Argumentative Writing in a Second Language is a collection on teaching argumentative writing, offering multiple vantage points drawn from the contributors' own teaching and research experiences. The value of learning how to compose argumentative texts cannot be overstated, and yet, very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context. Thus, this volume shifts attention to teachers and argumentative writing instruction, especially within increasingly common multimodal and digital literacy settings. While doing so, it provides a comprehensive, wide-ranging view of the L2 argumentative writing landscape within an instructional lens. Part I of the volume is topic-oriented and focuses on explorations of important issues and perspectives, while Part II features several chapters reporting classroom-based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught. The book will be of value to pre-service and in-service teachers in varying instructional contexts, as well as teacher educators and L2 writing scholars/researchers. The Genre of Argument is a rhetoric that defines the

distinguishing characteristics of the argument paper, which students can understand easily once they are aware of its context and purpose. By looking at argument as a genre, students gain insight into how purpose influences many features of successful argumentative writing. Students are led to find the problem within a topic and develop a position or thesis in response to that situation. The overt consideration of genre will help students to apply generic conventions in a multiplicity of contexts. An exploration of the fast food industry in the United States, from its roots to its long-term consequences. *Secrets of Argumentative Writing Revealed* Experienced professor of academic writing reveals the techniques that make your writing sound scholarly. Want to raise your grade in college or graduate school? Even high schoolers can benefit from this advanced course in essay writing. There is no better way to transform your writing. Students report that major improvements in their writing and their GPA occurred as a result of using *Crack the Essay*. *Academic Writing, Real World Topics* fills a void in the writing-across-the-curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division; and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, *Academic Writing, Real World Topics* introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader, or from one of many resources included in each chapter's Suggested Additional Resources. Part II, Real World Topics, also refers extensively to the Guide. Thus, the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content. Offers teaching strategies and resources to instruct sixth- through twelfth-graders on how to prepare and write strong arguments and evaluate the arguments of others, providing step-by-step guidance on arguments of fact, judgment, and policy, and including advice to help students understand how judgments get made in the real world, how to develop and support criteria for an argument, and related topics. *Understanding and Evaluating Research: A Critical*

Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report. This succinct, entertaining book covers a wide variety of critical thinking skills and offers abundant practice in applying those skills to students' writing. Written as an essential guide for first-year university students, *A Guide to University Assessment* provides explanation and strategies for the successful completion of popular forms of assessment. This book takes the unique approach of catering for reading learners through definition and clarification of key aspects in essay writing (telling them how to write an essay), before focusing on visual learners with a sample essay that is deconstructed with the use of detailed figures (showing them how to write the essay). This is followed with a guide for public speaking, and a section outlining how to approach group work. This easy-to-follow method not only increases student understanding of the different aspects of university assessment, but demonstrates the purpose and function of these aspects in a working sample. From the earliest stages of generating ideas, through brainstorming, to the final development of argument, this resource will promote essay writing, public speaking and group work skills and assist in consistently achieving higher marks.

You'll learn how to: Introduce high-interest topics to students to get them interested and engaged in argument writing. Teach students to look at multiple sides of an issue and critically evaluate evidence to construct informed, defensible arguments. Make argument writing an interactive, student-driven exercise in which students pursue their own writing projects. Focused on the teaching and learning argumentative writing in

