The definitive manual of pediatric medicine - completely updated with 75 new chapters and e-book access. Now in its second edition, the Oxford Handbook of Neonatology is the essential user-friendly guide for all healthcare professionals involved in the care of newborns. Accessible, practical, and updated with the latest evidence, this is a key resource designed for use at the cot-side. Using guidance from the Royal College of Paediatrics and Child Health and including the most up to date NICE guidelines, the second edition of this handbook uses extensive diagrams and an easy-to-use format to cover good communication practice, neonatal emergencies and technical procedures. Fully updated and revised with expanded sections covering therapeutic hypothermia and developmental care amongst other advances in the field, the Oxford Handbook of Neonatology is a valuable and up-to-date guide to a rapidly evolving field. Taking a valuable family-centred approach to neonatal care, this is the essential resource for all healthcare professionals working with newborns, from the undergraduate medical student to the doctor on the ward. This user-friendly 5th Edition provides concise but complete information on numerous common and rare disorders that cause human malformation. Includes an outline of the salient features of each condition, as well as material on natural history, etiology, and pathogenesis. The text is accompanied by helpful illustrations and reference lists. Organized to allow for easy access to essential information. Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, Essential Neonatal Medicine continues to be an indispensable resource that combines the depth and breadth of a textbook with the efficiency of a revision guide. Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation. With an improved artwork programme and a new glossary of terms, Essential Neonatal Medicine is ideal for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them. This book clearly explains the basics of cranial ultrasonography in the neonate, from patient preparation through to screening strategies and the classification of abnormalities. The aim is to enable the reader consistently to obtain images of the highest quality and to interpret them correctly. Essential information is provided both on the procedure itself and on the normal ultrasound anatomy. The standard technique is described and illustrated, and emphasis is placed on the value of supplementary acoustic windows. Attention is also drawn to maturational changes in the neonatal brain and to the limitations of cranial ultrasonography. Frequently occurring abnormalities are described and classifications for these abnormalities are provided. A new classification for neonatal cerebellar hemorrhages is introduced. In this third edition, all ultrasound images have been replaced, reflecting the improvements in image quality. An entirely new chapter is devoted to Doppler ultrasonography. The illustrations have been improved and new illustrations were added. The reader will have access to highly informative videos on the cranial ultrasound procedure, available online via SpringerLink. The compact design of the book makes it an ideal and handy reference that will guide the novice in understanding the essentials of the technique while also providing useful information for the more experienced practitioner. Extensively revised and updated, this practical manual on the basic and advanced management of the neonate covers procedures, diseases, disorders and drugs. The popular On-Call Problems, present over 25 common and serious patient management problems. This is the first textbook of neonatology from the Indian subcontinent which has served as the most trusted resource to undergraduate and postgraduate medical students in pediatrics and obstetrics and gynecology for four decades. The book has been extensively revised and updated to incorporate recent advances in the art and understanding of perinatal disorders. All the chapters have been reorganized, revised and rewritten to incorporate additional evidence-based information to make it an up-to-date and comprehensive textbook of neonatology. The book presents a harmonious blend of latest physiological basis of neonatal disorders and the current state-of-the-art information pertaining to their management through a simplified algorithmic approach. Neonatology provides the greatest scope for health preventive and promotive strategies which have been covered in depth. A number of new photographs, images, flow diagrams and tables have been included to make it more reader-friendly and comprehensive. The initiatives taken by Government of India for improving newborn care in the community have been discussed in detail. The distinctive feature and hallmark of the book is the brevity, clarity and problem-oriented approach. The book shall serve as a useful and practical manual to the pediatric and obstetric resident staff and consultants working in the medical colleges, corporate hospitals and private maternity nursing homes. Revised and updated by a new editorial team, the Sixth Edition of this text will remain the leading reference on the clinical care of the newborn. It provides complete, authoritative information on the biology of the newborn and the pathophysiology and management of diseases during the neonatal period. This edition has five new chapters on the role of telemedicine in neonatology, the impact of labor and delivery on the fetus, fetal determinants of adult disease, breast feeding, and control of breathing and apnea. Also included is a full-color insert illustrating key signs and symptoms, selected imaging techniques, and dermatologic conditions. Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and midwives caring for sick newborn babies. Written by and for nurses, it concentrates on the common problems occurring within the neonatal intensive care unit. This user-friendly text will enable nurses to recognise, rationalise and remedy these problems using both a multi-systems and an evidence-based approach. Individual chapters include: Professional Development • Developmentally-focused Nursing Care • Resuscitation of the Newborn • Management of Thermal Stability • Management of Respiratory Disorders • Cardiovascular Management • Brain Injury in the Preterm Infant • Haematological Problems • Pain Management • Fluid and Electrolyte Balance • Nutritional management • Neonatal Infection • Diagnostic and Therapeutic Procedures • Neonatal Anaesthesia • Surgical Aspects of Neonatal Intensive Care • Neonatal Transport • Family Support • Ethics and Neonatal Nursing • Medication in the Newborn • Death and Dying in the Neonatal Unit It is essential reading for experienced nurses and midwives caring for sick newborn babies within the neonatal intensive care unit, for nurses undertaking qualifications in the specialism of neonatal nursing and for pre-registration students undertaking relevant modules or placements. Concise and easy to read, this popular manual has provided a practical approach to the diagnosis and medical management of problems in the newborn through seven outstanding editions. The Eighth Edition of Cloherty and Stark's Manual of Neonatal Care maintains that tradition of excellence, offering NICU physicians, neonatal-perinatal fellows, residents, and neonatal nurse practitioners quick access to key clinical information, fully updated to reflect recent advances in the field. Written in an easy-access outline format, this extensively revised edition covers current, practical approaches to the evaluation and management of routine and complex conditions encountered in the fetus and the newborn. New 8th Edition! Innovative resource for interactive, simulation-based teaching and learning The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery. NRP Essentials and NRP Advanced The NRP, 8th edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. New in the 8th

edition Key Points at the beginning of each lesson. Quick Response (QR) codes that enable the reader to view short videos about the topics on their mobile device. Lesson Review Questions grouped together at the end of each lesson. Quality Improvement Opportunities and Frequently Asked Questions in each lesson. New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect. Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance. The Atlas of Procedures in Neonatology, Fifth Edition, provides detailed, step-by-step instructions on procedures performed in the neonatal intensive care nursery. In an easy-to-follow outline format, with more than 450 drawings and clinical photographs, the book presents clear, current information on indications, preparation, technique, precautions, and how to avoid potential complications. New for this edition: New chapters covering: Brain and Whole Body Cooling; Bubble CPAP; Educational Principles of Simulation Based Procedure Training to help you stay updated on the latest technology and information Access to free online companion website that includes fully searchable text, image bank and videos so you can access the content anytime, anywhere Video collection has been expanded to include: lumbar puncture, intraosseous infusion, bubble CPAP and pericardiocentesis for both commonly performed procedures and vital emergency procedures The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). This updated edition reflects the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate. Full color. This is the first book dealing with fetal pain and its consequences and with pain in premature babies. The volume gives an overview of the current knowledge in this field. An international team of renowned specialists evaluates neonatal and fetal pain from the different points of view, and possible consequences of pain – even psychological – on the brain. This book will be an invaluable resource for professionals and for post-graduate students in all disciplines. Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women’s Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU. This popular book covers the “how-to” of the respiratory care of newborns in outline format. It includes case studies for self-review and is illustrated with high quality radiographic images, figures, tables, and algorithms. Written and edited by international experts, the Third Edition is a thorough update and remains a convenient source of practical information on respiratory physiology, exam techniques, tips for performing procedures, radiography, ventilation, pain management, transport, and discharge planning. •Up-to-date clinical information from world experts •Case studies •Easy-to-consult outline format •Condensed information about all of the major mechanical ventilators (e.g., modes, displays, and alarms) “The extent of coverage, easy readability, superb organization [and] ...practical pearls make [this book] worthwhile...simply a great bargain.” --Journal of Perinatology (review of a previous edition) For more than 45 years, Avery & MacDonald’s Neonatology has been the premier text on the pathophysiology and management of both preterm and full-term neonates, trusted by neonatologists, neonatology fellows, pediatricians, neonatal nurse practitioners, and ob/gyn practitioners worldwide. Continuing the tradition of excellence established by Drs. Gordon B. Avery and Mhairi G. MacDonald, this fully revised eighth edition features three new lead editors, numerous new chapters, reorganized and updated content, and an increased focus on global neonatology. Neonatal Formulary advises on the safe use of medications in the pregnant or breastfeeding woman and her baby. It covers the period from conception through pregnancy and beyond with effects of administration of medicines to both mother and baby. This valuable review book provides a thorough framework for the basic principles of neonatology in a clear and user-friendly style. The detailed yet focused outline format makes it the perfect book for those in training in neonatology and those studying for the Neonatology Boards, as well as a useful general reference for professionals in the field. The first comprehensive guide for the neonatal/perinatal board exam Provides a thorough framework for the basic principles of neonatology The outline format is supplemented with tables, lists, and illustrations for easy study and recall This concise and comprehensive volume updates health professionals on recent advances in the field of pediatrics. It includes chapters in every subspecialty of pediatrics, such as critical care, development emergency medicine and genetics. Ranging from traditional disciplines such as infectious disease and cardiology to more current disciplines such as adolescent medicine, metabolics and genetics this is an indispensable guide for the busy clinician who wishes to stay up-to date with latest advances in the field. Through the use of summaries and bullet points, the book concisely describes the latest recommendations and guidelines in pediatrics and provides a good overview of the available technology for each subspecialty. The team of authors is made up of experienced clinicians and researchers in their respective fields. This book appeals to pediatricians, family doctors, nurses and nurse practitioners, allied health professionals, and health researchers. Merenstein & Gardner's Handbook of Neonatal Intensive Care, 8th Edition, is the leading resource for collaborative, interprofessional critical care of newborns. Co-authored by physicians and nurses, it offers concise, comprehensive coverage with a unique multidisciplinary approach and real-world perspective that make it an essential guide for both neonatal nurses and physicians. The 8th edition features the latest neonatal research, evidence, clinical guidelines, and practice recommendations - all in a practical quick-reference format for easy retrieval and review of key information. UNIQUE! Multidisciplinary author and contributor team consists of two physicians and two nurses, with each chapter written and reviewed by a physician-nurse team to ensure that information mirrors current, real-world practice in a neonatal intensive care unit. Critical Findings boxes and tables outline symptoms and diagnostic findings that require immediate attention, helping you prioritize assessment data and steps in initial care. UNIQUE! Clinical content highlighted in color allows you to quickly scan for information that directly affects patient care. UNIQUE! Parent Teaching boxes highlight relevant information to share with a patient's caregivers. Clinical images, graphs, and algorithms illustrate clinically relevant concepts in neonatal intensive care. Streamlined references include only the most current or classic sources. NEW! Coverage of the latest neonatal research, evidence, clinical guidelines, and practice recommendations addresses topics such as: women with chronic illnesses becoming pregnant; maternal obesity; hypotension and shock in premature infants; pain and sedation; dedicated feeding sets vs. IVs for safety; MRSA; pediatric stroke; autism screening; discharge coordination; and more. NEW! The latest AAP recommendations and guidelines for hypoglycemia, jaundice, herpes, respiratory syncytial virus, and neonatal transport team composition. EXPANDED! Revised Evidence-Based Clinical Practice chapter focuses on evidence-based practice and quality improvement and the role of qualitative research in EBP. EXPANDED! Updated Infection in the Neonate chapter features new GBS guidelines and CRP research. The field’s most trusted and comprehensive guide to treating common and rare problems in newborns Gomella’s Neonatology makes it easy to quickly retrieve information and includes sections on procedures and drug administration. The volume of information in this field has exploded over the last several decades and physicians, especially trainees, need a quick, dependable reference to inform their clinical decisions. Compared to other softcover neonatal handbooks, this is my favorite, and it has become the most widely used book in the NICUs that I have visited. It is no longer a small pocket-sized book, but its unique attribute of being both comprehensive and concise makes it the preferred reference in this area. The section of "On-Call" problems is invaluable to residents, and they are now frequently searching for the latest edition in our unit. ?Jay Goldsmith, MD, Doody’s Review Services - 5 Star Review "A copy of this reference should be kept readily available in the newborn unit. It is a potent learning tool for NCU students." -- Family Medicine review of an earlier edition A true essential for nearly three decades, this streamlined reference provides logically organized, quickly retrievable information on basic and advanced management techniques for the neonate. Featuring a convenient outline approach that puts key information at reader’s fingertips, this quick reference covers everything clinicians need to know about on-call neonatal problems, procedures, diseases and disorders, and pharmacology. •The most comprehensive drug formulary available in a neonatal handbook •20 procedures are explained in a step-by-step manner •Full-color images of neonatal rashes and dermatologic problems •Immunization tables •An "On Call" section presenting more than common and serious patient management issues with guidelines for rapid diagnosis and treatment •Cutting-edge strategies for management of specific respiratory syndromes •Valuable appendices, including Abbreviations Used in Neonatology, Blood Pressure Determinations, Isolation Guidelines, and more The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem. For more than 30 years, the highly regarded Secrets Series® has provided students and practitioners in all areas of health care with concise, focused, and engaging resources for quick reference and exam review. Written by Drs. Richard A. Polin and Mark F. Ditmar, Pediatric Secrets, 7th Edition, features the Secrets’ popular question-

and-answer format that also includes lists, tables, pearls, memory aids, and an easy-to-read style – making inquiry, reference, and review quick, easy, and enjoyable. The proven Secrets Series® format gives you the most return for your time – succinct, easy to read, engaging, and highly effective. Fully revised and updated throughout, including protocols and guidelines that are continuously evolving and that increasingly dictate best practices. Practical, up-to-date coverage of the full range of essential topics in the practice of pediatrics. Top 100 Secrets and Key Points boxes provide a fast overview of the secrets you must know for success in practice and on exams. Features bulleted lists, mnemonics, practical tips from leaders in the field – all providing a concise overview of important board-relevant content. Portable size makes it easy to carry with you for quick reference or review anywhere, anytime. Merenstein & Gardner's Handbook of Neonatal Intensive Care, 8th Edition, is the leading resource for collaborative, interprofessional critical care of newborns. Co-authored by physicians and nurses, it offers concise, comprehensive coverage with a unique multidisciplinary approach and real-world perspective that make it an essential guide for both neonatal nurses and physicians. The 8th edition features the latest neonatal research, evidence, clinical guidelines, and practice recommendations — all in a practical quick-reference format for easy retrieval and review of key information. UNIQUE! Multidisciplinary author and contributor team consists of two physicians and two nurses, with each chapter written and reviewed by a physician-nurse team to ensure that information mirrors current, real-world practice in a neonatal intensive care unit. Critical Findings boxes and tables outline symptoms and diagnostic findings that require immediate attention, helping you prioritize assessment data and steps in initial care. UNIQUE! Clinical content highlighted in color allows you to quickly scan for information that directly affects patient care. UNIQUE! Parent Teaching boxes highlight relevant information to share with a