Error Analysis Corder

Error Analysis and Interlanguage Stephen Pit Corder, 1981 *Error Analysis* Jack C. Richards, 2015-12-14 The eleven essays in this book cover a wide range of topics from the role of interlanguage and the influence of external factors on the process of language learning to the development of syntax and the methodology of error analysis Collectively they provide a valuable perspective on the learning process which both enriches our theoretical understanding of the processes underlying second language acquisition and suggests ways in which teaching practice may best exploit a learner's skills **A**

Non-contrastive Approach to Error Analysis Jack C. Richards, Tesol, 1970 *Error Analysis* Bernd Spillner, 1991-04-12 Errors are information In contrastive linguistics they are thought to be caused by unconscious transfer of mother tongue structures to the system of the target language and give information about both systems In the interlanguage hypothesis of second language acquisition errors are indicative of the different intermediate learning levels and are useful pedagogical feedback In both cases error analysis is an essential methodological tool for diagnosis and evaluation of the language acquisition process Errors too give information in psychoanalysis e.g. the Freudian slip in language universal research and in other fields of linguistics such as linguistic change This bibliography is intended to stimulate study into cross language cross discipline and cross theoretical as well as for language universal use of the numerous but sometimes hard to come by error analysis studies 5398 titles covering the period 1578 up to 1990 with work in more than 144 languages and language families are cited cross referenced and described The subject areas covered are numerous For example Theoretical Linguistics Linguistic Typology Cognitive Linguistics Historical Linguistics Language Change Applied Linguistics e.g. Speech Disorders Translation Mother Tongue Acquisition Foreign Language Learning Negative Transfer Intralingual and Interlingual Errors Psychoanalysis Slips of the Tongue Typography Shorthand Clinical Linguistics and Speech Pathology Reading Research Automatic Error Detection Contact Linguistics Code switching Interference etc *The Native Speaker in Applied Linguistics*

Alan Davies, 1991 **Error Analysis in New Language Acquisition** Andrea Letzel, 2016-11-17 Studienarbeit aus dem Jahr 2010 im Fachbereich Anglistik Linguistik Note 1,3 Johannes Gutenberg Universität Mainz Sprache Deutsch Abstract Error Analysis used in second language analysis studies the errors learners make in speech and writing It also studies the different types of errors and why they were made In this term paper two different types of learners will be considered who perform spontaneously with the help of a picture story There will be a special focus on the differences and similarities of their errors There are various possibilities how samples of learner language can be influenced Firstly the learner and his proficiency level have to be described and it is important if he speaks or learns other languages irrespective of the MT and the target language that is considered in the analysis The way of instruction plays also an important role because instructed language learning provides a different error background as if the learner tries to learn the language naturalistically The second part

that has to be described is the language itself. The medium can either be oral or written. Generally, the oral production consists of a more colloquial English for the simple reason that the learner has not as much time to think about formulation than in written speech. Therefore, the genre and the content of the language production is Error Evaluation and Error correction are additional parts that have not to be included in every Error Analysis. According to the dictionary of Linguistics, the error analysis is subdivided and classified in modality, levels of linguistic description, form type and cause. *The Cambridge Handbook of Learner Corpus Research* Sylviane Granger, Gaëtanelle Gilquin, Fanny Meunier, 2015-10-01. The origins of learner corpus research go back to the late 1980s when large electronic collections of written or spoken data started to be collected from foreign second language learners with a view to advancing our understanding of the mechanisms of second language acquisition and developing tailor-made pedagogical tools. Engaging with the interdisciplinary nature of this fast-growing field, *The Cambridge Handbook of Learner Corpus Research* explores the diverse and extensive applications of learner corpora with 27 chapters written by internationally renowned experts. This comprehensive work is a vital resource for students, teachers and researchers offering fresh perspectives and a unique overview of the field. With representative studies in each chapter which provide an essential guide on how to conduct learner corpus research in a wide range of areas, this work is a cutting-edge account of learner corpus collection, annotation, methodology, theory, analysis and applications.

Errors in Language Learning and Use Carl James, 2013-12-02. *Errors in Language Learning and Use* is an up-to-date introduction and guide to the study of errors in language and is also a critical survey of previous work. Error Analysis occupies a central position within Applied Linguistics and seeks to clarify questions such as: Does correctness matter? Is it more important to speak fluently and write imaginatively or to communicate one's message? Carl James provides a scholarly and well-illustrated theoretical and historical background to the field of Error Analysis. The reader is led from definitions of error and related concepts to categorization of types of linguistic deviance, discussion of error gravities, the utility of teacher correction and towards writing learner profiles. Throughout the text is guided by considerable practical experience in language education in a range of classroom contexts worldwide. **Error Analysis in SLA. An Investigation of Errors made by Polish Learners of English** Tom Keller, 2016-04-13. Seminar paper from the year 2010 in the subject English Language and Literature Studies. Linguistics grade 3.0. Technical University of Braunschweig. *Englisches Seminar* course. Second Language Acquisition. language English. abstract. In this paper, I will investigate several language productions from Polish learners using the English language and try to uncover their errors. Using Error Analysis, I will describe and explain the reasons for the error production. An interesting question will be whether the Polish speakers may have typical errors which could be related to their native language. Due to the numerous kinds of errors, it will be necessary to classify them and to relate them to certain reasons. Furthermore, there exists a difference between an error and a mistake. Its importance will be discussed later on. Even though Error Analysis initially offers helpful opportunities to investigate error production in a

structured way it has several disadvantages which were criticized in past decades In the end the conclusion will give an overview of the contents and summary the handled topics During the last several decades linguists have investigated the way of acquiring a second language Learners have several ways of acquiring a language and the field of second language acquisition SLA tries to uncover and improve them When people try to learn a foreign language they produce a considerable amount of errors These errors have always been made in the learning process and will never cease to occur During the complex investigations of second language acquisition linguists have focused on Error Analysis EA with its aim to take a deeper look on learner production Around the late 60 s this particular analysis was established with an approach of Pit Corder This system shows that errors should be investigated to understand and also improve the linguists attempts of learning a second language Typical questions which arise are why learners make errors and what reasons do they have Before Pit Corder linguists used the Contrastive Analysis CA which examines certain errors and refers to a particular connection between the first and the second language The differences between these two types of analysis will be examined in detail in the following chapter Several steps are needed to analyze various errors in language Investigators have developed procedures to collect identify describe explain and lastly evaluate certain errors These certain steps will be described and underlined with certain examples
