Hydrogen Technology Aline Léon,2008-07-18 Aline Leon In the last years public attention was increasingly shifted by the media and world governments to the concepts of saving energy reducing pollution protecting the environment and developing long term energy supply solutions In parallel research funding relating to alternative fuels and energy carriers is increasing on both national and international levels Why has future energy supply become such a matter of concern The reasons are the problems created by the world s current energy supply system which is mainly based on fossil fuels In fact the energy stored in hydrocarbon based solid liquid and gaseous fuels was and will be widely consumed for internal combustion engine based transportation for electricity and heat generation in residential and industrial sectors and for the production of fertilizers in agriculture as it is convenient abundant and cheap However such a widespread use of fossil fuels by a constantly growing world population from 2.3 billion in 1939 to 6.5 billion in 2006 gives rise to the two problems of oil supply and environmental degradation The problem related to oil supply is caused by the fact that fossil fuels are not renewable primary energy sources This means that since the first barrel of petroleum has been pumped out from the ground we have been exhausting a heritage given by nature

The Origin of Competitive Strength Akira Kawahara,2012-12-06 When the war ended on August 15 1945 I was a naval engineering cadet at the Kure Navy Yard near Hiroshima Japan A week later I was demobilized and returned to my home in Tokyo fortunate not to find it ravaged by firebombing At the beginning of September a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo Near my home I watched a procession of American military motor vehicles snaking along Highway 1 This truly awe inspiring cavalcade included jeeps two and a half ton trucks and enormous trailers mounted with tanks and artillery At the time I was a 21 year old student in the Machinery Section of Engineering at the Tokyo Imperial University Watching that magnificent parade of military vehicles I was more than impressed by the gap in industrial strength between Japan and the U S That realization led me to devote my whole life to the development of the Japanese auto industry I wrote a small article concerning this incident in Nikkei Sangyo Shimbun one of the leading business newspapers in Japan on May 2 1983 The English translation of this story was carried in the July 3 1983 edition of the Topeka Capital Journal and the September 13 1983 issue of the Asian Wall Street Journal The Topeka Capital Journal headline read MacArthur's Jeeps Were the Toyota Catalyst

Driving Honda Jeffrey Rothfeder, 2014-07-10 For decades there have been two iconic Japanese auto companies One has been endlessly studied and written about The other has been generally underappreciated and misunderstood Until now Since its birth as a motorcycle company in 1949 Honda has steadily grown into the world's fifth largest automaker and top engine manufacturer as well as one of the most beloved most profitable and most consistently innovative multinational corporations What drives the company that keeps creating and improving award winning and bestselling models like the Civic Accord Odyssey CR V and Pilot According to Jeffrey Rothfeder the first journalist allowed behind Honda's famously private doors what truly distinguishes Honda from its competitors especially archrival Toyota is a deep commitment to a set of unorthodox management tenets The Honda Way as insiders call it is notable for decentralization over corporate control simplicity over complexity and unyielding cynicism toward the status quo and whatever is assumed to be the truth ideas embedded in the DNA of the company by its colourful founder Soichiro Honda sixty five years ago With dozens of interviews of Honda executives engineers and frontline employees Rothfeder shows how the company has developed and maintained its unmatched culture of innovation resilience and flexibility and how it exported that culture to other countries that are strikingly different from Japan establishing locally controlled operations in each region where it lays down roots For instance Rothfeder reports on life at a Honda factory in the tiny town of Lincoln Alabama When the American workers were trained to follow the Honda Way as a self sufficient outpost of the global company their plant pioneered a new model for manufacturing in America As Soichiro Honda himself liked to say Success can be achieved only through repeated failure and introspection In fact success represents one percent of your work which results only from the ninety nine percent that is called failure
