The Moon Over the Mountain, and Other Stories Nov 30 2023 "The Moon Over the Mountain is a collection of nine short stories by the Japanese author Atsushi Nakajima. Something of a cult figure in Japan, where fans hold an annual festival in his honor, Nakajima is considered a master of a sub-genre of Japanese fictional works that take Ancient China as their subject, with stories based on folk tales, legends, and historical figures..Nakajima's stories first appeared in Japanese periodicals in 1942 and 1943, promising a potentially rich and long career, given his extensive knowledge and skills. He died tragically of pneumonia complicated by severe asthma after returning to Japan from the island of Palau in 1942. In masterful translations by Paul McCarthy and Nobuko Ochner, these are the first of his works to appear in English. "--Publisher.

Chasing the Smokies Moon May 01 2021 Before she went missing, Susan  
Clements was hiking with her daughter on one of the most popular  
trails in Great Smoky Mountains National Park, less than a mile from  
Clingmans Dome. When Nancy East's search and rescue team joined the  
effort to find her, she learned Susan was a mother to three children  
who adored her. What Nancy didn't know then was how much the search  
for Susan would impact and influence her own life's path afterward.  
Two years later, Nancy and her good friend, Chris Ford, set out to  
improve the speed record of hiking all 801 miles of trail in Great  
Smoky Mountains National Park while raising funds for hiker safety and  
preparedness. While chasing the record, the duo faced tropical storm

rains, swollen, unbridged creek crossings, injuries, night hiking, and wildlife encounters. Their arduous journey also became intertwined in one of the most rare human-bear tragedies in the park's history. Maintaining a positive mental attitude was their superpower through it all. The enormous feat of endurance was one of the most grueling endeavors that Nancy, a mother and everyday athlete, had ever faced. However, the hardest things she had endured were in her past. The strength she gained from those experiences was now moving her forward, one difficult step at a time. Chasing the Smokies Moon is a story of grief, hope, empowerment, and love, and the thread that binds them all. ADVANCE PRAISE FOR CHASING THE SMOKIES MOON "If you think that setting trail records is about speed and hubris, Nancy East will prove you wrong. It is not her success, but her vulnerability that will encourage you to keep moving forward when the next step feels impossible. It is not her impressive miles, but rather her insightful reflections that allow you to recognize feelings of gratitude and connectedness in the midst of pain and loss. And it is not her attributes as a hiker, but her roles as a mother, spouse, and friend that make this book a valuable resource for anyone who is trying to navigate through relationships - and adventure." --Jennifer Pharr Davis, author of *The Pursuit of Endurance: Harnessing the Record-Breaking Power of Strength and Resilience* "I have always thought of Nancy East as somewhat of a real life superhero -- this harrowing and transparent account of her FKT attempt and SAR fundraising effort has certainly solidified that sentiment!" --Steven Reinhold, *Backpacker Magazine*, Brand Ambassador "Chasing the Smokies Moon is a deep dive into the depths of a Fastest Known Time record attempt. East relays with humor, profundity, and humility the highs and lows of an intense journey through the Great Smoky Mountains and human connection." --Heather Anderson, author of *Mud, Rocks, Blazes: Letting Go on the Appalachian Trail* "This story is more than just a recounting of an incredible feat of endurance and perseverance, it is an insightful and revealing look into the mind and soul of multi faceted adventurous woman." --Kevin Fitzgerald, former Deputy Superintendent of Great Smoky Mountains National Park

**The Moon** Jun 13 2022 Julius Schmidt was one of the finest astronomical observers of his time, and his detailed map of the Moon surpassed anything that had come before. Today, the German astronomer and geophysicist has remained a largely neglected figure, despite being one of the most important players in the history of lunar studies. This book at last makes accessible Schmidt's highly regarded German work, *Der Mond*. Considered an astronomical classic of the nineteenth century, *Der Mond* remained without a proper English counterpart for the last century and a half, until now. The author's faithful English translation provides readers with much-needed access into Schmidt's original publication, with the aim of showing the

community just how vital his work and legacy have been in the international field of selenography.

