Global Trends 2040 National Intelligence Council,2021-03 The ongoing COVID 19 pandemic marks the most significant singular global disruption since World War II with health economic political and security implications that will ripple for years to come Global Trends 2040 2021 Global Trends 2040 A More Contested World 2021 released by the US National Intelligence Council is the latest report in its series of reports starting in 1997 about megatrends and the world s future This report strongly influenced by the COVID 19 pandemic paints a bleak picture of the future and describes a contested fragmented and turbulent world It specifically discusses the four main trends that will shape tomorrow s world Demographics by 2040 1 4 billion people will be added mostly in Africa and South Asia Economics increased government debt and concentrated economic power will escalate problems for the poor and middleclass Climate a hotter world will increase water food and health insecurity Technology the emergence of new technologies could both solve and cause problems for human life Students of trends policymakers entrepreneurs academics journalists and anyone eager for a glimpse into the next decades will find this report with colored graphs essential reading

International Economics Study Guide Stephen Ross Yeaple,2008-04-11 For use with International Economics this innovative resource reinforces the topics and key concepts covered in the text *The Value of Everything* Mariana Mazzucato,2018-04-26 Who really creates wealth in our world And how do we decide the value of what they do At the heart of today s financial and economic crisis is a problem hiding in plain sight In modern capitalism value extraction the siphoning off of profits from shareholders dividends to bankers bonuses is rewarded more highly than value creation the productive process that drives a healthy economy and society We misidentify takers as makers and have lost sight of what value really means Once a central plank of economic thought this concept of value what it is why it matters to us is simply no longer discussed Yet argues Mariana Mazzucato in this penetrating and passionate new book if we are to reform capitalism to radically transform an increasingly sick system rather than continue feeding it we urgently need to rethink where wealth comes from Who is creating it who is extracting it and who is destroying it Answers to these questions are key if we want to replace the current parasitic system with a type of capitalism that is more sustainable more symbiotic that works for us all The Value of Everything will reignite a long needed debate about the kind of world we really want to live in

Causes and Consequences of Income Inequality Ms.Era Dabla-Norris,Ms.Kalpana Kochhar,Mrs.Nujin Suphaphiphat,Mr.Frantisek Ricka,Ms.Evridiki Tsounta,2015-06-15 This paper analyzes the extent of income inequality from a global perspective its drivers and what to do about it The drivers of inequality vary widely amongst countries with some common drivers being the skill premium associated with technical change and globalization weakening protection for labor and lack of financial inclusion in developing countries We find that increasing the income share of the poor and the middle class actually increases growth while a rising income share of the top 20 percent

results in lower growth that is when the rich get richer benefits do not trickle down This suggests that policies need to be country specific but should focus on raising the income share of the poor and ensuring there is no hollowing out of the middle class To tackle inequality financial inclusion is imperative in emerging and developing countries while in advanced economies policies should focus on raising human capital and skills and making tax systems more progressive **The Great Demographic Reversal** Charles Goodhart, Manoj Pradhan, 2020-08-08 This original and panoramic book proposes that the underlying forces of demography and globalisation will shortly reverse three multi decade global trends it will raise inflation and interest rates but lead to a pullback in inequality Whatever the future holds the authors argue it will be nothing like the past Deflationary headwinds over the last three decades have been primarily due to an enormous surge in the world's available labour supply owing to very favourable demographic trends and the entry of China and Eastern Europe into the world's trading system This book demonstrates how these demographic trends are on the point of reversing sharply coinciding with a retreat from globalisation The result Ageing can be expected to raise inflation and interest rates bringing a slew of problems for an over indebted world economy but is also anticipated to increase the share of labour so that inequality falls Covering many social and political factors as well as those that are more purely macroeconomic the authors address topics including ageing dementia inequality populism retirement and debt finance among others This book will be of interest and understandable to anyone with an interest on where the world's economy may be going **Macroeconomics in**

Context Neva Goodwin, Jonathan M. Harris, Julie A. Nelson, Brian Roach, Mariano Torras, 2015-03-12 **Macroeconomics in Context** lays out the principles of macroeconomics in a manner that is thorough up to date and relevant to students Like its counterpart **Microeconomics in Context** the book is attuned to economic realities and it has a bargain price The **in Context** books offer affordability engaging treatment of high interest topics from sustainability to financial crisis and rising inequality and clear straightforward presentation of economic theory Policy issues are presented in context historical institutional social political and ethical and always with reference to human well being **International Economic Review**, 2002-11

Principles Ray Dalio, 2018-08-07 1 New York Times Bestseller Significant The book is both instructive and surprisingly moving The New York Times Ray Dalio one of the world's most successful investors and entrepreneurs shares the unconventional principles that he's developed refined and used over the past forty years to create unique results in both life and business and which any person or organization can adopt to help achieve their goals In 1975 Ray Dalio founded an investment firm Bridgewater Associates out of his two bedroom apartment in New York City Forty years later Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States according to Fortune magazine Dalio himself has been named to Time magazine's list of the 100 most influential people in the world Along the way Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture which he describes as an idea meritocracy that strives to achieve meaningful

work and meaningful relationships through radical transparency It is these principles and not anything special about Dalio who grew up an ordinary kid in a middle class Long Island neighborhood that he believes are the reason behind his success In Principles Dalio shares what he s learned over the course of his remarkable career He argues that life management economics and investing can all be systemized into rules and understood like machines The book s hundreds of practical lessons which are built around his cornerstones of radical truth and radical transparency include Dalio laying out the most effective ways for individuals and organizations to make decisions approach challenges and build strong teams He also describes the innovative tools the firm uses to bring an idea meritocracy to life such as creating baseball cards for all employees that distill their strengths and weaknesses and employing computerized decision making systems to make believability weighted decisions While the book brims with novel ideas for organizations and institutions Principles also offers a clear straightforward approach to decision making that Dalio believes anyone can apply no matter what they re seeking to achieve Here from a man who has been called both the Steve Jobs of investing and the philosopher king of the financial universe CIO magazine is a rare opportunity to gain proven advice unlike anything you ll find in the conventional business press

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 The winners of the Nobel Prize show how economics when done right can help us solve the thorniest social and political problems of our day Figuring out how to deal with today s critical economic problems is perhaps the great challenge of our time Much greater than space travel or perhaps even the next revolutionary medical breakthrough what is at stake is the whole idea of the good life as we have known it Immigration and inequality globalization and technological disruption slowing growth and accelerating climate change these are sources of great anxiety across the world from New Delhi and Dakar to Paris and Washington DC The resources to address these challenges are there what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us If we succeed history will remember our era with gratitude if we fail the potential losses are incalculable In this revolutionary book renowned MIT economists Abhijit V Banerjee and Esther Duflo take on this challenge building on cutting edge research in economics explained with lucidity and grace Original provocative and urgent *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect It is an extraordinary achievement one that shines a light to help us appreciate and understand our precariously balanced world
