few years due to the mostly unproblematic implementation and the lower price of these products compared to traditional software packages Recommendations for further research include a deeper analysis of CRM within the events industry and a clear definition of terms which are connected with CRM such as customer satisfaction and customer loyalty More information on customer orientation customer loyalty and competitiveness especially within event management companies would help to establish a more precise catalogue of software selection criteria

Study for the Customer Relationship Management (CRM) System from Microsoft Dynamic and Sale Force and Implementation Into the ATREVIA Company Milad Alidadiani, 2016

The aim of this thesis is to study of the software Microsoft Dynamic CRM 2016 in order to implement in Atrivia which is the second big communication agency and Salesforce would be another main software to evaluate in comparison with Dynamic CRM because there is a paucity of implementing Customer relationship management in communication agency We are in a competitive market in order to realize our mission and vision in medium and small companies it is Indispensable to attend our clients to find unmet needs we can't discover unmet needs and propose viable solutions without organization software like customer relationship management or its acronym CRM However the adoption of strategies and customer relationship management implemented seems to bring significant benefits in this regard and It is presented as an appropriate tool to achieve specific goals for small and medium enterprises regarding the capture and all the requirement which is mention in this thesis As I have done part of practice in financial department that was really crucial in terms of familiarity with other software which CRM is compatible with other system such as Microsoft Navision 2016 and Microsoft project management in order to decrease the quantity of sharing and reports of clients because contact and other information are part of the company The company has feared to change the software since three years ago and there are some obstacles to implement the new software whether or not it is too risky strategy to lose some clients and not being user friendly for marketing department and others It would be not dismiss the criticism of CRM such as volume of data duplication by Director of Marketing In this project some important definition will be explained such as lead potential client opportunity in the business process which are the same in both software Finally All the frequent problems are solved in the annex

CRM Jeffrey Peel, 2002-07-03 In CRM Jeffrey Peel defines Customer Relationship Management in a radical new way by putting communications at the center In the past CRM was mostly about the technology not about the customer In this book Peel talks about a new ethos that is beginning to fundamentally change the way organizations do business At a technology level CRM is increasingly about conjoined best of breed applications delivered via portal technologies At a business level it is beginning to invade traditional territories occupied by brand management or customer support Peel shows companies how to make the shift to the new paradigm Defines the nature of new CRM niche solutions Provides entirely new types of functionality that mesh seamlessly Describes solutions focused solely on the needs of the customer