patient's caregivers. Clinical images, graphs, and algorithms illustrate clinically relevant concepts in neonatal intensive care. Streamlined references include only the most current or classic sources. NEW! Revised Evidence-Based Clinical Practice chapter focuses on evidence-based practice and quality improvement and the role of qualitative research in EBP. EXPANDED! Updated Infection in the Neonate chapter features new GBS guidelines and CRP research. This manual is a practical guide to the diagnosis and management of neonatal disorders, helping trainees prepare for OSCE examinations. Divided into ten sections, each chapter provides step by step direction, from history taking, clinical examination and assessment, to drugs, instruments, imaging, and interpretation. A complete chapter describes various case studies to assist understanding. The book covers both routine and more complex conditions and features more than 200 clinical photographs and diagrams to enhance learning. Key points Practical guide to diagnosis and management of neonatal disorders Provides comprehensive preparation for OSCE examinations Features case studies to assist understanding Includes more than 200 clinical photographs and diagrams Neonatal and Infant Dermatology is a unique comprehensive and heavily illustrated reference on the dermatologic diseases of newborns and infants. It includes discussions of common and uncommon conditions seen in infants at birth and in the first few months of life. With over 600 superb photographs of normal and abnormal skin conditions including images of rare conditions, this easily accessible resource is essential for pediatricians, neonatologists, and dermatologists as well as other healthcare professionals involved in the diagnosis and treatment of dermatologic diseases in infants and newborns. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Get the depth of coverage you need to effectively diagnose skin conditions in neonates and infants. Expedite effective differential diagnoses with guidance from algorithms, lists, text, boxes and supporting images. Benefit from the experience of over 60 contributors from around the world lead by Drs. Lawrence F. Eichenfield and Ilona J. Frieden, two of the most important names in the fields of dermatology and pediatrics. Glean all essential, up-to-date, need-to-know information with new chapters on Papulosquamous and Lichenoid Disorders, Acneiform and Sweat-gland disorders and two individual chapters on Vascular Malformations and Vascular Tumors. See what to expect and how to proceed with new, high-quality illustrations and photos that provide even more visual examples of abnormal and normal conditions. Take it with you anywhere! Access the full text, image library, and more online at Expert Consult. Detailed, step-by-step instructions and abundant full-color illustrations make MacDonald's Atlas of Procedures in Neonatology, Sixth Edition, an indispensable resource in the neonatal intensive care nursery. This unique reference uses a practical outline format to present clear, easy-to-follow information on indications, preparation, technique, precautions, and how to avoid potential complications. New chapters, new procedural content, and new videos bring you fully up to date with current practice in the NICU. Completely up-to-date this edition presents an interactive approach to neonatal evaluation and management of the most common problems in infants. Case presentations highlight 'real-life' problem-solving skills. A clear, engaging writing style, hundreds of full-color images, and new information throughout make Volpe's Neurology of the Newborn, 6th Edition, an indispensable resource for those who provide care for neonates with neurological conditions. World authority Dr. Joseph Volpe, along with Dr. Terrie E. Inder and other distinguished editors, continue the unparalleled clarity and guidance you've come to expect from the leading reference in the field – keeping you up to date with today's latest advances in diagnosis and management, as well as the many scientific and technological advances that are revolutionizing neonatal neurology. Features a brand new, full-color design with hundreds of new figures, tables, algorithms, and micrographs. Includes two entirely new chapters: Neurodevelopmental Follow-Up and Stroke in the Newborn; a new section on Neonatal Seizures; and an extensively expanded section on Hypoxic-Ischemia and Other Disorders. Showcases the experience and knowledge of a new editorial team, led by Dr. Joseph Volpe and Dr. Terrie E. Inder, Chair of the Department of Pediatric Newborn Medicine at Brigham and Women's Hospital, all of whom bring a wealth of insight to this classic text. Offers comprehensive updates from cover to cover to reflect all of the latest information regarding the development of the neural tube; prosencephalic development; congenital hydrocephalus; cerebellar hemorrhage; neuromuscular disorders and genetic testing; and much more. Uses an improved organization to enhance navigation. THE