[This title] operates on the radical premise that neither child nor parent must dominate. -- Review. BeNeca Ward highlights the practices that were once used to set the American standards on raising children to be kind, respectful and responsible adults. Shedding light on the timely topic of how to instill great values into today's children, this book focuses on GETTING BACK TO THE BASICS OF PARENTING utilizing the lessons that were used for at least three generations but for many reasons are no longer being taught. Subtle and informative, this book infuses humor and wit as readers reflect upon their own experiences and are tuned into the experiences of others. It also spotlights how much was once taught through the simplest lessons. With chapters like, "Hold My Hand", "The Patience of a Pomegranate", "The Makings of a Man" and Family Ties" readers are in for a memorable illuminating experience. As Ward states, it is never too late to mold America's children into kind, respectful and responsible adults. Excerpts: "Growing up, we became very familiar with the words structure and discipline. They were blended into the cement that was laid on the foundation of our lives, which ultimately held all our values together." "As children, we were not given the most but taught to appreciate the least." "I learned how to accept the fact that everyone will not think that I am the most beautiful person; but just as I

found beauty within myself, someone else would find beauty in me as well.” “Being neighborly” was . . . a bit like mandatory community service.” “Bedtime was a regular vocabulary word in our household.” “A man’s name was ultimately viewed as the mirror image of his legacy. It was looked at as something similar to a “bowl of life.” Everything that he did during his lifetime was put inside of his name.” Littauer’s insight and wry humor create a positive atmosphere in which parents will come to believe that, despite other influences, conscientious Christian parenting can result in loving family relationships and wholesome adult children. Parenting is a school for spiritual formation, says author Gary Thomas, and our children are our teachers. The journey of caring for, rearing, training, and loving our children profoundly alters us forever...even when the journey is sometimes a rough one. *Sacred Parenting* is unlike any other parenting book on the market. This is not a "how-to" book that teaches readers the ways to discipline their kids or help them achieve their full potential. Instead of a discussion about how parents change their children, *Sacred Parenting* turns the tables and demonstrates how God uses children to change their parents. Stepping beyond the overly-tilled soil of method books, parents can learn a whole new side of parenting. They'll be encouraged by stories that tell how other parents handled the challenges and difficulties of being a parent—and how their children transformed their relationship with God. The lessons the author writes about are timeless. But in this edition, Thomas adds in some additional insights and stories that he's learned and lived over the past fifteen years of his own parenting. Gary has found that the lessons have remained much the same but there are new applications for the readers in this generation who are just now coming to his book. *Raising Kids with Character* shows parents, clinicians, and policy-makers how the love relationship between parents and children is the workshop of the child's maturing personality, connecting everyday moments in family life to the growth of the child's sense of values and meaning. The book explains how children develop into fine, morally strong adults through their identification with loving parents, and combines practical wisdom about ordinary family experiences with an in-depth discussion of emotional development from birth through adulthood. Elizabeth Berger, MD, is a child psychiatrist and nationally acclaimed parenting expert. Her book looks beyond the parent's response to "negative behavior" to understand the meaning of the child's behavior within the growth process, while helping parents gain mastery of their own emotional reactions as a key to assisting this process. Rich vignettes of ordinary families, along with professional case studies of trouble youngsters in therapy, make this intelligent and well-written book the essential tool for parents and others looking not just to "manage" children but to understand and to nurture their spirits. Advice for raising resourceful, resilient, and responsible children--based on the latest child development research. "Success" is a popular buzzword in discussions about children. But instead of

