The Complete Book of the SR-71 Blackbird Richard H. Graham, 2015-10-26. The ultimate guide to the history, development, manufacture, modification, and active service of all fifty models in the SR-71 program. At the height of the Cold War in 1964, President Johnson announced a new aircraft dedicated to strategic reconnaissance. The Lockheed SR-71 Blackbird spy plane flew more than three and a half times the speed of sound so fast that no other aircraft could catch it. Above 80,000 feet, its pilots had to wear full-pressure flight suits similar to what was used aboard the space shuttle. Developed by the renowned Lockheed Skunk Works, the SR-71 was an awesome aircraft in every respect. It was withdrawn from use in 1998 when it was superseded by satellite technology. Twelve of the thirty-two aircraft were destroyed in accidents, but none were ever lost to enemy action. Throughout its thirty-four-year career, the SR-71 was the world's fastest and highest-flying operational manned aircraft. It set world records for altitude and speed: an absolute altitude record of 85,069 feet and an absolute speed record of 2,193.2 miles per hour. *The Complete Book of the SR-71 Blackbird* covers every aspect of the SR-71's development, manufacture, modification, and active service from the insider's perspective of one of its pilots and is lavishly illustrated with more than 400 photos. Former pilot and author Richard Graham also examines each of the fifty planes that came out of the SR-71 program: fifteen A-12s, three YF-12s, and thirty-two SR-71s, and tells each plane's history, its unique specifications, and where each currently resides.

SR-71 Richard H. Graham, 2013-05-12. Examines the history of the reconnaissance plane, discussing its development, manufacture, and active service from an insider's perspective.

Beyond the Horizons Walter J. Boyne, 1999-11-23. Explores the many factors that led Lockheed from near bankruptcy in the 1930s to become one of the most successful and innovative aerospace corporations in the world.
