Movement Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post pandemic recovery In 1969 as all students of New York City history think they have learned master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway The ten lane elevated expressway would have sliced across SoHo and Little Italy demolishing historic buildings and displacing thousands of families and businesses Jacobs and her neighbors defeated Moses and as a result New York became the only major American city with no interstate highway running through its core Like many global cities though New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile New York has now spent more than fifty years trying to undo those mistakes wresting back city space for people not cars *Movement* New York's Long War to Take Back Its Streets from the Car chronicles the earlier less known battles that preceded the cancellation of the Lower Manhattan Expressway Jacobs became an example for generations of urban planners but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park Moses may serve handily as New York's uber villain now but who before him was responsible for destroying a critical part of New York's transit system A well respected urban writer who has focused on New York's transportation system for more than a decade author Nicole Gelinas resumes the story where Robert Caro's landmark *The Power Broker* ended *Movement* explores how in the half century leading up to the COVID 19 pandemic New York's re embracement of its mass transit system and a livable streetscape helped save the city Gelinas tackles the 1970s environmental movement the 1980s rebuilding of the subways and more contemporary battles from Mayor Bloomberg's push for more pedestrian plazas and bike lanes in the early 2000s to transportation advocates protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s to how New York's stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery Introducing a cast of transportation heroes to rival Jane Jacobs Shirley Hayes Hazel Henderson Richard Ravitch Nilka Martell and puncturing the myth of Moses as New York's anti hero *Movement* explores how New York City has helped redefine what it means to be a global city not a place that is easy to drive through but a place where people can take transit walk and bike to work to school or just for fun **Taxi!** Graham Russell Gao Hodges, 2020-03-17 Why the cabdriver is the real victim of the false promises of Uber and the gig economy 2007 Noteworthy Book in Industrial Relations and Labor Economics Princeton University Industrial Relations Section Hailed in its first edition as a classic study of New York City's history and people Graham Russell Gao Hodges's *Taxi* is a remarkable evocation of the forgotten history of the taxi driver This deftly woven narrative captures the spirit of New York City cabdrivers and their hardscrabble struggle to capture a piece of the American dream From labor unrest and racial strife to ruthless competition and political machinations Hodges

recounts this history through contemporary news accounts Hollywood films and the words of the cabbies themselves A new preface recalls the author's five years of hacking in New York City in the early 1970s and a new concluding chapter explores the rise of app based ridesharing services with the arrival of companies like Uber and Lyft Sharply criticizing the use of the independent contractor model that is the cornerstone of Uber and the gig economy Hodges argues that the explosion of for hire vehicles in Manhattan reversed decades of environmental anti congestion efforts He calls for a return to the careful regulations that governed taxicabs for decades and provided a modest yet secure living for cabbies Whether or not you've ever hailed a cab on Broadway Taxi provides a fascinating perspective on New York's most colorful emissaries New York City, The Routledge Handbook of Public Transport Corinne Mulley, John Nelson, Stephen Ison, 2021-05-12 The Routledge Handbook of Public Transport is a reference work of chapters providing in depth examination of the current issues and future developments facing public transport Chapters in this book are dedicated to specific key topics identifying the challenges therein and pointing to emerging areas of research and concern The content is written by an international group of expert contributors and is enhanced through contributions from practitioners to deliver a broader perspective The Handbook deals with public transport policy context modal settings public transport environment public transport delivery issues smart card data for planning and the future of public transport This comprehensive reference work will be a vital source for academics researchers and transport practitioners in public transport management transport policy and transport planning

Transport and Pandemic Experiences Maria Attard, Corinne Mulley, 2022-10-17 Transport and Pandemic Experiences discusses how the accumulated knowledge of the pandemic needs to be capitalised in our fight against climate change and helps to identify future research imperatives for better understanding and greater policy transferability **How Do I Tax Thee?** Kristin Tate, 2018-03-20 We all know the government taxes our income Federal state and local taxes are withheld by employers as are Social Security payments But what about the many other ways the government covertly drains money from our wallets Have you studied your cell phone bill Customers in New York State pay an average of 24.36% in combined taxes on their wireless bills They're also charged for obscure services they didn't ask for and don't understand like a universal service fund fee an FCC compliance fee a line service fee and an emergency services fee These aren't taxes strictly speaking The government imposes these administrative and regulatory costs and your wireless provider passes them along to you What about your cable bill Your power bill Your trash bill The cost of groceries a gallon of gas a cab ride a hotel stay and a movie ticket are all inflated by hidden fees How much of what you pay at the grocery store pump airport or the box office is really an indirect tax In a series of short pointed fact laden humorous chapters Kristin Tate exposes how up to half of your income is siphoned straight into federal state and city government coffers and also where these hidden taxes and fees come from **Dust Jacket** **The Signals Are Talking** Amy Webb, 2016-12-06 A Fast Company best book of the year A Washington Post bestseller Winner of the 2017 Axiom Business Book Award in Business Technology How do you tell a real trend from the