prescribing what success looks like for kids, we should be making sure that they develop the skills they will need to become “doers”—people who proactively seek out what they want in life. Raising Can-Do Kids offers parents hands-on, proven ways to raise kids who embrace the uncertain and challenging adventure that is growing up. "Many parents work more hours outside of the home and their lives are crowded with more obligations than ever before; many children spend their evenings and weekends trying out for all-star teams, traveling to regional and national tournaments, and eating dinner in the car while being shuttled between activities. In this vivid ethnography, based on almost 200 interviews with parents, children, coaches and teachers, Hilary Levey probes the increase in children's participation in activities outside of the home, structured and monitored by their parents, when family time is so scarce. As the parental "second shift" continues to grow, alongside it a second shift for children has emerged--especially among the middle- and upper-middle classes--which is suffused with competition rather than mere participation. What motivates these particular parents to get their children involved in competitive activities? Parents' primary concern is their children's access to high quality educational credentials--the biggest bottleneck standing in the way of, or facilitating entry into, membership in the upper-middle class. Competitive activities, like sports and the arts, are seen as the essential proving ground that will clear their children's paths to the Ivy League or other similar institutions by helping them to develop a competitive habitus. This belief, motivated both by reality and by perception, and shaped by gender and class, affects how parents envision their children's futures; it also shapes the structure of children's daily lives, what the children themselves think about their lives, and the competitive landscapes of the activities themselves"-- Raising Kids Right is a simple instruction book to help parents of school-age children do the "right things" during the day to raise healthy, happy kids. Read the Introduction Does your congregation want to raise more mission-minded children? Here are practical plans with reproducible activities and outlines for classroom and service experiences for children ages 3 to 12. Carolyn Brown offers great "how to" plans that churches can build into their current programs. She includes : a hands-on enrichment curriculum for grades 1-5; over a year of monthly service projects for preschoolers; mini-workshops for teachers; and newsletters blurbs about the program. "Carolyn Brown has written a 'must read' book for all parents and teachers. I know of no other book that presents so clearly, helpfully, and persuasively Jesus'™ mandate to raise children to "love our neighbors as ourselves." More than a mandate, it offers dozens of doable, practical suggestions for each age group and grade level. I will recommend this book to every teacher and parent in my church." --Rev. Dr. Donald L. Griggs, author of Teaching Today's Teacher to Teach published by Abingdon Press (item #9780687049547) From the Circuit Rider review: "Teachers, parents, Sunday school teachers, and church preschool teachers are all very familiar with the importance of teaching children to share, to take turns, to say "please" and "thank you," and to not hurt others'™ feelings. Veteran Christian educator Carolyn Brown puts this important formation into the larger context of the mission of the church. How do our children grow in compassion? How can we lead them to leave the world better than they found it? How do we raise mission-minded children?" (Click here to read the entire review.) "Your story made me cry ... Reflective and thought-provoking. A much-needed guide that is current and relevant for the present generation of parents, who have to deal with situations previous generations of parents did not have to." P Wendelkin (Educator and parent) "This book is a Masterpiece. It is not just the Essential and Practical Guide to Raising Children to Become Their Best, it is a must-have for every parent and every educational institution, to learn how to raise up children to become their best." Nkiru Ojimadu (Bestselling author, speaker, and coach) "The ideas espoused in this book about parenting are epic and sensational! These well-researched, informative, and brilliant materials provide such practical guidance on parenting from a real-life situation, the like of which has never been seen before. As a parent, there was that real resonance when I read the book and I can say without equivocation that, my approach to parenting will never be the same. The way this book is written is indeed, a novelty and can only come from an author with great deal of ingenuity." Peter Frimpong Manso (Writer and Parent). We live in a visual culture. Today, people increasingly rely upon visuals to help them understand new and difficult concepts. The rise and stunning popularity of the Internet infographic has given us a new way in which to convey data, concepts and ideas. But the visual portrayal of truth is not a novel idea. Indeed, God himself used visuals to teach truth to his people. The tabernacle of the Old Testament was a visual representation of man's distance from God and God's condescension to his people. Each part of the tabernacle was meant to display something of man's treason against God and God's kind response. Likewise, the sacraments of the New Testament are visual representations of man's sin and God's response. Even the cross was both reality and a visual demonstration. As