Primarily intended for the first course in financial accounting for the postgraduate students of management, this systematically

organized text discusses the essential concepts, principles and methods of financial accounting. It covers all important financial concepts and corporate financial reporting practices. The book, in its Fourth Edition, includes Revised Schedule VI on Balance Sheet and Profit & Loss Account Format. The Schedule VI has also been explained at the appropriate places. While the emphasis throughout is on the fundamentals, the book also skilfully analyzes advanced topics such as financial instruments, earnings management, internal control and internal audit, business combination and the logit model. KEY FEATURES 1. Important concepts are summarized in boxes to facilitate revision and to break the monotony. 2. Assignments are given in almost all the chapters to provide suitable exercises for better comprehension of the basic concepts. 3. Answers to quizzes are given at the end of the book. 4. Includes Case Studies in many chapters. 5. Contains a comprehensive Glossary at the end of the book. 6. Discusses financial analysis in detail. 7. Explains deviations of Indian GAAP from the IAS at appropriate places. 8. Provides a large number of practical examples to explain concepts and issues. 9. Incorporates most recent revisions in IAS and AS. Besides students, practising managers will also find this text to be of immense value. This work introduces the SAP R/3 financial accounting module and the principles of financial accounting alongside each other. It contains real-life case studies, practical hints, customizing hints, and illustrated examples from SAP's IDES training system. The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization. This multipack consists of Britton: Financial Accounting 3rd Edition (ISBN 027365859X) and access to the Britton WebCT Online Resources. Developed out of the MTBE series in Business and Economics this thoroughly revised third edition of Financial Accounting successfully combines an academic, conceptual approach to the subject with an accessible, student friendly and interactive

style. This new text adopts a questioning attitude to the subject, asking why accounting practices exist and how they work, without lingering on the technicalities. Increased in length, depth and coverage, for those that favour the 'why' over 'how to' approach, Financial Accounting is now the ideal introductory core text for first year financial accounting students. This text has a user-oriented approach which does not emphasize procedure (debits and credits) or the accounting cycle. The focus is on ratio analysis and information usefulness. Financial statements are introduced early (Ch. 3) and are used throughout.
