The Core: Teaching Your Child the Foundations of Classical Education Leigh A. Bortins, 2010-06-08 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can t advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In The Core Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences

Echo in Celebration Leigh A. Bortins, 2008-01-01 Children are natural learners and building a core foundation at an early age is critical to their success both educationally and in life In this book education expert and author Leigh A Bortins incorporates the best ideas from the ancients and gives parents the tools to revive classical learning

Ten Ways to Destroy the Imagination of Your Child Anthony Esolen, 2023-07-18 Play dates soccer practice day care political correctness drudgery without facts television video games constant supervision endless distractions these and other insidious trends in child rearing and education are now the hallmarks of childhood As author Anthony Esolen demonstrates in this elegantly written often wickedly funny book almost everything we are doing to children now constricts their imaginations usually to serve the ulterior motives of the constrictors Ten Ways to Destroy the Imagination of Your Child takes square aim at these accelerating trends in a bitingly witty style reminiscent of C S Lewis while offering parents and children hopeful alternatives Esolen shows how imagination is snuffed out at practically every turn in the rearing of children almost exclusively indoors in the flattening of love to sex education and sex education to prurience and hygiene in the loss of traditional childhood games in the refusal to allow children to organize themselves into teams in the effacing of the glorious differences between the sexes in the dismissal of the power of memory which creates the worst of all possible worlds in school drudgery without even the merit of imparting facts in the strict separation of the child s world from the adult s and in the denial of the transcendent which places a low ceiling on the child s developing spirit and mind But Esolen doesn t stop at pointing out the problem he offers clear solutions as well With charming stories from his own boyhood and an assist from the master authors and thinkers of the Western tradition Ten Ways to Destroy the Imagination of Your Child is a welcome respite from the overwhelming banality of contemporary culture Interwoven throughout this indispensable guide to child rearing is a rich tapestry of the literature music art and thought that once enriched the lives of American children Ten Ways to Destroy the Imagination of Your Child confronts contemporary trends in parenting and schooling by reclaiming lost traditions This practical insightful book is essential reading for any parent who cares about the paltry thing that childhood has become and who wants to give a child something beyond the dull drone of today s culture

Teaching from Rest Sarah Mackenzie, 2015-09-15 In the book of Philippians we are told to be anxious over nothing and yet we are anxious over everything We worry that our students will be behind that they won t score well on the SAT get into a good college or read enough of the Great Books Our souls are restless anxiously wondering if something else out there might be just a little bit better if maybe there is another way or another curriculum that might prove to be superior to what we are doing now God doesn t call us to this work and then turn away to tend to other more important matters He promises to stay with us He assures us that if we rely on Him alone then He will provide all that we need What that means on a practical level is that we have to stop fretting over every little detail We need to stop comparing We ve got to drop the self inflated view that we are the be all end all of whether the education we are offering our students is going to be as successful as we hope it is After all our job is not to be successful success itself is entirely beside the point It s faithfulness that He wants
