**Simon Marius and His Research** Hans Gaab, Pierre Leich, 2019-06-19 The margravian court astronomer Simon Marius was involved in all of the new observations made with the recently invented telescope in the early part of the seventeenth century He also discovered the Moons of Jupiter in January 1610 but lost the priority dispute with Galileo Galilei because he missed to publish his findings in a timely manner The history of astronomy neglected Marius for a long time finding only the apologists for the Copernican system worthy of attention In contrast the papers presented on the occasion of the Simon Marius Anniversary Conference 2014 and collected in this volume demonstrate that it is just this struggle to find the correct astronomical system that makes him particularly interesting His research into comets sunspots the Moons of Jupiter and the phases of Venus led him to abandon the Ptolemaic system and adopt the Tyconic one He could not take the final step to heliocentricity but his rejection was based on empirical arguments of his time This volume presents a translation of the main work of Marius and shows the current state of historical research on Marius

**Management of Marine Protected Areas** Paul D. Goriup, 2017-01-17 With the health of the world's oceans threatened as never before it is becoming increasingly apparent that Marine Protected Areas (MPAs) play a vitally important role in protecting marine and coastal habitats. *Management of Marine Protected Areas: A Network Perspective* draws on the results of a major EU sponsored research project related to the establishment of networks of MPAs in the Mediterranean and Black Seas that transpired from February 2011 to January 2016. Featuring contributions by leading university and national research institute based scientists, chapters utilize the latest research data and developments in marine conservation policy to explore issues related to ways in which networks of MPAs may amplify the effectiveness and conservation benefits of individual areas within them. Topics addressed include the broader socio-economic impacts of MPAs in the Mediterranean and Black Seas, the use of Marine Spatial Planning (MSP) to resolve conflicts between marine resource use and protection, special protection measures under the EU's Marine Strategy Framework Directive (MSFD), ecological value assessments in the Black Sea, the Ecosystem Approach (EA) for managing marine ecosystems, MPAs along Turkey's Black Sea coast, MPAs and offshore wind farms, and managing and monitoring MPA networks within and between the Black and Mediterranean Seas. *Management of Marine Protected Areas: A Network Perspective* offers invaluable insights into the role of MPAs in preserving the welfare and long-term viability of our world's oceans.
