Lievrouw,Sonia M. Livingstone,2009 **Public Technology Procurement and Innovation** Charles Edquist,Leif Hommen,Lena Tsipouri,2012-12-06 Public Technology Procurement and Innovation studies public technology procurement as an instrument of innovation policy In the past few years public technology procurement has been a relatively neglected topic in the theoretical and research literature on the economics of innovation Similarly preoccupation with supply side measures has led policy makers to avoid making very extensive use of this important demand side instrument These trends have been especially pronounced in the European Union There as this book will argue existing legislation governing public procurement presents obstacles to the use of public technology procurement as a means of stimulating and supporting technological innovation Recently however there has been a gradual re awakening of practical interest in such measures among policy makers in the EU and elsewhere For these and other related measures this volume aims to contribute to a serious reconsideration of public technology procurement from the complementary standpoints of innovation theory and innovation policy **Bastard Culture!** Mirko Tobias Schäfer,2011 The computer and particularly the Internet have been represented as enabling technologies turning consumers into users and users into producers The unfolding online cultural production by users has been framed enthusiastically as participatory culture But while many studies of user activities and the use of the Internet tend to romanticize emerging media practices this book steps beyond the usual framework and analyzes user participation in the context of accompanying popular and scholarly discourse as well as the material aspects of design and their relation to the practices of design and appropriation **Andy Steves' Europe** Andy Steves,2016-05-17 Pick a Weekend Pick a City and Go This award winning travel guide picks up where crowdsourcing leaves off covering the skills you need for spur of the moment trips to Europe s top destinations Follow three day plans to explore each city Learn which cities match your interests and which can be easily combined for a longer trip including itineraries for Amsterdam Barcelona Berlin Budapest Dublin Edinburgh Florence London Madrid Paris Prague Rome and Venice See iconic

The Global Positioning System Scott Pace, 1995 A comprehensive assessment of the challenges and opportunities created by worldwide access to this revolutionary technology

Media, Technology and Society Brian Winston, 2002-09-11 Challenging the popular myth of a present day information revolution Media Technology and Society is essential reading for anyone interested in the social impact of technological change Winston argues that the development of new media forms from the telegraph and the telephone to computers satellite and virtual reality is the product of a constant play off between social necessity and suppression the unwritten law by which new technologies are introduced into society only insofar as their disruptive potential is limited

Practical Research and Evaluation Lena Dahlberg, Colin McCaig, 2010-04-22 This book is a starter DIY text for practitioners who are looking to conduct evaluation studies and research as part of their own professional practice The growing emphasis on evidence based practice means that there is an increasing need for practitioners to have at least a basic understanding of research be aware of methodological pitfalls and to be updated on new methods This book provides a practical user friendly guide to social science research methods for professionals who have benefited from little if any formal research methods training but find themselves in a role that requires them to read and understand complex research findings and carry out their own research as part of their professional practice Practical Research and Evaluation is aimed at

practitioners working in education health social care and community work Many in this market are non graduates or are those whose study did not contain a research element but are required to know how research works This book has three main aims which will benefit this audience to enable readers to carry out small scale research projects of their own provide them with the basic understanding necessary to commission research and enable them to better understand and evaluate critically research reports This book is designed specifically for Do it Yourself researchers working in the public or voluntary sectors It is accessible and relevant to practitioners uses non technical language wherever possible and employs grounded examples practical tips checklists and readings lists throughout

Design for the Real World Victor J. Papanek, 1985 *Design for the Real World* has since its first appearance twenty five years ago become a classic Translated into twenty three languages it is one of the world s most widely read books on design In this edition Victor Papanek examines the attempts by designers to combat the tawdry the unsafe the frivolous the useless product once again providing a blueprint for sensible responsible design in this world which is deficient in resources and energy

Interactive Digital Narrative Hartmut Koenitz, Gabriele Ferri, Mads Haahr, Diğdem Sezen, Tonguç İbrahim Sezen, 2015-04-10 The book is concerned with narrative in digital media that changes according to user input *Interactive Digital Narrative IDN* It provides a broad overview of current issues and future directions in this multi disciplinary field that includes humanities based and computational perspectives It assembles the voices of leading researchers and practitioners like Janet Murray Marie Laure Ryan Scott Rettberg and Martin Rieser In three sections it covers history theoretical perspectives and varieties of practice including narrative game design with a special focus on changes in the power relationship between audience and author enabled by interactivity After discussing the historical development of diverse forms the book presents theoretical standpoints including a semiotic perspective a proposal for a specific theoretical framework and an inquiry into the role of artificial intelligence Finally it analyses varieties of current practice from digital poetry to location based applications artistic experiments and expanded remakes of older narrative game titles

