The New World History Jan 30 2023 The New World History is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field.

The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the "big history" movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

End of History and the Last Man May 22 2022 Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

World History in Documents Oct 07 2023 While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns's best-selling *World History in Documents* was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of *World History in Documents* especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.

The Status of World History Instruction in American Secondary Schools May 14 2024 The one-year course in world history, popular in some quarters, does not seem to have made much headway. High school level courses on world-history are one of the many responses to the World Wars, yet said courses have never been recommended by a committee of national scope on which there were any historians. Opinion surveys among teachers and students indicate that no other part of the typical social studies program is more criticized than the tenth grade level one year elective world history course. These courses are increasing in number, textbooks are multiplying, and a few interesting experiments are being worked out--yet there is no general agreement on

organization, scope, objectives, teaching strategies, or assessment in these courses. This document is a summary of historical and recent surveys on curricular trends in social studies with regard to world history, to help educators assess what impact they may have on the teaching of world history in the 1970s.
