

AGRICULTURE GRADE 10 NOTES

Livestock Production Selection and Breeding

Introduction

- The breeding of animals is under human control, and the breeders decide which individuals shall produce the next generation.
- The breeder makes a choice.
- The breeding of animals is based upon the fact that certain qualities are genetic; hence valuable qualities are passed on from parents to off-springs.
- The qualities can be maintained or improved in the next generation.

The performance of an animal is influenced by two major factors;

- Genetic potential
- The environment, which includes:
 - Feeding,
 - Health,
 - Care
 - The ecological conditions.
- The genetic potential of an animal is inherited from its parents.
- In selection and breeding animals with superior characteristics are selected and allowed to mate.
- In the process they transmit the superior characteristics to their offspring.
- When this is done over a long period of time, it results in livestock improvement.

Reproduction and Reproductive Systems

- Reproduction is the process by which off-springs are produced.
- All farm animals multiply by means of sexual reproduction.
- It begins with fertilization which is the fusion of male and female gametes to form a zygote.
- Fertilization takes place internally in the body of the female.
- The embryo(zygote) formed develops inside body of mother, fed and protected until end of gestation period.
- In poultry, the process is different in that eggs are fertilized internally but laid and development of the chick takes place outside during incubation.
- In both male and female, certain organs are specialized for the process of reproduction.
- Some of these organs secrete fluids which are necessary for the movement and survival of the gametes (reproductive cells.)

Freedom 2003 Mattis draws upon many historical influences that shape his operational design in both campaigns He puts great effort and focus on ensuring that his commander s intent is understood by all his subordinates and uses a preference for a small staff in the planning and execution of his intent He makes heavy use of personally selected liaison officers to form and sustain habitual relationships with higher and adjacent units Through the use of historical examples and a refusal to be constrained by doctrine and popular thought he uses innovative approaches in his design These innovative approaches often constitute paradigm shifts with contemporary thought and doctrine A Mattis Way of War is postulated in the conclusion which draws from his use of history commander s intent and leadership to build up a capacity or potential energy for action in his unit Once built up he unleashes this energy utilizing explicit trust in his staff and subordinates