teachers and lovers of sound theology, Challies and Byers have a deep desire to convey the concepts and principles of systematic theology in a fresh, beautiful and informative way. In this book, they have made the deepest truths of the Bible accessible in a way that can be seen and understood by a visual generation. Islam places great emphasis on the child, right from infancy to the age of puberty. The reason for this is to prepare him to become a good member of the community. Children learn more by example than by words. Telling our children what to do and not showing them by a good example is a hypocritical act and drives children to confusion and away from us. It is for this reason we are presenting this booklet as a guideline for those parents who are concerned about their present and future offspring As featured on The Steve Wright Show on Radio 2. Equipping children to thrive and survive in the digital jungle Digital technology, social media, and online gaming are now a universal part of childhood. But are you worried about what your children might be doing online? What they might come across by accident? Or who might try to contact them through Facebook or Twitter? Whether you are a parent, grandparent, teacher, or youth

leader, you will want children to get the most out of new technology. But how do you tread the tightrope of keeping them safe online, whilst enabling them to seize and benefit from the wealth of opportunities on offer? Bex Lewis, an expert in social media and digital innovation, has written a much-needed and timely book full of sound research, practical tips, and realistic advice on how to keep children safe online. She puts the Internet scare stories and distorted statistics into context and offers clear and sensible guidelines to help children thrive in the digital jungle. Media coverage includes: BBC Radio 2: The Steve Wright Show, BBC Radio Tees, BBC Radio Newcastle, ITV Tyne Tees television, Real Radio, Sun FM, The Durham Times, The Northern Echo, The Sunderland Echo, Premier Radio. Raising a child is challenging for many parents, especially for a new, immigrant family. For those parents, they not only have to face the challenges of integrating themselves into a new environment, but they also need to handle the conflicts coming from two cultural backgrounds. Like many Chinese Americans, the authors inherited the traditional Chinese culture. Yet they also opened their minds and embraced their new culture. Through the collisions of these two cultures, they developed a unique parenting strategy: a combination of the best of both worlds to educate their children. This approach offered them a cutting edge in developing their children to be among the most competitive. As they raised their children, they • held parties to build their children's social groups; • used teamwork to create a harmonious family, strengthening the family bonds; • helped their children excel in academic competitions; • taught their children how to be rigorous and strive for perfection; • inspired their children to explore innovative strategies to overcome obstacles; • developed their children's creativity, leadership, and initiative; • encouraged their children to be involved in the community; and • gave their children freedom to develop their individual personalities and discover their full potentials. The authors believe that their story will be beneficial to other parents and also provide a new perspective of Chinese American families for mainstream Americans. In one of the most crucial areas of human life-raising children, parents face many problems of varying degrees and far too many failures. The parents themselves may be excellent persons with the best of intentions and love for their children but they may not necessarily be the parents they want to be. This could be because they do not understand children or how to motivate them to good behavior. When parents face these perplexing problems, many feel without adequate guidance. The purpose of this book is to teach parents how to find success with their children. It explains the kind of people parents could be, the home life they must provide, the care and devotion required and the close friendship they must build to reach this success. It teaches clear-cut methods of helping them to be obedient and responsible, of developing their character and intellect to its highest potential and of building a feeling of self-worth. How can we keep children safe in an uncertain world, but also raise them to be confident in taking the healthy, emotional risks necessary to succeed in life? The authors of this unique book--two clinical psychologists, who are also mothers--provide essential guidance for parents and teachers. They explain, step-by-step, how to help children become successful risk-takers: ready to leap at life's opportunities and triumph over setbacks along the way. With stories based on the diverse families from their practice--from parents afraid to let their rambunctious daughter out of sight, to those who fear their shy son may lose opportunities to connect at home and school--they offer real-world scenarios with realistic solutions.

