The purpose of this study was to examine the relationship between one North Texas School District's Limited English Proficient (LEP) students' language acquisition levels as measured by TELPAS and the students' academic performance on the Science and Social Studies the State of Texas Assessment of Academic Readiness (STAAR) tests. If a relationship existed, this study sought to determine if there was a minimum score on TELPAS that would be related to student success on STAAR in the area of science and social studies. In the state of Texas, TELPAS determines the student's level of English language proficiency and is given to all LEP students each year. STAAR tests measure academic achievement. In the eighth grade students take the STAAR Science and STAAR Social Studies test, in addition to the other areas of reading and math. The TELPAS Composite scores and STAAR Science and STAAR Social Studies scores for eight grade students in one district were examined for the 2013-2014 school year and the 2014-2015 school year. These scores were examined both separately and combined using a correlation to determine if a relationship existed. Overall, the strength of the relationship between TELPAS and STAAR Science was moderate. The relationship between TELPAS and STAAR Social Studies was also moderate. The strength of the relationship was not strong enough to determine if a minimum score on TELPAS could be established to insure success on the STAAR Science and STAAR Social Studies tests. The Articles of Confederation were passed by the Continental Congress in 1777, but were not ratified by the states until 1781. This first governing document of America put the new country in good stead, but it had some shortcomings, including the creation of a weak central government. It was replaced by the U.S. Constitution in 1789. ***Includes Practice Test Questions*** Texas Massage Therapy Written Exam Secrets helps you ace the Texas Massage Therapy Written Exam, without weeks and months of endless studying. This supplemental text is an historical account of the beginning years of the social studies. Using the 1916 Social Studies report as a base, the book outlines the issues, contexts, and individuals that were influential in the genesis of the seminal social studies prototype program. The author explains that many of our present interests such as critical thinking, decision making, inquiry, reflective thinking, foundational studies, and cultural literacy can be found within the texts of the 1916 social studies program. Saxe also shows that the roots of the social studies program are found in the social sciences and not the traditional history curriculum. Included are chronological time lines that serve to illustrate the growth of the social studies, as well as an extensive bibliography of the primary foundational works of the social studies, including the 1916 report. These materials greatly enhance the value of Saxe's work for social studies educators and students.