FIELD'S MOST TRUSTED AND COMPREHENSIVE POCKET GUIDE TO TREATING COMMON AND RARE PROBLEMS IN NEWBORNS--EXPANDED AND UPDATED "A copy of this reference should be kept readily available in the newborn unit. It is a potent learning tool for NCU students." -- Family Medicine review of an earlier edition A true essential for twenty-five years, this streamlined pocket reference provides logically organized, quickly retrievable information on basic and advanced management techniques for the neonate. Featuring a convenient outline approach that puts key information at your fingertips, this quick reference covers everything you need to know about on-call neonatal problems, procedures, diseases and disorders, and pharmacology. FEATURES: NEW International editorial board NEW Chapters on therapeutic hypothermia, laryngeal mask airway, extravasation and infiltration, transillumination, transpyloric intubation, pain in the neonate, coagulation disorders, transient neonatal myasthenia gravis, pertussis, and tuberculosis NEW Full-color images of neonatal rashes and dermatologic problems NEW Immunization tables An "On Call" section presenting 34 common and serious patient management issues with guidelines for rapid diagnosis and treatment Cutting-edge strategies for management of specific respiratory syndromes One of the most comprehensive listings of neonatal medications available anywhere Valuable appendices, including Abbreviations Used in Neonatology, Blood Pressure Determinations, Isolation Guidelines, and more Co-authored by an interprofessional collaborative team of physicians and nurses, Merenstein & Gardner's Handbook of Neonatal Intensive Care, 9th Edition is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care; new evidence-based care "bundles"; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations — all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach that is unmatched by any other resource. Consistent organization within clinical chapters include Physiology/Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-highlighted point-of-care clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Parent Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care "bundles" keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW! Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice. This landmark book, a reference work now in its second edition, provides healthcare practitioners in neonatology with an up-to-date, comprehensive source of readily accessible practical advice that will assist in the expert management of patients and their diverse illnesses. Leading experts in their fields discuss the underlying causes and mechanisms and all aspects of the treatment of the full range of neonatal diseases and abnormalities, citing the evidence base whenever appropriate. In addition, detailed information is provided on epidemiology and fetal medicine; therapeutic issues such as the organization of care, transport services, and home care after discharge; legal issues; nutrition; and the consequences of medication use during pregnancy, maternal drug abuse and smoking, and maternal diabetes. The inclusion of summaries, tables, and carefully selected guidelines and recommendations will supply practitioners with quick references and instant solutions during daily practice. The book will be a superb resource for all involved in the care of newborn babies, including neonatologists, pediatricians, pediatric surgeons, anesthesiologists, midwives, and nursing staff. It is published within the SpringerReference program, which delivers access to living editions constantly updated through a dynamic peer-

review publishing process. The workbook is a mixture of anatomy, physiology, pathology, pharmacology, radiology, and research. It is full of information for those who take care of neonates. The New England Journal of Medicine gave the book a favorable review. It is completely revised to incorporate advances in neonatal care. The 3rd Edition presents an interactive approach to neonatal evaluation and management of the most common problems in infants. Each chapter features case histories that require the reader to make diagnostic decisions and to explain scientific concepts as they apply to each clinical problem. Features generous use of graphics and illustrations to enhance explanations and facilitate learning. Provides case presentations highlighting real life problem-solving skills. Includes timely references for additional sources of up-to-date information. Offers chapters written by leading experts in their field. Presents clear discussions of rationales for all recommendations. Features extensively updated, state-of-the-art information throughout. Includes many new contributors, new cases, and new perspectives on disease diagnosis and management. Offers a new chapter: Infants of the Drug-Addicted Mother (Ch. 20). This little pocket guide has been designed as a ready reference to guide junior medical officers and nursing staff who care for infants admitted to intensive and special care.
