and students with learning differences Offers real-world guidance for addressing current events, covering standards and working with textbooks The Social Studies Teacher's Toolbox is an invaluable source of real-world lessons, strategies, and techniques for general education teachers and social studies specialists, as well as resource specialists/special education teachers, elementary and middle school educators, and teacher educators.