Readers will find helpful checklists, self-reflection exercises, and other resources in this authoritative book. Must reading for Orthodox Christian pastors, teachers and parents.--Fr. Stanley Harakas Raising Your Future is a tour of the mind of the child as well as a tried and tested method for teaching responsibility. There are many influences that determine how a child turns out, including many over which we have no control, such as genetics, peer influence and other environmental factors. This book deals with the parental factor, and how we can maximize the optimum parental influences to direct a satisfactory outcome, all things considered. But it can be done, starting in your home. In Raising Children Without Fear, Kenneth and Gloria Copeland share how to: -Teach your children to be separate from the things of the world. -Close the door to the enemy and keep your household safe from sin. -Break the cycle of fear in your life and the lives of your children. Also included a powerful list of scriptural promises to stand on for your children. How parents and educators can teach kids to love reading in the digital age Everyone agrees that reading is important, but kids today tend to lose interest in reading before adolescence. In Raising Kids Who Read, bestselling author and psychology professor Daniel T. Willingham explains this phenomenon and provides practical solutions for engendering a love of reading that lasts into adulthood. Like Willingham's much-lauded previous work, Why Don't Students Like School?, this new book combines evidence-based analysis with engaging, insightful recommendations for the future. Intellectually rich argumentation is woven seamlessly with entertaining current cultural references, examples, and steps for taking action to encourage reading. The three key elements for reading enthusiasm—decoding, comprehension, and motivation—are explained in depth in Raising Kids Who Read. Teachers and parents alike will appreciate the practical orientation toward supporting these three elements from birth through adolescence. Most books on the topic focus on early childhood, but Willingham understands that kids' needs change as they grow older, and the science-based approach in Raising Kids Who Read applies to kids of all ages. A practical perspective on teaching reading from bestselling author and K-12 education expert Daniel T. Willingham Research-based, concrete suggestions to aid teachers and parents in promoting reading as a hobby Age-specific tips for developing decoding ability, comprehension, and motivation in kids from birth through adolescence Information on helping kids with dyslexia and encouraging reading in the digital age Debunking the myths about reading education, Raising Kids Who Read will empower you to share the joy of reading with kids from preschool through high school. Provides a guide for parents that recommends an alternative approach that encourages respect for the self and others, in a reference that explains how to foster such values in children as thankfulness and unselfishness. As the term &"family values&" achieves prominence in the rhetoric of political debate, the social issues at the heart of today's political controversies deserve to be studied in depth. This volume brings together a group of philosophers, political scientists, and legal scholars to explore a wide range of specific topics dealing with the

legal, ethical, and political dimensions of familial relationships. Topics addressed include the rights of unwed fathers, the nature of children's autonomy, children's rights to divorce their parents, parental rights with respect to medical treatment and religious education of children, surrogate parenting, same-sex parenting, and single-parent families. Collectively, the essays point out that many contemporary issues pertaining to the having and raising of children pose genuinely hard choices for public policy makers, for those who make and enforce the laws, and for citizens who would like to engage in informed and critical democratic debate on these issues. Raising God conscious, moral, successful children, with a sense of civic responsibility in today's world is not easy. It is also not impossible. Effective parenting is the key. An Entertaining, Enlightening Look at the Art of Raising Self-Reliant, Independent Children Based on One American Mom's Experiences in Germany An NPR "Staff Pick" and One of the NPR Book Concierge's "Best Books of the Year"

When Sara Zaske moved from Oregon to Berlin with her husband and toddler, she knew the transition would be challenging, especially when she became pregnant with her second child. She was surprised to discover that German parents give their children a great deal of freedom—much more than Americans. In Berlin, kids walk to school by themselves, ride the subway alone, cut food with sharp knives, and even play with fire. German parents did not share her fears, and their children were thriving. Was she doing the opposite of what she intended, which was to raise capable children? Why was parenting culture so different in