merely trendy How for example will a technology like artificial intelligence machine learning self driving cars biohacking bots and the Internet of Things affect us our businesses and workplaces How will it eventually change the way we live work play and think and how should we prepare for it now In *The Signals Are Talking* noted futurist Amy Webb shows us how to analyze the true signals those patterns that will coalesce into a trend with the potential to change everything and land on the right side of disruption The future Webb shows isn't something that happens to us passively Using a proven tested methodology she enables us to see ahead and forecast what's to come challenging us to create our own preferred futures

Between Public and Private Mobility, 2016-03 TRB Special Report 319 analyzes the ways that innovative transportation services including ridesharing carsharing bikesharing and microtransit are changing mobility for millions of travelers Such services could reduce congestion and emissions from surface transportation if regulated wisely to encourage concurrent instead of sequential ridesharing Rapidly growing transportation network companies TNCs such as Uber and Lyft however are disrupting conventional taxi and limousine services and are raising policy challenges related to personal security and public safety insurance requirements employment and labor issues and accessibility and equity The committee's report offers guidance to state and local officials responsible for policy setting and regulation of for hire transportation services in each of these areas The report also addresses the need for greater consistency in regulations across jurisdictions and calls for TNCs to share more information about the volume the frequency and the types of trips they are providing to allow for informed regulation and planning of transportation services provided by publisher

Disruptive Transport William Riggs, 2018-12-07 With the rise of shared and networked vehicles autonomous vehicles and other transportation technologies technological change is outpacing urban planning and policy Whether urban planners and policy makers like it or not these transformations will in turn result in profound changes to streets land use and cities But smarter transportation may not necessarily translate into greater sustainability or equity There are clear opportunities to shape advances in transportation and to harness them to reshape cities and improve the socio economic health of cities and residents There are opportunities to reduce collisions and improve access to healthcare for those who need it most particularly high cost high need individuals at the younger and older ends of the age spectrum There is also potential to connect individuals to jobs and change the way cities organize space and optimize trips To date very little discussion has centered around the job and social implications of this technology Further policy dialogue on future transport has lagged particularly in the arenas of

sustainability and social justice Little work has been done on decision making in this high uncertainty environment a deficiency that is concerning given that land use and transportation actions have long and lagging timelines This is one of the first books to explore the impact that emerging transport technology is having on cities and their residents and how policy is needed to shape the cities that we want to have in the future The book contains a selection of contributions based on the most advanced empirical research and case studies for how future transport can be harnessed to improve urban sustainability and justice **The Road to Freedom** Arthur C. Brooks,2012-05-08 Argues that the Obama administration has used the economic crises to move away from free enterprise and offers a way back via sound public policy

Transportation Analytics in the Era of Big Data Satish V. Ukkusuri,Chao Yang,2018-07-28 This book presents papers based on the presentations and discussions at the international workshop on Big Data Smart Transportation Analytics held July 16 and 17 2016 at Tongji University in Shanghai and chaired by Professors Ukkusuri and Yang The book is intended to explore a multidisciplinary perspective to big data science in urban transportation motivated by three critical observations The rapid advances in the observability of assets platforms for matching supply and demand thereby allowing sharing networks previously unimaginable The nearly universal agreement that data from multiple sources such as cell phones social media taxis and transit systems can allow an understanding of infrastructure systems that is critically important to both quality of life and successful economic competition at the global national regional and local levels There is presently a lack of unifying principles and methodologies that approach big data urban systems The workshop brought together varied perspectives from engineering computational scientists state and central government social scientists physicists and network science experts to develop a unifying set of research challenges and methodologies that are likely to impact infrastructure systems with a particular focus on transportation issues The book deals with the emerging topic of data science for cities a central topic in the last five years that is expected to become critical in academia industry and the government in the future There is currently limited literature for researchers to know the opportunities and state of the art in this emerging area so this book fills a gap by synthesizing the state of the art from various scholars and help identify new research directions for further study **Watch Your Back** Roger Eckstine,2016-09-20 Concrete Strategies for Staying Safe and Protecting Yourself from Assailants Do you ever feel the urge to furtively look over your shoulder to check if someone s following you Have you second guessed a decision to walk in a poorly lit area late at night When you see crime reports on the news do you ever wonder if it could happen to you Every day unsuspecting people fall victim to muggers pickpockets carjackers and other criminals What can you do to make sure you re not one of them In Watch Your Back Roger Eckstine presents dozens of possible risky scenarios that can occur in daily life and ways to counteract each threat Potential hazards include Paying for gas at the pump Using the ATM Road rage and the belligerent fender bender An active shooter attack Concealed carry and the rigors of daily life And much more Eckstine illustrates his points by referencing case studies and news clippings of real