**The Book of the Moon** Sep 04 2021 The BBC's "face of space" explores all things lunar in this comprehensive guide to the folklore, facts, and possible futures of our only natural satellite. Have you ever wondered if there are seasons on the moon or if space tourism will ever become widely accessible? So has Dr. Maggie Aderin-Pocock, astronomer and host of the BBC's docuseries, *The Sky at Night*. In this lucidly written guide, Aderin-Pocock takes readers on a fascinating lunar journey. Aderin-Pocock begins with a basic overview--unpacking everything from the moon's topography and composition to its formation and orbit around the Earth. She examines beliefs held by ancient civilizations, the technology that allowed for the first moon landing,

a brief history of moonazing, and how the moon has influenced culture throughout the years. Looking to the future, she delves into the pros and cons of continued space travel and exploration. Throughout the book are sidebars, graphs, and charts to enhance the facts as well as black-and-white illustrations of the moon and stars.

The Mountains of the Moon Mar 23 2023 "Incidentally this feat of exploration has broken a great tradition. The romance remains ; but it is different In kind.... All the old legends of In accessibility are gone. Those distant hills have been traversed and revealed, their secrets published and shown to differ in no way from the secrets of all other earthly mountains.... Coldness and sterility abide on those heights, and the traveller in the midst of them discovers those qualities rather than any Impression of beauty. Those gaunt masses lack all the colour and vigour of life; the tradition of splendour is proved to be a fraud.... Nevertheless we have not lost our romance, it persists more vital and glorious in the story of human achievement. Mankind is passing out of us childhood, and the fairy tales of the nursery must give way to the more virile romances of man's own endeavour, an endeavour that at the last is expressed in his first and final search for knowledge...." *The Mountains of the Moon*, By Arthur S. Grey

Still, she lived her life with her father's words in mind: "You are no better than anyone else, and nobody else is better than you." In the early 1950s, Katherine was thrilled to join the organization that would become NASA. She worked on many of NASA's biggest projects including the Apollo 11 mission that landed the first men on the moon. Katherine Johnson's story was made famous in the bestselling book and Oscar-nominated film *Hidden Figures*. Now in *Reaching for the Moon* she tells her own story for the first time, in a lively autobiography that will inspire young readers everywhere.

Not Far from the Mountains of the Moon Jun 25 2023

Expedition to the Mountains of the Moon Apr 04 2024 It is 1863, but not the one it should be. Time has veered wildly off course, and now the first moves are being made that will lead to a devastating world war and the fall of the British Empire. Caught in a tangled web of cause, effect, and inevitability, little does Burton realize that the stakes are far higher than even he suspects. A final confrontation comes in the mist-shrouded Mountains of the Moon, in war-torn Africa of 1914, and in Green Park, London, where, in the year 1840, Burton must face the man responsible for altering time: Spring Heeled Jack! Burton and Swinburne's third adventure is filled with eccentric steam-driven technology, grotesque characters, and bizarre events, completing the three-volume story arc begun in *The Strange Affair of Spring Heeled Jack* and *The Curious Case of the Clockwork Man*. From the Trade Paperback edition.

The Nile Nov 06 2021 What have we learnt about the Nile since the mid-1970s, the moment when Julian R z ska decided that the time had come to publish a comprehensive volume about the biology, and the geological and cultural history of that great river? And what changes have meanwhile occurred in the basin? The human population has more than doubled, especially in Egypt, but also in East Africa. Locally, industrial development has taken place, and the Aswan High Dam was clearly not the last major infrastructure work that was carried out. More dams have been built, and some water diversions, like the Toshka lakes, have created new expanses of water in the middle of the Sahara desert. What are the effects of all this on the ecology and economy of the Basin? That is what the present book sets out to explore, 33 years after the publication of "*The Nile: Biology of an Ancient River*". Thirty-seven authors have taken up the challenge, and have written the

“new” book. They come from 13 different countries, and 15 among them represent the largest Nilotic states (Egypt, Sudan, Ethiopia, Uganda, and Kenya). Julian Rzóska died in 1984, and most of the – authors of his book have now either disappeared or retired from research. Only Jack Talling and Samir Ghabbour were still available to participate again.
