Laur,Steven L. Llanso,1998-07 An accessible encyclopedia of military weapons represents a collaboration with The Army Navy and Air Force Times and covers each weapon system its evolution development and combat experience **Air Conditioning, Heating and Ventilating** ,1959 **The Consumer Action Handbook** ,2003 List of Proprietary Substances and Nonfood Compounds Authorized for Use Under USDA Inspection and Grading Programs ,1985 **Tiger Bone & Rhino Horn** Richard Ellis,2013-02-22 In parts of Korea and China moon bears black but for the crescent shaped patch of white on their chests are captured in the wild and brought to bear farms where they are imprisoned in squeeze cages and a steel catheter is inserted into their gall bladders The dripping bile is collected as a cure for ailments ranging from an upset stomach to skin burns The bear may live as long as fifteen years in this state Rhinos are being illegally poached for their horns as are tigers for their bones thought to improve virility Booming economies and growing wealth in parts of Asia are increasing demand for these precious medicinals Already endangered species are being sacrificed for temporary treatments for nausea and erectile dysfunction Richard Ellis one of

the world's foremost experts in wildlife extinction brings his alarm to the pages of Tiger Bone Rhino Horn in the hope that through an exposure of this drug trade something can be done to save the animals most direly threatened Trade in animal parts for traditional Chinese medicine is a leading cause of species endangerment in Asia and poaching is increasing at an alarming rate Most of traditional Chinese medicine relies on herbs and other plants and is not a cause for concern Ellis illuminates those aspects of traditional medicine but as wildlife habitats are shrinking for the hunted large species the situation is becoming ever more critical One hundred years ago there were probably 100 000 tigers in India South China Sumatra Bali Java and the Russian Far East The South Chinese Caspian Balinese and Javan species are extinct There are now fewer than 5 000 tigers in all of India and the numbers are dropping fast There are five species of rhinoceros three in Asia and two in Africa and all have been hunted to near extinction so their horns can be ground into powder not for aphrodisiacs as commonly thought but for ailments ranging from arthritis to depression In 1930 there were 80 000 black rhinos in Africa Now there are fewer than 2 500 Tigers bears and rhinos are not the only animals pursued for the sake of alleviating human ills the list includes musk deer sharks saiga antelope seahorses porcupines monkeys beavers and sea lions but the dwindling numbers of those rare species call us to attention Ellis tells us what has been done successfully and contemplates what can and must be done to save these animals or sadly our children will witness the extinction of tigers rhinos and moon bears in their lifetime

Alfalfa, Or Lucerne A. A. Mills, 1896      **Asian Rhinos** Mohd. Khan bin Momin Khan, Nico J. van Strien, IUCN/SSC Asian Rhino Specialist Group, 1997 There are currently three species of Asian rhino the Indian or greater one horned Asian rhino the Javan or lesser one horned Asian rhino and the Sumatran or Asian two horned rhino Today all three are threatened with extinction and two the Sumatran rhino and Javan rhino critically so Although the Indian rhino is to be found in greater numbers than the other two the threats to this species nevertheless remain significant As in the case of the African rhinos the threats to the Asian rhinos stem from poaching for the horn the primary demand for which is in traditional Chinese medicine but which is also a speculator's commodity in several consumer nations However a further threat to these animals is also posed by the destruction of their habitat Indeed two of these species inhabit the tropical rainforest which is being destroyed This action plan describes the major requirements for rhino conservation and describes some of the programmes which can and are being implemented to stem the threats to these species such as managed breeding and the in situ conservation of their habitats

Space Capstone Publication Spacepower Us Government United States Space Force, 2020-08-11 This book Space Capstone Publication Spacepower Doctrine for Space Forces is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower This publication answers why spacepower is vital for our Nation how military spacepower is employed who military space forces are and what military space forces value In short this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations Like all doctrine

the SCP remains subject to the policies and strategies that govern its employment Military spacepower has deterrent and coercive capacities it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power As we grow spacepower theory and doctrine we must do so in a way that fosters greater integration with the Air Force Army Navy Marine Corps and Coast Guard It is only by achieving true integration and interdependence that we can hope to unlock spacepower s full potential

[On Space Warfare: A Space Power Doctrine](#) ,1998 Ever since President Ronald Reagan s speech on ballistic missile defense BMD in March 1983 the military use of space has become a hotly debated topic President Reagan did not mention space only a plan to place renewed emphasis on the development of a BMD technology Nevertheless the speech was promptly dubbed Star Wars because the space environment seems to be the most likely place to deploy a ballistic missile defense system and

several administration officials mentioned space based BMD systems as technological possibilities Although Americans are accustomed to public debate concerning the merits of proposed weapon systems the Star Wars controversy covers issues broader Will space based weapon systems allow a new strategy to replace assured destruction Are we prepared to militarize space an environment that has been treated as a war free sanctuary since the Eisenhower administration Are space based weapons that have been proposed for BMD purposes technologically feasible This paper provides exceptional insights into the various doctrines that do or would govern military affairs in the space environment Its strengths are the author s ability to articulate the various doctrines the historical perspective from which these doctrines are examined and the broad context from which these doctrines are viewed The prescription for the space power doctrine presented in this paper is not radically different from the path the United States has already taken It calls for a complete space transportation system to augment the space shuttle a system which includes space stations and a family of high and low thrust upper stages that will help maintain this nation s technological control of the environment While this space transportation system will support both civilian and military users we should develop a separate and primarily military vehicle the aerospace plane as soon as possible [South African Décor & Design](#) Marcia Margolius,2020
