Genetics – Test Cross

1. In fruit flies, red eyes are dominant over sepia (brownish) eyes. Being the great genetic student that you are, you happen to have a culture of pure red eye and pure sepia eye flies in your laboratory. While working in your lab late one night, a cute, fuzzy, and fantastically friendly, red eyed fruit fly came in for a crash landing on your banana. Wanting (naturally) to know more about your new friend, you decide to run a test-cross on your little, buzzing buddy.

- a. Give the phenotypes of the flies in your test-cross: _____ rr (tester) _____ X _____ R? (unknown) _____
- b. If all of the offspring turn out to be red-eyed (all 347 of them!!!) what would the genotypes of the flies used in your test-cross? (Use "R" and "r")

_____ rr _____ X _____ RR _____ Diagram the cross:

Genotypic ratio = _____ 1Rr:0 _____
 Phenotypic ratio = _____ 1 Red-eyed:0 _____

	r	r
R	Rr	Rr
R	Rr	Rr

- c. If about 179 of the 347 show up with sepia eyes, what was the actual genotype of your new found friend? _____ Rr (1/2 will be the recessive form) _____

Genetics – X Linked Genes

In fruit flies, eye color is a sex linked trait. Red is dominant to white.

2. What are the sexes and eye colors of flies with the following genotypes?

$X^R X^r$ ___ f = red ___ $X^R Y$ ___ m = red ___ $X^r X^r$ ___ f = white ___

$X^R X^R$ ___ f = red ___ $X^r Y$ ___ male = white ___

3. What are the genotypes of these flies:

white eyed, male _____ $X^r Y$ _____ red eyed female (heterozygous) ___ f = red ___

white eyed, female _____ $X^r X^r$ _____ red eyed, male _____ $X^R Y$ _____

4. Show the cross of a white eyed female $X^r X^r$ with a red-eyed male $X^R Y$
 5. Show a cross between a pure red eyed female and a white eyed male.
 6. What are the genotypes of the parents:

_____ $X^R X^R$ _____ and _____ $X^r Y$ _____

How many are:

white eyed, male _____ 0 _____
 white eyed, female _____ 0 _____

red eyed, male _____ 2 of 4 _____
 red eyed, female _____ 2 of 4 _____

	X^r	X^r
X^R	$X^R X^r$	$X^R X^r$
Y	$X^r Y$	$X^r Y$

Genetics X Linked Genes Worksheet Answers

Statistical Methods for Identifying X-linked Genes Associated with Complex Phenotypes, 2004 Genetic association studies aim to detect association between one or more genetic polymorphisms and complex traits which might be some quantitative characteristic or a qualitative attribute of disease In Chapter 1 we introduce the development of methods for association mapping in the past decades and present the rationale behind our X linked method development Family based association methods have been well developed for autosomes but unique features of X linked markers have received little attention In Chapter 2 we propose a likelihood approach X LRT to estimate genetic risks and test association using a case parents design The method uses nuclear families with a single affected proband and allows additional siblings and missing parental genotypes We also extend X LRT from a single marker test to a multiple marker haplotype analysis Our X LRT offers great flexibility for testing different penetrance relationships within and between sexes In addition estimation of relative risks provides a measure of the magnitude of X linked genetic effects on complex disorders In Chapter 3 and 4 we fill the methodological gaps by developing two approaches X QTL and X HQTL to test association between X linked marker alleles haplotypes and quantitative traits in nuclear family design We adopt the orthogonal decomposition which provides consistent estimates of the additive genetic values of marker alleles haplotypes Joint estimation of the linkage variance component in the association model reduces type I errors to nominal expectations Dosage compensation models provide a simple relationship of X linked additive effects between sexes In Chapter 2 3 and 4 our simulation results demonstrate the validity and substantially higher power of our approaches compared with other existing programs We also apply our methods to MAOA MAOB candidate gene studies of family data with Parkinson disease In Chapter 5 we discuss some issues relevant to the design and execut

Females Are Mosaics Barbara Migeon, 2007-03-15 Women can be described as genetic mosaics because they have two distinctly different types of cells throughout their bodies Unlike males who have one X chromosome inherited from their mother females have two X chromosomes in every cell one from each parent The fathers copy works in some cells while the mothers copy works in others These two X chromosomes often function differently especially if one carries a defective gene Much has been written about the Y chromosome and its role in inducing maleness This will be the first book about the X chromosome as a key to female development and the role of X related factors in the etiology of sex differences in human disease Barbara Migeon from the renowned McKusick Nathan Institute at Johns Hopkins is a major figure in clinical genetics and is eminently qualified to write this book and she writes clearly and effectively She describes both the underlying molecular mechanisms and the remarkable genetic consequences of X inactivation and its role in determining the biological concepts characteristic of women Females are Mosaics will be valuable to geneticists biologists and all health professionals interested in women s health

Chris Rider, 2020-10-27 Biological inheritance the passage of key characteristics down the generations has always held mankind's fascination It is fundamental to the breeding of plants and animals with desirable traits Genetics the scientific study of inheritance can be traced back to a particular set of simple but ground breaking studies carried out 170 years ago The awareness that numerous diseases are inherited gives this subject considerable medical importance The progressive advances in genetics now bring us to the point where we have unravelled the entire human genome and that of many other species We can intervene very precisely with the genetic make up of our agricultural crops and animals and even ourselves Genetics now enables us to understand cancer and develop novel protein medicines It has also provided us with DNA fingerprinting for the solving of serious crime This book explains for a lay readership how where and when this powerful science emerged *Concepts of Biology* Samantha Fowler, Rebecca Roush, James Wise, 2023-05-12 Black white print Concepts of Biology is designed for the typical introductory biology course for nonmajors covering standard scope and sequence requirements The text includes interesting applications and conveys the major themes of biology with content that is meaningful and easy to understand The book is designed to demonstrate biology concepts and to promote scientific literacy *Strengthening Forensic Science in the United States* National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community performing vitally important work However they are often constrained by lack of adequate resources sound policies and national support It is clear that change and advancements both systematic and scientific are needed in a number of forensic science disciplines to ensure the reliability of work establish enforceable standards and promote best practices with consistent application *Strengthening Forensic Science in the United States A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity the National Institute of Forensic Science to establish and enforce standards within the forensic science community The benefits of improving and regulating the forensic science disciplines are clear assisting law enforcement officials enhancing homeland security and reducing the risk of wrongful conviction and