life events He describes various ways people can be prepared both mentally and physically for altercations with an emphasis on training yourself to constantly observe your surroundings Additionally he suggests emergency devices personal weaponry and communication tools to help in dangerous situations You and your loved ones deserve to feel safe all the time Watch Your Back has the advice you need to make this happen **Air Compressor License** National Learning Corporation,2014 The Air Compressor License Passbook R prepares you for your test by allowing you to take practice exams in the subjects you need to study It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam

driving is thus best understood alongside domestic and other gendered service work as reproductive labors devalued and often demonetized to benefit the national economy Spent behind the Wheel is a must for readers interested in critical studies of technological change and the gig economy showing how drivers capacities are drained for the benefit of riders

How to repair the disconnect between designers and users producers and consumers and tech elites and the rest of us toward a more democratic internet In this provocative book Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics economics and other inefficient inharmonious human activities We may love the immediacy of Google search results the convenience of buying from Amazon and the elegance and power of our Apple devices but it s a one way top down process We re not asked for our input or our opinions only for our data The internet is brought to us by wealthy technologists in Silicon Valley and China It s time Srinivasan argues that we think in terms beyond the Valley Srinivasan focuses on the disconnection he sees between designers and users producers and consumers and tech elites and the rest of us The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy In search of a more democratic internet Srinivasan takes us to the mountains of Oaxaca East and West Africa China Scandinavia North America and elsewhere visiting the design labs of rural low income and indigenous people around the world He talks to a range of high profile public figures including Elizabeth Warren David Axelrod Eric Holder Noam Chomsky Lawrence Lessig and the founders of Reddit as well as community organizers labor leaders and human rights

activists To make a better internet Srinivasan says we need a new ethic of diversity openness and inclusivity empowering those now excluded from decisions about how technologies are designed who profits from them and who are surveilled and exploited by them **When Innovation Moves at Digital Speed** MIT Sloan Management Review,2018-07-17 Practical advice from experts on how to create manage measure and improve innovation in and for today s digital markets All organizations grapple with what digitalization means for their business and in particular how digital forces will drive their approaches to innovation But very few organizations have clearly defined the scale speed and scope of their engagement with the digital world These essays from the pages of the preeminent journal MIT Sloan Management Review offer practical advice from experts on how to create facilitate and manage innovation in and for today s digital markets The essays emphasize the power of intersections where different mindsets and skills collide These connections can be external LEGO for example has engaged more than 100 000 adult fans in user communities or internal as when brokers connectors and energizers act within organizations Contributors stress the value of action over analysis citing examples that affirm the power of trial and error experimentation They demonstrate that innovation success requires thinking beyond technology Innovation is not created by white coated scientists in a lab it is not the job of the few but of the many And finally the contributors warn that the greatest enemy lies within innovators often encounter fierce internal resistance They consider innovations in the innovation process itself describing the promise and pitfalls of design thinking and offering advice on how to manage the tension between new and existing business models Innovation is not a magical act practiced by a select few with rare gifts Innovation is a discipline that can be measured managed and improved When Innovation Moves at Digital Speed provides practical guidance for innovation success Contributors Daniel Amaral Jamie Anderson Scott D Anthony Yun Mi Antorini Michael Arena Tormod Askildsen Michael Ball Thomas Bartman Jennie Bj rk Marcel Bogers Anna Brattstr m Clayton M Christensen Edivandro Carlos Conforto Rob Cross Charles Dhanaraj Thomas Fink Nicolai J Foss Johan Frishammar Johann Harnoss Srivardhini K Jha L le Kesebi Rishiksha T Krishnan Martin Kupp Sean Looram Mats Magnusson Ann Majchrzak Arvind Malhotra James Morgan Albert M Mu iz Jr Ramiro Palma Ishwardutt Parulkar Eric Rebentisch J rg Reckhenrich Martin Reeves Anders Richtn r Dave Rochlin Duncan Simester Jonathan Sims Joseph V Sinfield Durward K Sobek II Freddy Solis Kristian J Sund Mary Uhl Bien Derek van Bever J Andrei Villarroel Amy Webb