the States? Through her own family's often funny experiences as well as interviews with other parents, teachers, and experts, Zaske shares the many unexpected parenting lessons she learned from living in Germany. *Achtung Baby* reveals that today's Germans know something that American parents don't (or have perhaps forgotten) about raising kids with "selbständigkeit" (self-reliance), and provides practical examples American parents can use to give their own children the freedom they need to grow into responsible, independent adults. An intriguing, sometimes shocking, journey across the world to show how children are raised in different cultures. *Raising Other People's Children* helps you navigate the complicated world of foster and step-parenting with better awareness and greater empathy, providing real-life solutions for forging strong relationships in extraordinary circumstances. Drawing on Debbie Ausburn's decades of experience with every facet of the foster care system, *Raising Other People's Children* provides expert guidance viewed through the lens of real human interactions. The responsibility and complexity involved in raising someone else's child can seem overwhelming. Regardless of whether you're a stepparent, foster parent or adoptive parent, it is on you to take on the challenge of caring for them, helping them to move forward while also meeting their unique emotional needs. Grit, the combination of passion and perseverance, has more of an influence on success than cognitive ability, and parents want nothing more than to raise happy, successful children. *Raising Children With Grit: Parenting Passionate, Persistent, and Successful Kids* provides the strategies that parents need to teach, motivate, and inspire children to pursue their passions with grit—and succeed. And by focusing on self-discipline, parenting strategies, and personality traits, parents can cultivate perseverance in their children. By coupling that with an emphasis on curiosity and interest-building activities, parents can help their children define their passions. Additionally, this book offers tips for parents about working with school personnel, how to model grit in their own lives, and how social factors can influence the development of grit. Your search for parenting tips that actually improve your family dynamics is over. While other parenting resources offer communication models or discipline techniques, this powerful, practical booklet offers the unique skills and perspective of the Nonviolent Communication (NVC) process. NVC stresses the importance of putting compassionate connection first to create a mutually respectful, enriching family dynamic filled with clear, heartfelt communication. An exceptional resource for parents, parent educators, families and anyone else who works with children. For over forty years, Dr. Marshall Rosenberg has taught NVC to parents, families, children and teachers. Parents around the world have used his advice to deepen family connections, move past conflicts and improve communication. His revolutionary approach helps parents motivate children to cooperate without either the threat of punishment or the promise of reward. Learn how to model compassionate communication in the home to help your children successfully resolve conflicts and express themselves clearly. If you've ever asked yourself if you're parenting the "right way", rest assured that there are many "right ways" and that the ultimate judgment of your parenting will come as a result of the behavior of your children. *Raising Children That Other People Like to be Around* offers parents the tools necessary to establish a clear set of values from which to make parenting decisions. After raising four kids from kindergarten through college, Richard Greenberg offers readers specific suggestions and guidelines to help reduce conflict, improve

communication and replace parenting stress with confidence and control. By encouraging the use of common sense, and defining a comfortable, consistent, realistic path, Greenberg gives parents the confidence they need to raise healthy, happy children. "Teaching children respect means showing respect for ourselves. It's not easy to live an exemplary life, but trying hard to do so is exactly what being a parent is. None of us are perfect, but every day we have opportunities to show our kids the high road not only in our expectations of them, but in our expectations of ourselves." â R Greenberg Raising Children Who Think for Themselves offers a new approach to parenting that has the power to reverse the trend of external direction in our children and help parents bring up empathetic, self-confident, moral, independent thinkers. Children who are externally directed make decisions based on the peer groups, violent movies, sexually explicit television shows, and rap lyrics that permeate their lives. When children are self-directed, on the other hand, they use their power of reason like a sword to cut through the jungle of external influences. Fortunately, the author shows us, it is never too late to foster in our children the ability to weigh options, consider sources, and think for themselves. Filled with real-life examples, humorous anecdotes, and countless interviews with parents, children, and teachers, Raising Children Who Think for Themselves Identifies the five essential qualities of self-directed children Outlines the seven strategies necessary for parents to develop these qualities in their children Addresses nearly one hundred child-raising challenges—from body piercing to whining wars—and offers solutions to help encourage self-direction
