Baby Dinosaurs on the Ark? Janet Kellogg Ray, 2021-09-09 A scientific look at creationism from a former creationist A significant number of Americans especially evangelical Christians believe Earth and humankind were created in their present form sometime in the last 10 000 years or so the rationale being that this is presumably the story told in the book of Genesis Within that group any threatening scientific evidence that suggests otherwise is rejected or when possible retrofitted into a creationist worldview But can this uncomfortable blend of biblical literalism and pseudoscience hold up under scrutiny Is it tenable to believe that the Grand Canyon was formed not millions of years ago by gradual erosion but merely thousands of years ago by the Great Flood Were there really baby dinosaurs with Noah on his ark Janet Kellogg Ray a science educator who grew up a creationist doesn't want other Christians to have to do the exhausting mental gymnastics she did earlier in her life Working through the findings of a range of fields including geology paleontology and biology she shows how a literal interpretation of the book of Genesis simply doesn't mesh with what we know to be reality But as someone who remains a committed Christian Ray also shows how an acceptance of the theory of evolution is not necessarily an acceptance of atheism and how God can still be responsible for having created the world even if it wasn't in a single momentary miraculous event

Frozen in Time Michael Oard, 2004 Earth's past is littered with the mysterious and unexplained the pyramids Easter Island Stonehenge dinosaurs and the list goes on and on as science looks for clues to decipher these puzzles One such mystery surrounds the now extinct creature called the woolly mammoth Author and meteorologist Michael Oard has studied the mammoth and its equally mysterious time period the Ice Age for many years and has come to some fascinating conclusions to help lift the fog engulfing the facts Some of the questions he addresses include What would cause the summer temperatures of the northern United States and European to plummet more than 50 degrees Fahrenheit Why did mammoths become extinct across the entire earth at the same time as many other large mammals Why are the mammoth carcasses found generally in standing positions How could large lakes exist in what are today very dry desert like places What was the source of the abnormal moisture necessary for heavy snow What caused the cold summer temperatures and heavy snowfall to persist for hundreds of years In logical progression many other Ice Age topics are explained including super Ice Age floods ice cores man in the Ice Age and the number of ice ages This is one of the most difficult eras in geological history for a uniformitarian scientist one who believes the earth evolved by slow processes over millions of years to explain simply because long ages of evolution cannot explain it Provided here are plausible explanations of the seemingly unsolvable mysterious about the Ice Age and the woolly mammoths **Frozen in Time Knowable Word** Peter Krol, 2022-05-26 Knowable Word offers a foundation on why and how to study the Bible Through a running study Genesis 1 this new edition illustrates how to Observe Interpret and Apply the Scripture and gives the vision behind each step