Software Quality - ECSQ 2002 Jyrki Kontio, Reidar Conradi, 2003-08-01 Software professionals and companies live in a new world today Increasingly complex systems need to be built faster and cheaper While many of the established approaches in software quality are still valid the software quality community is going through a paradigm shift that requires a re assessment of our current method and tool portfolio as well as creating new and more effective solutions We have selected two themes for this conference to highlight this paradigm shift Our first theme production of attractive and reliable software at Internet speed sums up the dilemma many software organisations face In order to be competitive software should contain advanced features and run reliably yet it should be developed quickly and cost effectively for the right market window Finding the right balance between these objectives is a critical question that will determine business success in the years to come Our second theme production of software with a dynamic partnership n work highlights the current trend of using partnerships and subcontractors as integral players in the software development

process Partnerships sometimes need to be created quickly to respond to a market opportunity yet the costs and speed of cooperation must be competitive Different companies have different processes quality tools and cultures yet they should cooperate seamlessly for the best result

Pedestrian and Evacuation Dynamics Richard D. Peacock,Kuligowski Erica D.,Jason D. Averill,2011-06-29 An aging population increasing obesity and more people with mobility impairments are bringing new challenges to the management of routine and emergency people movement in many countries These population challenges coupled with the innovative designs being suggested for both the built environment and other commonly used structures e.g transportation systems and the increasingly complex incident scenarios of fire terrorism and large scale community disasters provide even greater challenges to population management and safety *Pedestrian and Evacuation Dynamics* an edited volume is based on the *Pedestrian and Evacuation Dynamics PED 5th International 2010 conference* March 8th 10th 2010 located at the National Institute of Standards and Technology Gaithersburg MD USA This volume addresses both pedestrian and evacuation dynamics and associated human behavior to provide answers for policy makers designers and emergency management to help solve real world problems in this rapidly developing field Data collection analysis and model development of people movement and behavior during nonemergency and emergency situations will be covered as well

Confronting an "Axis of Cyber"? Fabio Rugge,2018-11-02 The new US National Cyber Strategy points to Russia China North Korea and Iran as the main international actors responsible for launching malicious cyber and information warfare campaigns against Western interests and democratic processes Washington made clear its intention of scaling the response to the magnitude of the threat while actively pursuing the goal of

an open secure and global Internet The first Report of the ISPI Center on Cybersecurity focuses on the behaviour of these usual suspects investigates the security risks implicit in the mounting international confrontation in cyberspace and highlights the current irreconcilable political cleavage between these four countries and the West in their respective approaches in and around cyberspace

Failure Analysis Marius Bazu, Titu Bajenescu, 2011-03-08 Failure analysis is the preferred method to investigate product or process reliability and to ensure optimum performance of electrical components and systems The physics of failure approach is the only internationally accepted solution for continuously improving the reliability of materials devices and processes The models have been developed from the physical and chemical phenomena that are responsible for degradation or failure of electronic components and materials and now replace popular distribution models for failure mechanisms such as Weibull or lognormal Reliability engineers need practical orientation around the complex procedures involved in failure analysis This guide acts as a tool for all advanced techniques their benefits and vital aspects of their use in a reliability programme Using twelve complex case studies the authors explain why failure analysis should be used with electronic components when implementation is appropriate and methods for its successful use Inside you will find detailed coverage on a synergistic approach to failure modes and mechanisms along with reliability physics and the failure analysis of materials emphasizing the vital importance of cooperation between a product development team involved the reasons why failure analysis is an important tool for improving yield and reliability by corrective actions the design stage highlighting the concurrent engineering approach and DfR Design for Reliability failure analysis during fabrication covering reliability monitoring process monitors and package reliability reliability testing after fabrication including reliability assessment at this stage and corrective actions a large variety of methods such as electrical methods thermal methods optical methods electron microscopy mechanical methods X Ray methods spectroscopic acoustical and laser methods new challenges in reliability testing such as its use in microsystems and nanostructures This practical yet comprehensive reference is useful for manufacturers and engineers involved in the design fabrication and testing of electronic components devices ICs and electronic systems as well as for users of components in complex systems wanting to discover the roots of the reliability flaws for their products

Professionalism in the Information and Communication Technology Industry John Weckert, Richard Lucas, 2013-10-15 Professionalism is arguably more important in some occupations than in others It is vital in some because of the life and death decisions that must be made for example in medicine In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation The core idea behind this book is that Information and Communication Technology ICT is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind
