Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States some populations suffer from far greater disparities in health than others Those disparities are caused not only by fundamental differences in health status across segments of the population but also because of inequities in factors that impact health status so called determinants of health Only part of an individual's health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also

contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives When these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways Communities in Action Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States This report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome *Political Science Abstracts* IFI/Plenum Data Company staff,2013-11-11 *Political Science Abstracts* is an annual supplement to the *Political Science Government and Public Policy Series of The Universal Reference System* which was first published in 1967 All back issues are still available