grades 9-12, this important contribution to literacy education research and classroom practice offers a new perspective, a set of principled practices, and case studies of excellent teaching. The case studies illustrate teaching and learning argumentative writing as the construction of knowledge and new understandings about experiences, ideas, and texts. Six themes key to teaching argumentative writing as a thoughtful, multi-leveled practice for deep learning and expression are presented: teaching and learning argumentative writing as social practice, teachers' epistemological beliefs about argumentative writing, variations in instructional chains, instructional conversations in support of argumentative writing as deep learning and appreciation of multiple perspectives, contextualized analysis of argumentative writing, and the teaching and learning of argumentative writing and the construction of rationalities. The Structure of Argument covers critical thinking, reading, writing, and research. Concise but thorough, it includes questions, exercises, writing assignments, and a full semester's worth of readings—everything students need in an affordable, compact format. Presenting Aristotelian and Rogerian as well as Toulmin argument, The Structure of Argument has been totally revised, with more than three-quarters of the readings new (including many multimodal selections available online at no extra charge), new coverage of multimodal argument, expanded treatment of key rhetorical concepts, a fresh new design, and additional support for research. Its emphasis on Toulmin argument makes Structure highly teachable, since the approach fits with the goals of the composition course. This work takes you step by step through the art of argument, from thinking about what to write and how you might write it, to how you may strengthen your claims, and how to come to a strong conclusion. The Process of Argument: An Introduction is a necessary companion for anyone seeking to engage in successful persuasion: To organize, construct, and communicate arguments. textbook. It gives you tools, tips, and tricks that actually explain what a writer does. It doesn't sugarcoat the process or dumb down the very real challenges that entering a college writing space requires. This book is more like a friend. It's the kind of friend that will coach you through a tough time and encourage you, and it will make you laugh while you go through it. It's the kind of friend who holds your hair back when you're sick of writing and gives you the courage to try again. Roy K. Humble is the kind of writing teacher who understands the struggle of learning how to write arguments like a college student and doesn't just tell you what you want to hear. His lessons here are profound, but in the sense that they are delivered by someone who wants you to feel included in the conversation about what good college writing should be. He writes to students in language they can understand without becoming English majors, and with just enough humor to keep them reading. He writes for faculty, moving step by step through the unadorned guiding principles of effective formal writing so that faculty have a great framework on which to build their classes. Perhaps most importantly, Humble understands that the price of a book matters to students, so his books are affordable. From every perspective, Humble gets it. The Humble Argument has students covered on these important topics: Understanding argument as an idea Grasping the stages of the writing process Organizing an argument around rhetorical principles Thinking for yourself as a college student Crafting a careful and clear thesis Gathering and synthesizing evidence to support a thesis Guiding readers through a thoughtful persuasive essay

If you want to learn how to shoot a basketball, you begin by carefully observing someone who knows how to shoot a basketball. If you want to be a writer, you begin by carefully observing the work of accomplished writers. Recognizing the importance that modeling plays in the learning process, high school English teacher Kelly Gallagher shares how he gets his students to stand next to and pay close attention to model writers, and how doing so elevates his students' writing abilities. Write Like This is built around a central premise: if students are to grow as writers, they need to read good writing, they need to study good writing, and, most important, they need to emulate good writers. In Write Like This, Kelly emphasizes real-world writing purposes, the kind of writing he wants his students to be doing twenty years from now. Each chapter focuses on a specific discourse: express and reflect, inform and explain, evaluate and judge, inquire and explore, analyze and interpret, and take a stand/propose a solution. In teaching these lessons, Kelly provides mentor texts (professional samples as well as models he has written in front of his students), student writing samples, and numerous assignments and strategies proven to elevate student writing. By helping teachers bring effective modeling practices into their classrooms, Write Like This enables students to become better adolescent writers. More important, the practices found in this book will help our students develop the writing skills they will need to become adult writers in the real world. An Introduction to the

form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the *Orwell's Essays* series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' – 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' – and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. The human presence that animates the personal essay is surely one of the most beguiling of literary phenomena, for it comes across in so familiar a voice that it's easy to believe we are listening to the author rather than a textual stand-in. But the "person" in a personal essay is always a written construct, a fabricated character, its confessions and reminiscences as rehearsed as those of any novelist. In this first book-length study of the personal essay, Carl Klaus unpacks this made-up self and the manifold ways in which a wide range of essayists and essays have brought it to life. By reconceiving the most fundamental aspect of the personal essay—the I of the essayist—Klaus demonstrates that this seemingly uncontrived form of writing is inherently problematic, not willfully devious but bordering upon the world of fiction. He develops this key idea by explaining how structure, style, and voice determine the nature of a persona and our perception of it in the works of such essayists as Michel de Montaigne, Charles Lamb, E. B. White, and Virginia Woolf. Realizing that this persona is shaped by the force of culture and the impress of personal experience, he explores the effects of both upon the point of view, content, and voice of such essayists as George Orwell, Nancy Mairs, Richard Rodriguez, and Alice Walker. Throughout, in full command

of the history of the essay, he calls up numerous passages in which essayists themselves acknowledge the element of impersonation in their work, drawing upon the perspectives of Joan Didion, Edward Hoagland, Joyce Carol Oates, Leslie Marmon Silko, Scott Russell Sanders, Annie Dillard, Vivian Gornick, Loren Eiseley, James Baldwin, and a host of other literary guides. Finally, adding yet another layer to the made-up self, Klaus succumbs to his addiction to the personal essay by placing some of the different selves that various essayists have called forth in him within the essays that he has crafted so carefully for this book. Making his way from one essay to the next with a persona variously learned, whimsical, and poignant, he enacts the palimpsest of ways in which the made-up self comes to life in the work of a single essayist. Thus over the course of this highly original, beautifully structured study, the personal essay is revealed to be more complex than many readers have supposed. With its lively analyses and illuminating examples, *The Made-Up Self* will speak to anyone who wishes to understand—or to write—personal essays.
